Filing Description:
Re:John Hancock Life Insurance Company (U.S.A.)
Company NAIC # 65838; FEIN #: 01-0233346
Individual Long-Term Care Insurance Rate Revision Submission
Revised Actuarial Memo's (See Policy Form List Below)

Dear Commissioner:

John Hancock has recently completed our 2016 claims study. This comprehensive study is generally conducted every three years and examines the usage trend for our insured population. This study shows unfavorable trends since the 2013 study that prompted our last rate increase filing. In general, we are seeing longer-lasting and more expensive claims and increased claim incidence at the older attained ages.

As a result of the factors listed above, we are requesting a premium rate increase on the policy series listed below and are enclosing the actuarial memos and rates for your review and acceptance.

Policy SeriesApproval DateYears SoldAverage Increase
LTC-VA-91 10/3/1991, 7/17/2009, 12/1/20111991 – 199477.6%
NH-VA-9110/3/1991, 12/1/20111991 – 199377.6%

NH-94 VA10/28/1993, 12/1/20111994 – 199977.6%
LTC-96 VA9/5/1996, 7/17/2009, 12/1/2011, 4/21/20161996 – 199840.7%
LTC-96 VA 9/96 (Pre RS)1/30/1997, 7/17/2009, 12/1/2011, 4/21/20161997 – 200340.7%
LTC-96CL VA 9/5/1996, 7/17/2009, 12/1/2011, 4/21/20161996 – 199740.7%
LTC-96CL VA 9/96 1/30/1997, 7/17/2009, 12/1/2011, 4/21/2016199740.7%
NH-99 VA 4/9910/7/1999, 7/17/2009, 12/1/2011, 4/21/20162000 – 200340.7%
LTC2000 VA 4/0010/15/2001, 7/17/2009, 12/1/2011, 4/21/2016200240.7%
LTC-02 VA8/8/2002, 12/1/2011, 4/21/20162002 - 200442.4%
BSC-02 VA8/8/2002, 12/1/2011, 4/21/20162002 – 200442.4%

The proposed premium rates will be effective on the next policy anniversary date, following a 90-day policyholder notification period, which will be made as soon as practicable following state acceptance. As we will describe later in this letter, we will also offer affected insureds various benefit reduction options to help mitigate the impact of the rate increase.

The increases requested reflect the timing of the acceptance of our 2013 rate increase filings as well as any unapproved amounts from our 2013 filing on an actuarially equivalent basis.

Policyholder Options

We are fully aware that a premium increase may be difficult for our policyholders. Therefore we will provide all policyholders with an array of options which will help them mitigate the impact of any increase. Most important, for those policyholders who originally purchased lifetime 5% compound or 5% simple inflation and policyholders who took a reduced compound or simple inflation when notified of past premium increases, we will provide them with the ability to retain their existing premium by decreasing their future inflation coverage to a lower percentage which will vary by policy series. These policyholders will be able to keep all accrued inflation increase amounts to date and the lower inflation index will apply on a prospective basis only. The endorsements and other applicable forms needed to implement the benefit reduction options will be filed under a separate forms submission.]

In addition, policyholders will be able to reduce their benefit period, adjust their daily/monthly benefit amount, drop optional benefit riders or extend their elimination period.

Where the NAIC contingent nonforfeiture benefit or the nonforfeiture benefit (if purchased) is triggered, customers will be offered paid-up coverage in accordance with the applicable provision. We are allowing contingent nonforfeiture if the rate increase trigger is met for all affected policyholders, even if it was not otherwise required in your State. (Please note, that we will be voluntarily administering the enhanced contingent nonforfeiture benefit as described in the NAIC Model Bulletin "Announcement of Alternative Filing Requirements for Long-Term Care Premium Rate Increases" (as adopted by the Senior Issues Task Force on 8/9/2013.)

In addition, we are submitting for informational purposes only, our sample template policyholder communication package regarding the rate increase and landing spots. This package will be personalized for each customer and of course will vary by their respective situation (i.e., policy forms, benefit selection, etc.) This package is included in Supporting Documentation.

Ensuring No Cross-Subsidization Between States

We have ensured no state's rate increase approvals will subsidize other states' experience. Rate increases will vary by state, but only to reflect the timing and amount of prior rate increases approved by that state. This is accomplished by first backing-out all prior rate increases from our nationwide premium data. We then re-introduce prior rate increases with the amount and timing based on your state's prior approvals. The current proposed rate increases are then determined based on the amounts needed in order to achieve our target loss ratios where our targets reflect the lifetime loss ratios certified to in our prior filing.

Although some states may have capped our previous inforce rate increase filings, in each case this was done with the understanding that the full amount of the proposed rate increases were justified and that John Hancock would be refiling for the remainder at a later date. In instances where the remainder remains unapproved, it has been included in the current filings.

