These are X12 code descriptions, which often do not relate to the information we are trying to send. Unfortunately, X12 cannot keep up with our code needs so we often change the meanings of existing codes. See graybox for the UIG or state definitions.

This column shows the X12 attributes for each data element. Please refer to Data Dictionary for individual state rules.

Cancel-ReBill 867-810  
Cross-Reference  
Example

This example is to clarify questions concerning the use of the cross-reference between the 867 and 810 Cancels since wording around the value for the 810 BIG05 field needs some additional explanation in order to be completely explicit. It reads, "The cross-reference number originally transmitted in the 867 in the BPT02 must be sent in the BIG05."

Some utilities have assumed this to mean the BIG05 value on the cancel 810 should contain the value that was in the original 867 BPT02 field. Other utilities have assumed this to mean the BIG05 value on the cancel 810 should contain the value that was in the cancel 867 BPT02 field.

VAEDT has decided to implement the first approach of having the BIG05 value on the cancel 810 contain the value that was in the original 867 BPT02 field.

Listed below are several examples to further elaborate:

**Rate Ready – Cancel / Rebill due to usage**

	867 BPT01 or 810 BIG08	867 BPT02	867 BPT09	810 BIG02	810 BIG05	810 REF*OI

Utility sends restated charges via 867	00	113

**Bill Ready - Cancel / Rebill due to usage**

	<b>867 BPT01 or 810 BIG08</b>	<b>867 BPT02</b>	<b>867 BPT09</b>	<b>810 BIG02</b>	<b>810 BIG05</b>	<b>810 REF*OI</b>
Utility sends Usage via 867	00	111

**Bill Ready - Supplier Initiated cancellation (not related to usage)**

**Note:** Not all utilities have indicated support of Supplier initiated cancellations.

- Semantic Notes:**
- 1 SLN01 is the identifying number for the subline item.
  - 2 SLN02 is the identifying number for the subline level. The subline level is analogous to the level code used in a bill of materials.
  - 3 SLN03 is the configuration code indicating the relationship of the subline item to the baseline item.
  - 4 SLN08 is a code indicating the relationship of the price or amount to the associated segment.
- Comments:**
- 1 See the Data Element Dictionary for a complete list of IDs.
  - 2 SLN01 is related to (but not necessarily equivalent to) the baseline item number. Example: 1.1 or 1A might be used as a subline number to relate to baseline number 1.
  - 3 SLN09 through SLN28 provide for ten different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

<b>Notes:</b>	The IT1/SLN segment (Position 200) is used to overcome the limitation of 25 IT1/SAC loops (Position 180). Each SLN loop will only contain one SAC. - Semantic Notes:**
- 1 If SAC01 is "A" or "C", then at least one of SAC05, SAC07, or SAC08 is required.
  - 2 SAC05 is the total amount for the service, promotion, allowance, or charge. If SAC05 is present with SAC07 or SAC08, then SAC05 takes precedence.
  - 3 SAC08 is the allowance or charge rate per unit.
  - 4 SAC10 and SAC11 is the quantity basis when the allowance or charge quantity is different from the purchase order or invoice quantity. SAC10 and SAC11 used together indicate a quantity range, which could be a dollar amount, that is applicable to service, promotion, allowance, or charge.
  - 5 SAC13 is used in conjunction with SAC02 or SAC04 to provide a specific reference number as identified by the code used.
  - 6 SAC14 is used in conjunction with SAC13 to identify an option when there is more than one option of the promotion.
  - 7 SAC16 is used to identify the language being used in SAC15.
- Comments:**
- 1 SAC04 may be used to uniquely identify the service, promotion, allowance, or charge. In addition, it may be used in conjunction to further the code in SAC02.
  - 2 In some business applications, it is necessary to advise the trading partner of the actual dollar amount that a particular allowance, charge, or promotion was based on to reduce ambiguity. This amount is commonly referred to as "Dollar Basis Amount". It is represented in the SAC segment in SAC10 using the qualifier "DO" - Dollars in SAC09.

<b>Notes:</b>	Each SLN loop will contain only one SLN and one SAC. Multiple charges/allowances require multiple SLN loops.
<b>VA Use:</b>	Required SAC08, 09, 10 are conditional, they must be provided if the charge in the SAC05 is based on a rate. The SAC01, SAC03, SAC04 and SAC05 are mandatory in all cases.
