Filing Description:

These forms are existing individual policy forms providing comprehensive and nursing home only long-term care coverage. These policy forms were issued in Virginia beginning in December 2002 and are still being marketed in this jurisdiction with revised new business rates. Only two in-force policies were issued in Virginia prior to October 1, 2003, the effective date of rate stability in Virginia.

New York Life is requesting the approval of an average premium rate increase of 22.3% on the original rates filed with the above-listed policy forms. On March 22, 2012 under SERFF tracking number NWLT-127404692 New York Life obtained approval of revised new business rates on these policy forms. The revised new business rates implemented in 2012 are not impacted by this rate increase request. The increase on the originally filed rates is needed due to higher than expected policy persistency, including both lower than expected mortality and lower than expected voluntary lapses.

The company calculated the actuarially justified amount but limited the rate increase to 40%, as we are sensitive to the impact a rate increase will have on our policyholders. In addition, the company is exempting all policyholders with an attained age of 75 or above from this increase. This results in a requested increase of 0% for all policyholders with an attained age 75 or above, a 40% increase for all other policyholders with an issue age under 50, and a 25.1% rate increase for all other policyholders with an issue age 50 and over. The increased premium will be further limited to the premium rate schedule currently marketed in Virginia by New York Life.

Policyholders who reach attained age 75 before their first policy anniversary on or after the rate increase implementation date will not receive an increase on any portion of premium (including CPI-U offers). The premium rate increase will apply to CPI-U offers for policyholders with an attained age under 75 at their first policy anniversary on or after the rate increase implementation date

New York Life will offer insureds affected by the premium increase the option of reducing their policy benefits to provide flexibility of choice for those insureds who wish to maintain a premium level reasonably similar to what they were paying prior to the rate increase.

As New York Life is a mutual company and our LTC product is a participating policy, improvement in the performance of the product could lead to dividends being paid in the future.

A Contingent Nonforfeiture Benefit has previously been filed and is included with all ILTC-5000 and INH-5000 policies issued in the state.

Objection Letter

Objection Letter Status	Info has been requested from company
Objection Letter Date	02/28/2014
Submitted Date	02/28/2014
Respond By Date	

Dear Jeanette Slabaugh,

Introduction:

So that this filing may be submitted for approval, please address the following:

Thank you for the revised Actuarial Memorandum as requested. Please revise the actuarial certification slightly to stated under item 2) if the rate increase is granted and assumptions, "which reflect moderately adverse conditions', are realized, no further premium rate increases are anticipated.

On the Rate/Rule Schedule, please remove the "originally approved rates" from the rate schedules since these rates do not need approval and avoid any confusion with the New Increased Rates Schedules (These may be moved to supporting documentation). Please remove the effective date on each of the new schedules since it would no longer be applicable. Please review the age 75 and over rates. It is our understanding those rates should not change, similar to what occurred under SERFF filings: NWLT-128855883 and NWLT-128928316.

Please amend the Rate Summary to also indicate rates are being implemented over a three year period and the percentage increases.

We previously requested the policyholder letter would need to clearly indicate the ultimate rate increase and that it was being implemented over a three year period. The letters were amended to include the premium and effective date for each yearly increase. It does not appear, however, the letter actually states the overall percentage increase or what the percentage increase is each year. Since the percentage increase is not the same for all three periods, please amend the letters accordingly.

Conclusion:

We shall be glad to reconsider this submission upon receipt of the information noted above. Should you need clarification of any of the information contained in this letter, please contact the undersigned.

Thank you for your courtesy and consideration in this matter.

Sincerely,
Janet Houser

Objection Letter

Objection Letter Status	Disapproved
Objection Letter Date	01/08/2014
Submitted Date	01/15/2014
Respond By Date	

Dear Jeanette Slabaugh,

Introduction:

Thank you for your recent reply to our request for additional information. Before the rate increase may be approved, please address the following:

You provided a state grid of your filing approvals. That grid showed the premiums for each of the rate increase categories of issue age < 50, issue age 50+ and attained age 75+. When we calculate a weighted average, we arrive at an average 26.6% increase for Virginia policyholders. But the filing states the average increase is 22.3%. Is the entire difference attributable to the capping of premium rates by the currently marketed premium rates in Virginia? Or is there another explanation?