Past Losses Testing

Preventing companies from recouping past losses was the subject of a recent discussion by the Health Actuarial Task Force in late 2013. The accepted methodology by the Health Actuarial Task Force is to define past losses as actual past claims less expected past claims when determining loss ratio compliance where expected past claims are defined as the following:

Expected claims shall be calculated based on the original filing assumptions assumed until new assumptions are filed as part of a rate increase. New assumptions shall be used for all periods beyond each requested effective date of a rate increase regardless of whether or not the rate increase is approved. Expected claims are calculated for each calendar year based on the in-force during the calendar year. Expected claims shall include margins for moderately adverse experience; the margins included in the claims that were used to determine the lifetime loss ratio consistent with the original filing or as modified in any rate increase filing.

The rate increases we calculated follow the methodology described above to ensure that we are not recouping past losses.

This submission is being filed in all states and the District of Columbia..

The following items are included in this submission:
*the submission letter.
*all actuarial material.
*all required certifications.

Please do not hesitate to contact us regarding this submission. We will be happy to meet with the Department either in person or via conference call at a time of your convenience.

Thank you for your time and consideration in this matter.

*Dear Michelle Fluet,*

***Introduction:***

*One or more forms included within the submission were found to be in non-conformity with statutory, regulatory or administrative requirements as set forth below.*

***Objection 1***

*- Long Term Care Insurance Rate Request Summary (Supporting Document)*

*Comments: Please provide the Part 1 Rate Request Summary and the narrative explaining the rate increase. The narrative should be in language easily understood by the policyholder. The rate request summary form is available through the following link: https://www.scc.virginia.gov/boi/co/health/ltcmed/ltcratereq_sum.pdf*

***Conclusion:***

*We shall be glad to reconsider this submission upon receipt of the revised forms to address the objections noted above. Should you need clarification of any of the information contained in this letter, please contact the undersigned.*

*A response to this objection (or request for information if more applicable) is expected within 30 days. After 30 days, the filing will be DISAPPROVED unless a 30-day extension is requested.*

*Once a submission has been closed, a new SERFF submission will be required. To expedite the review, the new submission should reference the SERFF tracking number of the prior submission and verify that all outstanding issues have been addressed.*

*Should you wish to discuss any of the objections or provide additional information related to any of the objections, this should be done prior to making a new SERFF submission.*

*Thank you for your courtesy and consideration in this matter.*

*Sincerely,*
*Bill Dismore*

| Objection Letter Date | 10/12/2018 |
| Submitted Date | 10/12/2018 |
| Respond By Date | |

*Dear Michelle Fluet,*

***Introduction:***

*During our review, we noted the following inconsistencies and/or need additional information to continue. Please note, any revisions, modifications, or changes of any type to a filing not specifically requested by us must be brought to our attention upon resubmission and explained in detail.*

***Objection 1***

*- Response to 5/21/18 objection (Supporting Document)*

*Comments: 1.The 2016 Rate Increase Filing Summary.xls needs to be revised to show the cumulative total of all approved rate increases to date in each state.*

*2.Since only a sample of voluntary lapse rates is supplied, please provide the average ultimate voluntary lapse rates under current assumptions for this block of business.*

*3.Please provide the historical claim count for each product series.*

*4.Since the morbidity assumption is based on internal Company experience, please describe how the assumptions are derived for durations and ages beyond which the Company has credible experience.*

*5.For all projections requested in the next question, the baseline should comply with the following:*

*a.Any limited-pay paid-up policies should be removed, both from historical experience and future projections.*

*b.For this pre-stability block, assumptions should be best-estimate, without margins for moderately adverse conditions.*

*c.Premiums should be at the Virginia rate level for both historical and projected future.*

*d.Please use the appropriate average maximum valuation interest rate for each product series for accumulation and discounting of this block as specified in 14VAC5-200-150.*

*e.Please ensure that the discount/accumulation formulas are working formulas and specify the interest rates used in each exhibit.*

*6.Because the Bureau has observed over the years that there is often internal subsidization occurring between policyholders with different policy characteristics, for each of the six subsets of the business corresponding to the combinations of (limited/lifetime benefit periods) and (GPO/Simple/Compound inflation protection), please provide (in Excel format) the following projections on a nationwide basis:*

*a.current assumptions and current rates*

*b.current assumptions and current rates, including paid-up policies (if any)*

*c.current assumptions with the proposed rate increase*

*d.current assumptions with the proposed rate increase, but with no shock lapses, benefit reductions, CBUL, or adverse selection (if applicable)*

*e.current assumptions with premiums restated as if the proposed rate schedule had been in effect from inception*

*f.original assumptions and original premiums from inception*

*g.actual past experience (claims, mortality, lapse) but original assumptions in the future, with all premiums at the original premium scale from inception.*

