NOTICE TO THE PUBLIC OF AN APPLICATION BY  
 VIRGINIA ELECTRIC AND POWER COMPANY  
 FOR APPROVAL AND CERTIFICATION OF ELECTRIC  
 TRANSMISSION FACILITIES IN FAIRFAX COUNTY  
CASE NO. PUE-2016-00056

On May 25, 2016, Virginia Electric and Power Company d/b/a Dominion Virginia Power ("Dominion" or "Company") filed with the State Corporation Commission ("Commission") an Application for approval and for a certificate of public convenience and necessity to construct and operate electric transmission lines and facilities in Fairfax County, Virginia. Dominion filed the Application pursuant to § 56-46.1 of the Code of Virginia ("Code") and the Utility Facilities Act, Code § 56-265.1 *et seq.*

The Company proposes to construct approximately 670 feet of new double-circuit 230 kilovolt ("kV") transmission lines, four structures to support these new lines, and a new 230 kV Elklick Switching Station (collectively, the "Project"). As proposed, the Company would cut the existing 230 kV Bull Run-Loudoun, Line #295, and extend each end for approximately 670 feet to terminate at the proposed Elklick Switching Station, creating a revised Line #295 and a new 230 kV Loudoun-Elklick Line #2173. According to the Application, the Project would accommodate an expansion of Northern Virginia Electric Cooperative's ("NOVEC") existing Pleasant Valley Delivery Point Station ("Pleasant Valley Station") and is needed to comply with mandatory North American Electric Reliability Corporation standards.

The proposed Project would be constructed using approximately 170 feet of existing Company right-of-way and approximately 500 feet of new right-of-way, for which the Application indicates that the Company would obtain easements from the underlying property owners, which are the Fairfax County Park Authority, Dominion Cove Point (a customer of NOVEC), and NOVEC. The proposed Elklick Switching Station would be constructed adjacent to NOVEC's existing Pleasant Valley Station. As proposed, three of the four structures that would support the new transmission line would be three-pole structures with heights ranging between approximately 35 to 55 feet and the fourth would be a steel pole structure approximately 105 feet in height. A more complete description of the Project may be found in the Company's Application.

In its Application, Dominion indicates that the in-service date for the Project is December 31, 2017. Dominion estimates that it will take 10 to 12 months to construct the proposed Project. The Company estimates the total cost of the Project to be approximately \$8.1 million, of which approximately \$2.1 million is for transmission line construction work, and approximately \$6.0 million is for station work at the Ellick Switching Station.

### **Transmission Line Route**

The Project is located northwest of Sudley Springs in Fairfax County, Virginia, approximately 2.4 miles south of the intersection of Braddock Road and Bull Run Post Office Road. Two new 230 kV tap lines of approximately 670 feet will be constructed between existing Line #295 and the proposed Ellick Switching Station.

All distances and directions are approximate. A sketch map of the route accompanies this notice. A more detailed map of the route may be viewed on the Commission's website: <http://www.scc.virginia.gov/pue/elec/transline.aspx>.

The Commission may consider a route not significantly different from the route described in this notice without additional notice to the public.