The submission indicates the revised new business rates implemented in 2012 are not impacted by this rate request. Please include in the actuarial certification a statement pursuant to 14 VAC5-200-153 B4 that the renewal premium rates schedules are not greater than new business premium rate schedules except for differences attributable to benefits, unless sufficient justification is provided to the commission.

The Actuarial Certification in the Actuarial Memorandum appears to only apply to those policies issued after post stabilization. Because this filing also applies to pre-stabilization plans, please provide the appropriate actuarial certification applicable to such plans.

Affected Form Numbers under the Rate/Rule Schedule includes the term "et al". Please amend the Affected Form Numbers to list each policy form and rider form numbers for which the rate increase applies and separate each with commas. The affected form numbers should match exactly the form numbers as approved in Virginia. Please clearly indicate these rates do not apply to new business as noted above.

Please complete the attached Rate Summary. This form is now required for Long Term Care rate filings. Our expectation is that the form would put into consumer friendly language a clear explanation of the justification for the rate increase. This should be fairly high level and not drill down deep into the details but at least explain to the consumer the assumptions and changes that are driving the need for an increase.

In reviewing the policyholder letter, we request the following changes be made:

Please expand on the reason for the rate increase as to why the company is anticipating higher claims than originally expected in terms the consumer can understand. The next sentence should be amended to state "The Virginia Bureau of Insurance reviewed the filing for compliance with applicable Virginia laws and regulations governing Long Term Care Insurance; and because it was found to be compliant with these laws and regulations, it was approved."

The first paragraph on the second page indicates information on how to adjust the payment amount and other helpful information is included with the letter. Please provide us with a copy of all additional documents that may be included with the letter. Please provide us with the form numbers, SERFF tracking numbers, and approval dates for the Contingent Nonforfeiture benefit rider and Dividend Endorsement form referenced in the letter. If these forms are not already approved, this can either be done as a separate filing or the company can amend this filing to include it. Any submitted form will need to comply with the filing requirements of Chapter 100 of the Virginia Administrative Code.

State: Virginia **Filing Company:** New York Life Insurance Company
TOI/Sub-TOI: LTC03I Individual Long Term Care/LTC03I.001 Qualified
Product Name: Long Term Care
Project Name/Number: 2013 Rate Increase/

Since there is variable information contained in the letter, please provide a statement of variability explaining when such variable paragraphs will or will not appear in the letter.

It is my understanding the company is not adverse to implementing the rate increase over a three year period. As a result, the following would be needed in addition to the above:

1) A revised Actuarial Memorandum stating such
2) Rate schedules for each policy and rider forms for each period attached to the Rate/Rule Schedule
3) The policyholder letter would need to clearly indicate the ultimate rate increase and that it was being implemented over a three year period. The premium amount and effective date for each period must be included in the letter.

Conclusion:

We shall be glad to reconsider this submission upon receipt of the information noted above. Should you need clarification of any of the information contained in this letter, please contact the undersigned at 804-371-9390.

Thank you for your courtesy and consideration in this matter.

Sincerely,
Janet Houser

Objection Letter

Objection Letter Status	Disapproved
Objection Letter Date	09/20/2013
Submitted Date	09/20/2013
Respond By Date	

Dear Jeanette Slabaugh,

Introduction:

We'll continue our review upon receipt of the company's responses to the following. Let me know if you have any questions or wish to discuss.

1.The experience and projections need to be split between pre and post rate stabilization projections. We understand that only 2 policies were issued in Virginia prior to the rate stabilization date of October 1, 2003. But the same is not true for nationwide. Please resubmit Exhibits II through XII in Excel format with the pre and post rate stabilization split.

2.Demonstrate the experience under pre-rate stabilization meets the 60% loss ratio requirement. Demonstrate the experience under the post rate stabilization meets the 58% / 85% loss ratio requirement. Provide the annual "best estimate" active life reserve balances for the nationwide pre rate stabilization policies only.

3.Provide the same distributions of business previously provided, but split between pre and post rate stabilization policies.

4.The revised lapse assumption varies by issue age, policy duration and marital status. Please provide an Actual to Expected study with the same variables. Show the exposure, actual lapses and expected lapses for each cell. We appreciate there will be volatility in those results. Does the lapse study include the experience of these forms only or does it include other forms? Is it experience from inception or is it limited. How does the revised lapse assumption compare to the lapse assumption used to recently re-price the product?