*Projections a-g can be separate tabs or combined into separate columns on the same exhibit.*

*7.For each of the six subsets of the business above, please provide the active life reserves balance as of the projection date on a nationwide basis.*

*8.Since this filing includes three distinct product series, please provide the above exhibits separately for each series.*

*9.While your June 8, 2018 response #6 indicates that the company does not anticipate that it will profit or lose from landing spot elections, this will not be the case for each individual insured. How does the company communicate to the policyholder that all options may not be of equal value from their perspective?*

***Conclusion:***

*We shall be glad to reconsider this submission upon receipt of the requested information to address the objections noted above. Should you need clarification of any of the information contained in this letter, please contact the undersigned. Thank you.*

# Objection Letter

| | |
|---|---|
| Objection Letter Status | Info has been requested from company |
| Objection Letter Date | 05/21/2018 |
| Submitted Date | 05/21/2018 |
| Respond By Date | |

*Dear Michelle Fluet,*

***Introduction:***

*The Bureau of Insurance has completed an initial review of the submitted filing. A more detailed and thorough review will be performed once we are in receipt of the company's responses to the following.*

***Objection 1***

*Comments: Policy Holder Communications*

*The filing states that the company will be using the policyholder communications currently pending approval under SERFF Tracking Number MULF-131066194, which is the rate filing for the companys Individual Long-Term Care Insurance Rate Revision Submission that it markets through the Interstate Insurance Product Regulation Commission Product. If that is correct, please advise when the company anticipates responding to that filing since an objection letter has been pending since August 29, 2017.*

***Objection 2***

*Comments: Please provide the following for our analysis:*

*- For each block, please ensure that the filing includes an actual to expected analysis based on the original assumptions and those included in the prior filing.*

*- For each block, please provide the anticipated loss ratio where the numerator is equal to the anticipated incurred claims less the policy reserves, and the denominator is equal to the anticipated earned premium*

*- For each block, please provide a separate calculation of the Lifetime Loss Ratio so that the historical premium component is restated to what it would be if the proposed premium had been charged (collected) since the forms introduction.*

*- For each block, please advise how the projected future and lifetime loss ratios compare with those in the previously approved filing.*

***Objection 3***

*Comments: If the rate change will vary by issue age, benefit period, and/or inflation option, please detail each change and provide detailed actuarial justification for the changes.*

***Objection 4***

*Comments: The filing states that a number of adjustments were made in calculating the proposed rate increases. For example, adjustments were made to account for the timing of approvals on prior filings. Although the filing outlines the adjustments, it doesnt appear to include any supporting documentation for the adjustments. Please revise the filing accordingly.*

***Objection 5***

*Comments: The filing states that endorsements and other applicable forms needed to implement the benefit reduction options will be filed under a separate forms submission. Please provide the submission number of this filing.*

***Objection 6***

*- L&H Actuarial Memorandum (Supporting Document)*

Comments: Please provide support for the statement that All indexation rates were determined to be actuarially equivalent to the requested rate increases in aggregate.

### Objection 7

- L&H Actuarial Memorandum (Supporting Document)

Comments: The filing states that the lapse study removed all policies which had undergone prior rate increases except for the 2008 rerate policies which are now allowed to re-enter the study after their first year since re-rate, provided they have not subsequently received another rate increase. Please provide data including all policies for comparison purposes.

### Objection 8

- L&H Actuarial Memorandum (Supporting Document)

Comments: Regarding the landing spots, please a projection assuming all policyholders elect the reduced landing spots.

### Objection 9

- L&H Actuarial Memorandum (Supporting Document)

Comments: The filing states that the nationwide premium data has been revised to reflect the timing and amount of prior rate increases approved by a state. Please provide nationwide and Virginia only exhibits based on actual data without revisions, including also columns to reflect the actual and expected loss ratios.

### Objection 10

Comments: Please advise in what states the company has requested rate increases on this block, how the rate changes requested in Virginia compare with those requested in other states, and the current status of the reviews in other states.

### Objection 11

Comments: Please advise if the intent of the company is to not request any further rate increases if the proposed rate increase is approved and the experience develops as projected? If not, please explain.

### Conclusion:

We shall be glad to reconsider this submission upon receipt of the information requested above. Should you need clarification of any of the information contained in this letter, please contact me.

Thank you for your courtesy and consideration in this matter.

Greg Smith
Principal Insurance Market Examiner

Sincerely,
Greg Smith

# Response Letter

| | |
|---|---|
| Response Letter Status | Submitted to State |
| Response Letter Date | 11/02/2018 |
| Submitted Date | 11/02/2018 |

*Dear Bill Dismore,*

***Introduction:***

*Thank you for your note dated October 12, 2018 regarding this submission.*

***Response 1***

***Comments:***

*Please see our response letter, revised filing summary and attachments under the Supporting Documentation tab.*

***Related Objection 1***

*Applies To:*

- *Response to 5/21/18 objection (Supporting Document)*

Comments: 1.The 2016 Rate Increase Filing Summary.xls needs to be revised to show the cumulative total of all approved rate increases to date in each state.

