Note 1: A 100-foot wide right-of-way (ROW) will be asked within the 500-foot corridor. The Company needs the flexibility to shift the centerline no more than 200 feet if necessary after completion of ground surveys, environmental studies, additional interviews with landowners and final engineering. Nonetheless, the Company believes the centerline illustrated is the most suitable alignment based upon preliminary analysis.

Note 2: The parcels were obtained from the Virginia Geographic Information Network (2018) and are not based on an accurate ground survey and should not be construed or used as exact descriptions of legal boundaries.