5.Is the revised mortality assumption the 1994 GAM basic or static table? Please confirm there are no adjustments other than the selection factors and mortality improvements. Your response state the mortality selection factors were in Attachment 1. We saw the morbidity selection factors, but not the mortality selection factors, unless you are using the A/E ratios as selection factors. Please provide the mortality selection factors. Does the Actual to Expected analysis include the experience of these forms only or does it include other forms? Please give a more complete description of the mortality improvement assumption. How does the revised mortality assumption compare to the assumption used to recently re-price the product?

6.The actual to expected morbidity analysis shows experience back to 1991. Confirm our understanding that the actual to expected analysis is based on more experience than just this form. Does it include all Company experience or just certain subsets? Please describe the source for this analysis. Do you expect the morbidity to be uniform across the various blocks of business or has the underwriting changed over time?

7.Your response to the question on unfair discrimination shows 26 states have approved the rate increase. Please provide a revised Exhibit XII which shows the approvals by state. Provide this in an Excel workbook. Include the inforce premium before the increase, by state and by the 3 increase categories of issue age < 50, issue age > 50 and attained age >74.

8.Do the projections include any future purchases under the inflation option?

9.Do the projections include any premium reductions due to shock lapses beyond the 2.4% benefit buy-down?

10.The filing states that the company intends to absorb the lost premiums on those policyholders that will not receive the proposed rate increase. In the prior objection letter, the company was requested to address how it intends to do this; and will not potentially

seek to have the other policyholders subsidize the lost premiums. The company's response does not appear to address this concern. It would appear that future projections should account for the premium increases not implemented for those over the age of 75 in some manner.

Conclusion:

Sincerely,
Bob Grissom

Objection Letter Date	06/30/2013
Submitted Date	06/30/2013
Respond By Date	

Dear Jeanette Slabaugh,

Introduction:

We'll continue our review of the submitted filing upon receipt of the company's responses to the following. Please let me know if you have any questions.

1.What other long term care business – group and individual – does the Company have in force? What is the reason for separating these forms from the other forms?

2.Please provide the attachments to the actuarial memorandum in Excel format, with working formulas. These are Exhibits II through XII. Please expand Exhibit XII to show the annual premium in force prior to the rate increase.

3.Please expand the results of the A/E studies. Provide the analysis in an Excel workbook.
a.Lapses – Please include the exposure and the count of expected lapses. Please confirm the expected is based on the revised assumptions.
b.Mortality – Please include the exposures and the count of expected deaths. Please confirm the expected deaths are based on the revised assumptions and they reflect the mortality selection factors. What are the mortality selection factors? In addition to the policy year analysis provide two other analyses – one by gender and one by attained age groups. We are trying to confirm the fit is good across several key parameters.
c.Morbidity - Please include the exposures and the count of expected claims. Please confirm the expected claims are based on the revised assumptions and they reflect the morbidity selection factors. What are the morbidity selection factors? In addition to the calendar year analysis provide three other analyses – one by gender, one by attained age groups and one by policy duration. We are trying to confirm the fit is good across several key parameters.

4.Please provide a brief description of how the revised morbidity compares to the original morbidity assumption. We are seeking a measure of relative value. Please describe if the changes are driven by incidence or continuance or both. If both, give a ballpark estimate of how much of the change is driven by incidence vs. continuance.

5.Please describe how you arrived at your 3 tiers of rate increases:
a.0% for insureds with an attained age >74
b.40% for insureds with attained age <75 and issue age <50
c.25.1% for insureds with attained age 75 and issue age 50-74
d.All increases are capped at the rates recently approved and offered to new insureds.

What was the thinking behind the 40% and 25.1%? How frequently do the caps of the current rates come into play? Are any of the current rates actually less than the prior rates for specific cells?

6.We understand that if an insured is currently less than age 75 and purchases additional coverage through the CPI-U option, he will pay at a higher rate. What happens to the same insured who, several years from now reaches age 75 and wishes to purchase additional coverage? Does he pay at the increased rate or the original premium rate?

7.The actuarial memorandum states the projections recognize benefit buy-downs of 1.5%. Is there any related anti-selection associated with the buy-downs in the projections?