2.Since only a sample of voluntary lapse rates is supplied, please provide the average ultimate voluntary lapse rates under current assumptions for this block of business.

3.Please provide the historical claim count for each product series.

4.Since the morbidity assumption is based on internal Company experience, please describe how the assumptions are derived for durations and ages beyond which the Company has credible experience.

5.For all projections requested in the next question, the baseline should comply with the following:

a.Any limited-pay paid-up policies should be removed, both from historical experience and future projections.

b.For this pre-stability block, assumptions should be best-estimate, without margins for moderately adverse conditions.

c.Premiums should be at the Virginia rate level for both historical and projected future.

d.Please use the appropriate average maximum valuation interest rate for each product series for accumulation and discounting of this block as specified in 14VAC5-200-150.

e.Please ensure that the discount/accumulation formulas are working formulas and specify the interest rates used in each exhibit.

6.Because the Bureau has observed over the years that there is often internal subsidization occurring between policyholders with different policy characteristics, for each of the six subsets of the business corresponding to the combinations of (limited/lifetime benefit periods) and (GPO/Simple/Compound inflation protection), please provide (in Excel format) the following projections on a nationwide basis:

a.current assumptions and current rates

b.current assumptions and current rates, including paid-up policies (if any)

c.current assumptions with the proposed rate increase

d.current assumptions with the proposed rate increase, but with no shock lapses, benefit reductions, CBUL, or adverse selection (if applicable)

e.current assumptions with premiums restated as if the proposed rate schedule had been in effect from inception

f.original assumptions and original premiums from inception

*g.actual past experience (claims, mortality, lapse) but original assumptions in the future, with all premiums at the original premium scale from inception.*

*Projections a-g can be separate tabs or combined into separate columns on the same exhibit.*

*7.For each of the six subsets of the business above, please provide the active life reserves balance as of the projection date on a nationwide basis.*

*8.Since this filing includes three distinct product series, please provide the above exhibits separately for each series.*

*9.While your June 8, 2018 response #6 indicates that the company does not anticipate that it will profit or lose from landing spot elections, this will not be the case for each individual insured. How does the company communicate to the policyholder that all options may not be of equal value from their perspective?*

***Response 2***

***Comments:***

*Please find our response to your first objection dated 5/21/18 on the supporting Documentation tab labeled as "Response to 5/21/18 objection".*

***Related Objection 2***

Comments: Please provide the following for our analysis:

- For each block, please ensure that the filing includes an actual to expected analysis based on the original assumptions and those included in the prior filing.

- For each block, please provide the anticipated loss ratio where the numerator is equal to the anticipated incurred claims less the policy reserves, and the denominator is equal to the anticipated earned premium

- For each block, please provide a separate calculation of the Lifetime Loss Ratio so that the historical premium component is restated to what it would be if the proposed premium had been charged (collected) since the forms introduction.

- For each block, please advise how the projected future and lifetime loss ratios compare with those in the previously approved filing.

**Changed Items:**

No Supporting Documents changed.

No Form Schedule items changed.

No Rate/Rule Schedule items changed.

**Response 3**

**Comments:**

Please find our response to your first objection dated 5/21/18 on the supporting Documentation tab labeled as "Response to 5/21/18 objection".

**Related Objection 3**

Comments: If the rate change will vary by issue age, benefit period, and/or inflation option, please detail each change and provide detailed actuarial justification for the changes.

**Changed Items:**

No Supporting Documents changed.

No Form Schedule items changed.

No Rate/Rule Schedule items changed.

**Response 4**

**Comments:**

Please find our response to your first objection dated 5/21/18 on the supporting Documentation tab labeled as "Response to 5/21/18 objection".

### Related Objection 4

Comments: The filing states that a number of adjustments were made in calculating the proposed rate increases. For example, adjustments were made to account for the timing of approvals on prior filings. Although the filing outlines the adjustments, it doesnt appear to include any supporting documentation for the adjustments. Please revise the filing accordingly.

### Changed Items:

No Supporting Documents changed.

Statement Regarding Future Rate Increase Filings

**Comments:**

Dear Mr. Dismore,

Thank you for your continued review of our filing. We note that in SERFF filing MULF-131210763 {Post RS submission}, the Bureau had asked on 12/19/19:

"If this increase is approved and experience develops as anticipated, will the company forgo increases in the future? If not, provide a detailed explanation of what would trigger a rate increase in the future?"