State: Virginia **Filing Company:** New York Life Insurance Company
TOI/Sub-TOI: LTC03I Individual Long Term Care/LTC03I.001 Qualified
Product Name: Long Term Care
Project Name/Number: 2013 Rate Increase/

8.The actuarial memorandum states the Company is absorbing the cost of exempting policyholders over attained age 74 from the rate increase. Please quantify this amount. Exhibit II shows the lifetime loss ratio with the rate increase is 57.9%. What would the lifetime loss ratio be if these older policyholders were not exempt?

9.In the original pricing of this form, what was the target loss ratio?

10.14 VAC5-200-153B2 requires statements that

a.if the rate increase is granted and the assumptions are realized, then no further rate increases are anticipated; and
b.the premium rate filing is in compliance with this section

Please provide a revised actuarial memorandum with these required statements.

11.Please provide the following distribution of the nationwide inforce business:
a.By gender
b.By issue year
c.By inflation option
d.By attained age
e.By marital status

To clarify, we are looking for five separate distributions, not a 5-dimensional distribution.

12.Does the Company have any limited pay policies? If so, please provide a distribution of business by the various payment options. Please confirm the premium payment periods were properly reflected in the projections.

13.Does the Company have any rate guarantees on this block? If so, please provide a distribution of business by the various length of the rate guarantees. Please confirm the rate guarantees were properly reflected in the projections.

14.How are waived premiums handled in the financial exhibits? Are they a reduction to premiums or an addition to claims? Are they handled consistently between the historical period and the projection period?

15. Please submit the historical and projected experience of the policies added under the new premium rates. They too are part of the form and must be included. We are asking for the national experience on these policies with and without the rate increase. We are asking for the experience of these policies separately, so we can more easily evaluate their contribution to the form experience.

16. The filings states that policyholders who reach attained age 75 before their first policy anniversary on or after the rate increase implementation date will not receive an increase on any portion of premium (including CPI-U offers). Please provide a legal analysis that addresses why the company's proposal is not in violation of unfair discrimination laws as set forth in § 38.2-508 2 of the Code of Virginia.

Conclusion:

Sincerely,
Bob Grissom

Satisfied - Item:	L&H Actuarial Memorandum
Comments:	The indicated rate increase on the Rate/Rule Schedule tab was calculated by targeting a 60% lifetime loss ratio and assumed that historical earned premiums could be increased so as not to recoup past losses. The calculation does not take into account policyholder behavior resulting from a rate increase such as shock lapse, reduced benefit option election, and adverse selection.

Satisfied - Item:	L&H Actuarial Memorandum
Comments:	The indicated rate increase on the Rate/Rule Schedule tab was calculated by targeting a 60% lifetime loss ratio and assumed that historical earned premiums could be increased so as not to recoup past losses. The calculation does not take into account policyholder behavior resulting from a rate increase such as shock lapse, reduced benefit option election, and adverse selection.

Amendment Letter

Submitted Date: 03/26/2015

Comments:

Janet,

I've attached a revised Readability Certificaiton as requested. In regards to the Statement of Variability, I realized it was actually form ALTC-5070 (VA) (0115) that had the incorrect reference to the Waiting Period/Waiver of Premium Enhancement Rider. That option exists only in the ILTC-4300 policy series and is never available in the ILTC-5000 series, so it has been removed from the Endorsement. Therefore, no change was needed to the Statement of Variability.

If you have any questions about this, please feel free to give me a call.

Amendment Letter

Submitted Date: 03/24/2015

Comments:

We have changed the 17.7% to 18% on the Rate Rule Schedule tab and also under the Percent Change Request next to the rate pages. After looking at the rate pages, we do not believe any additional information is necessary there.

Amendment Letter

Submitted Date: 03/24/2015

Comments:

Per your email earlier today, Sheryl Babcock has revised the Actuarial Memorandum which now matches Exhibit XII.

The revised average rate increase using the revised counts and premium for VA is 18/%. this is the value that should be used in the rate summary.

The average premium before the rate increase is $1739 and the average premium after the increase is $2122.

We will send the revised Excel spreadsheet you provided earlier via email. This will show how Sheryl calculated the 18% and the average premium of $2,122.

Supporting Document Schedule Item Changes	
Satisfied - Item:	L&H Actuarial Memorandum
Comments:	The indicated rate increase on the Rate/Rule Schedule tab was calculated by targeting a 60% lifetime loss ratio and assumed that historical earned premiums could be increased so as not to recoup past losses. The calculation does not take into account policyholder behavior resulting from a rate increase such as shock lapse, reduced benefit option election, and adverse selection.