We responded on 12/19/19 - "Yes, the company will forgo increases in the future if the requested rate increase is approved and experience develops as anticipated."

We wanted the Bureau to know that our confirmation is equally applicable to this LTCi rate increase filing.

Thank you for your continued review and please let me know if you have any questions.

Best regards,

Marie Roche

It is not intended to describe or include all factors or information considered in the review process. For more detailed information, please refer to the complete filing at https://www.scc.virginia.gov/boi/SERFFInquiry/default.aspx. *(Rev. 06/19)*

**Health Insurance Rate Request Summary**

Accurate forecasting and projecting of future claims experience on LTC insurance policies is complex in its detail and application. Many factors are considered at the time that pricing is established, such as the frequency and severity of particular medical conditions, the expected lifespan of policyholders, the length of time policies are expected to remain inforce, and the cost of care, to name a few. As claims are paid, these factors can change over time.

Unfortunately, the most recent detailed review of our pricing assumptions confirms that the expected claims over the life of your policy series are significantly higher today than they were expected to be when the premiums were originally determined. In general, we are seeing more, longer-lasting claims - claim incidence has increased, claim terminations have decreased, claim utilization has increased, and mortality have decreased.

Our decision to increase premiums is solely related to the future claims anticipated on these policies.

As an alternative to paying higher premiums, we are offering several benefit reduction alternatives and, in most cases, at least one option that will enable the policyholder to keep their premiums at or close to the same level as what is being paid before the rate increase.

* Substandard risk premiums are 130% and 175% of the standard premiums
** Simple inflation benefits stop at 20 years or age 85; compound inflation benefits stop at age 85
Age 80+ rates are for inflation additions only
See Appendix D for details on premium calculations for policyholders who elected the Shared Cost options

# Appendix C1

## John Hancock Life Insurance Company (U.S.A.)

## LTC-VA-91

***Premiums to be used only with those***
***not previously elected an inflation decrease option***

**Standard rates per unit of Maximum Daily Benefit***
**Benefit Period: 5 Years**
**Elimination Period: 100 Days**

American Academy of Actuaries

# Issue Brief

JUNE 2016

## KEY POINTS:

Private LTCI is complex—a policyholder is essentially paying today for a varied range of care he or she may or may not need years, if not decades, into the future.

Insurers are gradually learning through their claims experience what the actual levels of benefits are and will be.

A means for taking corrective action to accommodate the changing future is important.

# Understanding Premium Rate Increases on Private Long-Term Care Insurance Policyholders

America faces a great public need in addressing long-term care (LTC) financing, and that need is growing even more critical because the population is aging. There can be substantial costs for LTC services and supports, and for elderly Americans and their families, finding ways to pay for those services and supports can be challenging. According to the U.S. Department of Health and Human Services, about half of Americans turning 65 today will need LTC; one in seven adults will need care for more than five years; and one in six will spend at least $100,000 for future LTC.[1]

Private LTC insurance (LTCI) is an option for financing future LTC needs; however, it is often considered cost-prohibitive by many potential consumers. In particular, in recent years, LTC[2,3] has gotten a lot of attention because of the relative size and frequency of premium rate increases. The American Academy of Actuaries' Long-Term Care Reform Subcommittee has developed this issue brief to enhance understanding of what is leading to significant rate increases, examine how the need for a rate increase is determined, discuss the effects of increases on various stakeholders, and explore alternatives to premium rate increases.

1 *Long-Term Services and Supports for Older Americans: Risks and Financing Research Brief*, Office of the Assistant Secretary for Planning and Evaluation; U.S. Department of Health and Human Services, February 2015.

2 Many LTCI policies include a "guaranteed renewable" contractual provision requiring an insurance company to offer to renew these policies, but the insurance company may do so with a premium rate increase only on a class basis.

3 Some states include short-term care insurance (which generally provides similar coverage to LTC, but for shorter benefit periods, typically for a year or less) under the classification of long-term care insurance. For clarity, this issue brief is not intended to address such short-term care insurance.

## Factors Affecting LTCI Premium Increases

Private LTCI is complex—a policyholder is essentially paying today for a varied range of care he or she may or may not need years, if not decades, into the future. As such, LTCI requires a long projection period, with some policyholders receiving benefits beyond age 100. Therefore even for the average issue age of 57, policy projections require assumptions for more than 50 years into the future. The future period is even longer for younger policyholders. Further, calculating premiums relies on a number of assumptions for variables such as:

- mortality;
- voluntary lapses;
- interest rates; and
- morbidity, including
    - incidence of disabilities requiring LTC services;
    - recoveries and mortality while on claim;
    - benefit expiry;
    - service inflation costs of covered services relative to inflation protection assumptions; and
    - the amount of services required while disabled (for policies that reimburse actual expenses).

In addition, there has been and continues to be a high level of uncertainty and change in circumstances that affect the level of sufficient premium rates, such as:

- changing pattern of service/care providers (e.g., growth of assisted living facilities and continuing care retirement communities, access to home care services that are covered by LTCI);
- changing medical practice (e.g., criteria for diagnosis of Alzheimer's disease and other cognitive impairments);
- effects of mortality improvement in the population, leading to more older age benefits and longer stays for a given age;
- changes in family composition and availability of caregivers, leading to fewer supports for care at home;
- lower investment income, a crucial consideration for a financial instrument that must accumulate large reserves over many decades to prefund the high cost of services that occur at advanced ages; and
- limited available data under existing LTCI coverage beyond 20 policy years for advanced ages, where morbidity tends to be substantially different from general population data due to the characteristics of those who purchase insurance.

If not for the ability to adjust premiums to better reflect actual experience, carriers would not have offered this type of insurance product. Without LTCI, many more people would exhaust their savings on care costs and then rely on public programs such as Medicaid for their additional care needs.

Often, examining adverse experience from older policy form blocks provides valuable insights that may be applicable to newer blocks. After reviewing the adverse experience, insurers may need to change projection assumptions used for the newer policy forms. The revised projections could identify a need for a premium rate increase. It is important to note that even though adverse experience has not developed yet for a newer block, the revised expected future benefits may be higher for that newer block than previously expected. Recognizing the need to fund the higher expected future benefits for the newer block comes in the form of a premium rate

increase. Actuaries will then communicate the amount of premium rate increases along with their assumed implementation timing to state insurance departments. Both the increase and its associated implementation timing are very important. Deferring implementation of a needed rate increase is detrimental because waiting to implement the rate increase will not start the accumulation of the needed increased premium to fund the higher expected benefits, resulting in the need for a further increase. The effect on consumers is that deferrals generally lead to the need for a higher rate increase than originally calculated.

When original LTCI policy forms were issued in the 1980s and '90s, often morbidity assumptions were based upon general population statistics, and lapse and mortality assumptions upon experience of non-LTC insurance products. Not only did the insured population behave differently than the general population, but improvements in medical diagnostic practices and services and a large increase in the use of assisted living facilities helped increase (1) the number of individuals surviving to ages where the levels of disability are higher, leading to higher claim rates per insured; and (2) the survival time following the onset of disability.

Insurers are gradually learning through their claims experience what the actual levels of benefits are and will be; nonetheless, they still do not yet have a complete basis for assessing the ultimate levels of claims to be paid at advanced ages and later policy durations, nor how these levels might change over time. Insurers will continue to use existing information to estimate these ultimate claim levels and may need to raise premium rates further as more insured life experience develops or if there are unfavorable changes in benefit usage in the future.

## Differences Between Current and Past LTCI Policies

There are significant differences in the pricing characteristics for LTCI policies issued in the past, especially more than a decade ago, compared to policies being issued today and what is expected going forward. The possibility of a future rate increase, at any point in time, is a function of the confidence level in the underlying assumptions and risks associated with these assumptions. With more conservative assumptions, more data to support those assumptions, key assumptions approaching their absolute limits (e.g., ultimate lapse rates approaching zero), and higher explicit margins, it is likely that the probability of rate increases on the current generation of LTCI policies will be lower than the probability of rate increases on previous generations. Future changes in the underlying morbidity, mortality, policyholder behavior, provider behavior, or regulations could alter this likelihood, yet statistical analyses on the experience are helpful when applying historical results to future projections.

A recent presentation[4] of the likelihood of future rate increases on policies issued in 2014 versus policies issued in 2007 and 2000, based on a survey of insurers writing business in 2000, 2007, and 2014, found the following:

- Barring the potential changes mentioned above, and using the same projection model for each time period, the risk of a future rate increase issued in 2014 (using 2014 assumptions) is only one-quarter that of the risk on business issued in 2000 (using 2000 assumptions), and only one-third that of the risk on business issued in 2007 (using 2007 assumptions).
- The primary reasons for this improved expectation of future premium stability are the substantially greater insured experience behind each successive set of assumptions, the significantly lower future downside risk of most assumptions, and an increase in the margins for adverse experience.

4 Stephen Douglas Forman, James M. Glickman, and Roger Loomis, "LTCI New Business Pricing - How Safe Is It?," Society of Actuaries Annual Meeting, October 11-14, 2015.

- Amount of data increased 16-fold from 2000 to 2014.
- Claims data for ultimate experience (e.g., durations 10 and beyond) at attained ages over 80 increased 70-fold from 2000 to 2014.
- Ultimate voluntary lapse rate assumptions decreased from 2.8 percent in 2000 to 0.7 percent in 2014. This leaves very little room for future adverse deviations from lower voluntary lapse rates.
- Best estimate ultimate claim costs in the year 2000 were estimated at 70 percent of the recently released 2000-2011 SOA LTC Experience Study.[5] The corresponding best estimate ultimate claim costs used for 2014 pricing were 108 percent of that SOA LTC Experience Study.
- Ultimate mortality being used in 2014 pricing is 72 percent of the mortality assumption used in 2000.
- Investment portfolio rates were assumed to be 6.4 percent for every future year of a policy issued in 2000, while they are now assumed to be 4.6 percent for every future year of a policy issued in 2014.

• As a consequence of the above, the average policy premiums (for the same benefits) increased to 215 percent of the year 2000 premiums by 2014.

## Determining the Need for Premium Rate Increases

In determining whether LTCI policies require a premium rate increase, two authorized methods are applied—one for policies subject to minimum loss ratio certifications and one for a rate stability certifications.

Historically, LTCI pricing was subject to a 60 percent minimum loss ratio (MLR) by most states, meaning that the ratio of the present value of lifetime claims to premiums could not fall below 60 percent. Beginning in the early 2000s, many states enacted rate stability laws, which stated that LTCI should be priced without using the MLR approach. Instead actuaries would need to certify that the premium rates had enough margin to withstand moderately adverse experience (MAE).

Under the MLR approach, if an insurer demonstrates that revised historical and future projected experience produces a lifetime loss ratio greater than 60 percent (or the originally priced-for loss ratio), a premium rate increase could be filed that would allow the projected experience on the policies to return to that lifetime loss ratio.

Under the rate stabilization approach, a premium rate increase could be requested if actual past experience combined with projected future experience exceeds the original or previously defined MAE margin. If revised projections using updated experience exceed the MAE margin, then a premium rate increase could be filed such that the lifetime loss ratio on the original premiums is assumed to be the greater of 58 percent and the original assumed loss ratio; and the lifetime loss ratio on the increased premiums is at least 85 percent (with claims projected into the future including MAE). For this premium rate increase filing, the amount of premium rate increase needs to be large enough for the insurer's designated actuary to certify that the premiums are sufficient with no further premium rate increases in the future unless the actual experience exceeds a revised MAE margin.

5 Society of Actuaries, *Long Term Care Intercompany Experience Study – Aggregate Database 2000-2011 Report*, January 2015.

Under either approach, the need for a premium rate increase should be driven by projected lifetime loss ratios also, rather than actual past experience alone. Despite the relatively straightforward mathematical calculations to determine premium increases, determining projection assumptions (e.g., whether actual historical experience is sufficiently credible to justify changes in future projected assumptions) can be difficult.

Some assumptions have a higher degree of credibility earlier in the life of a policy than others. For example, policy lapses are more likely to occur in the earlier years of the policy, and claim submissions are more likely to occur in later policy years. As such, actual lapse experience develops a higher degree of credibility in the earlier years of the business while actual claim experience has a lower degree of credibility in the earlier years of the business.

With LTCI it can take a long time from the purchase of a policy until the first time a claim is submitted, and this time period can be several decades for many individual policies. As such, there is often little claims experience to justify premium rate increases on a relatively young group of policy forms based on the experience of those forms alone. Section 3.2.1 of Actuarial Standard of Practice No. 18, *Long-Term Care Insurance*, requires actuaries to use alternative data sources such as public data or experience from the insurance company's older, similar policy forms for identifying reasonable assumptions.[6] Waiting until there is adequate claim information on each policy form could result in much larger, less affordable rate increases.

## Filing and Approval Process

The rate increase process can vary across state jurisdictions, and can be time-consuming. While a company prepares the same initial rate increase filing in each jurisdiction, the filings are addressed differently by many states. Each state/jurisdiction approval includes unique conditions. Approvals are often for different amounts, which sometimes may not be at an adequate level as determined by the company, with different administrative implementation rules and time frames for that approval to be effective.

Larger rate increase requests may experience delays in approval within a state, and depending on the time taken in the approval process might mean the insurer does not receive approval in the year filed, and for that missed year will need to be made up in later years, in the form of an even higher premium rate for that state. Similarly, if a state approves less than the needed increase, carriers will likely request additional increases to make up for the expected shortfall. Thus, the cumulative amount of the increase could be larger than the original request in that state.

It would be necessary to develop steps to improve the filing and approval process that consider regulatory requirements found in state laws and regulations, including:

- An insurer's thorough review signed by an actuary with LTCI experience identifying deterioration and migration from each of the initial pricing assumptions;
- Predesigned rules or guidelines for increase approval that take into account the necessary total increase or an implementation plan for a series of preferred rate increases;

6 Actuarial Standards Board, Actuarial Standard of Practice No. 18, *Long-Term Care Insurance*, January 1999.

- Preset benefit reduction options that will be offered to policyholders in their effort to maintain the same premium level;
- Standardized dates and methods of implementing the rate increases nationally; and
- Seeking greater ability through enhanced standards at the Interstate Compact for premium rate increase approvals.[7]

## The Effects of Premium Rate Increases

LTCI premium rate increases may not align the premiums with the future benefits as well as one might otherwise expect because individual behavior may not align with predictions. There are several reasons for this.

First, an insurer may offer an opportunity to reduce benefits in order to keep the premium dollars a policyholder pays roughly equivalent after the premium rate increase versus before (e.g., reducing the daily maximum benefit). When offered, policyholders may select benefits that better match their current/anticipated health care needs. For example, many policyholders are in the position where they have higher maximum daily benefits than actual current cost of services because the policyholders originally purchased inflation coverage[8] to meet expected inflation needs but actual inflation turned out to be lower. A policyholder who has coverage limits significantly higher than the actual cost of LTC services may reduce their daily maximum coverage such that the premiums do not change and the new maximum benefit levels continue to remain higher than the actual cost of services. Similar examples may exist for lapsing of particular riders or other benefit options.

Second, many states' regulations require that a nonforfeiture benefit be given in lieu of lapse to those who cease paying premiums and whose cumulative premium rate increases exceed a specific percentage based on the issue age of the policyholder. The nonforfeiture benefit is a paid-up benefit with a total policy limit that equals the premiums paid to date (less any claims paid), and payable according to the benefits of the policy had it not ceased to be premium-paying upon implementation of a premium rate increase. The insurer maintains a reserve for these remaining paid-up benefits. While this remaining nonforfeiture reserve is lower, the company will have a harder time monitoring residual benefits in cases in which there is a significant reduction in policyholder contact and no incentive to report an insured's death.

Finally, the policyholders who choose to lapse their policies or reduce their benefits may be the healthier policyholders, leaving the remaining pool of policyholders with higher average expected claims. Ideally, and to the extent the experience is credible, the morbidity experience following a premium rate increase should be compared to the morbidity of similar policies without a premium rate increase.

## Alternatives to a Premium Rate Increase

Insurers have routinely allowed insureds to reduce coverage by changing typical benefit options in order to help offset some or all of a rate increase. In recent years, in an effort to enable policyholders faced with a rate increase to retain significant coverage, some companies have started making available an option for policyholders to avoid the rate increase and keep their same premium by reducing the size of the future benefit increases for plans with automatic built-in inflation increases.

For example, policyholders would be able to keep their accrued benefit at their current inflation rate and only the future increases are lower

7 The Interstate Insurance Product Regulation Compact allows member states to establish standards for long-term care insurance, among other insurance products. These insurance products are governed by the Interstate Insurance Product Regulation Commission (IIPRC), where there is a limited ability to control rate increases through reviews of rate filing standards.

8 A popular inflation option selected by policyholders was the 5 percent option because states required LTC applicants to sign that they rejected this option, which often led to applicants selecting the 5 percent option. This inflation option turned out to be higher than actual LTC cost increases, leaving many policyholders with more coverage than needed.

than they would otherwise be. This is most effective as a conservation tool if it is done on an actuarially equivalent basis, meaning that the new prospective inflation accrual is set so that the present value of the expected reduction in benefits over time will be equal to the present value of the premium increase that is forgone. This is in contrast with most benefit reductions, which are in essence "partial surrenders" where there may be a reduction in the insurer's liability.

When insureds reduce their benefits to help offset a rate increase, an insurer would expect some adverse selection—meaning that the healthier insureds are the ones reducing their benefits and thus the experience on the block will likely worsen over time. With the approach described above, there may be less adverse selection involved because the benefit reductions are gradual and may not become significant for many years.

In the past relatively few insureds have chosen to lapse their policies when premiums were increased and alternatives to the increase were offered. According to a 2010 report from Gen Re (a reinsurance company) based on an industry survey, lapses at the time of a rate increase were only higher than normal by 2.5 percent of the total policies exposed to an increase.[9] The low 2.5 percent extra lapse rate suggests that the increases were generally affordable for the vast majority of policyholders, which is likely due to LTC insurance purchasers being in the higher income and asset demographics than non-purchasers.

## Conclusion

Predicting future policyholder and service provider behavior can be difficult. A means for taking corrective action to accommodate the changing future is important. The more conservative assumptions in today's pricing of private LTCI and improved speed at taking corrective action should improve future projections, resulting in fewer and smaller rate increases.

9 The context for the premium rate increases at the time of the survey included: a low-interest-rate environment, generally lower-than-anticipated lapses and mortality, an average rate increase of about 25 percent in the survey, and premium price points that were generally at or below what policyholders could purchase at their attained ages.