Amendment Letter

Submitted Date: 03/23/2015

Comments:

Based on phone conversation earlier today, I have changed ALTC-5037 (1001) to ALTC-5037 (0306) on the rate pages attached.

I have also revised the Rate Rule Schedule tab to remove ALTC-5019 (VA) (1001), ALTC-5039 (0306), ALTC-5039 (0408), ALTC-5042 (0707), ALTC-5050 (0704) and ALTC-5090 (VA) (0707) for which no rates are charged. Form ALTC-5038 (0306) has also been removed since it has never been made available in Virgi;ng.

Amendment Letter

Submitted Date: 03/20/2015

Comments:

For purposes of the rate increase schedule pages, we determine if a policyholder has reached "Attained Age 75 and Up" by whether the policyholder has reached attained age 75 and up by the first anniversary on or after the rate increase implementation date. If they have reached age 75 and up by the first anniversary on or after the rates increase implementation date, all future changes to rates will use the rate pages that were used at the time of implementation.

For the 5.0, all base rates and all additional possible purchase options are based on issue age. Future purchase offers are only possible for policies with the annual CPI-U offer riders. That is why the rate pages indicate "issue age for base and offers" for only those rate pages.

For the 5.0, all base rates and all additional possible purchase options are based on issue age. Future purchase offers are only possible for policies with the annual CPI-U offer riders. That is why the rate pages indicate "issue age for base and offers" for only those rate pages.

We have also added an asterisk in the heading of each rate page which connects to a footnote at the bottom of the page. We believe this provides clarification which will be helpful not only in your review prociess, but also for those using the rate pages in the future.

We provided an explanation for ALTC-5038 (0306) and ALTC-5039 (0306) yesterday as part of our amended filing. However, there are a few additional forms listed for which we have not provided an explanation and those are:
ALTC-5042 (0707) - Right to Reduce Coverage and Lower Premiums Endorsement, for which there is no charge;
ALTC-5050 (0704) - Policy is Participating Endorsement, for which there is no charge; and
ALTC-5090 (VA) (0707) - Partnership Disclosure Notice (issued with every Partnership Policy) for which there is no charge.
ALTC-5019 (VA) (1001) - Contingent Nonforfeiture Benefit which is provided at no charge if the Optional Nonforfeiture Rider is not selected.

Changed Items:

No Form Schedule Items Changed.

Amendment Letter

Submitted Date: 03/19/2015

Comments:

We have attached rate pages with corrected labels as requested.

I also see that the Rate Rule Schedule tab lists some form numbers for which rates were not submitted.Those are form ALTC-5038 (0306), which was not released in VA and form ALTC-5039 (0306) and ALTC-5039 (VA) (0408), which only serve to make the CPI, CPI-U+1% and CPI-U+2% Offers automatically accepted. There is not charge for the Endorsement.

Changed Items:

No Form Schedule Items Changed.

Amendment Letter

Submitted Date: 03/13/2015

Comments:

We have revised the headings on the rate pages as requested and have attached those updated pages.

In addition, we would like to confirm that the statements made in your note to filer in regards to the Rate Summary are correct.

We trust these additional requirements will satisfy the Bureau's remaining requests.

Amendment Letter

Submitted Date: 03/12/2015

Comments:

Based on our phone conversation yesterday in regards to the Endorsement, we have added wording related to situations where the coverage lapses due to nonpayment of premium and the insured would be eligible for benefits based on the Contingent Nonforfeiture or Optional Nonforfeiture Benefit.

The new wording reflects the fact that such benefits are a dollar amount as indicated by the wording in the both the Contingent Nonforfeiture and Optional Nonforfeiture Riders which reference the amount available will be "100 percent of the sum of all premiums paid...or thirty times the Nursing Home Maximum Daily Benefit."

We trust this additional change will allow you to finalize your review.

Supporting Document Schedule Item Changes	
Satisfied - Item:	L&H Actuarial Memorandum
Comments:	The indicated rate increase on the Rate/Rule Schedule tab was calculated by targeting a 60% lifetime loss ratio and assumed that historical earned premiums could be increased so as not to recoup past losses. The calculation does not take into account policyholder behavior resulting from a rate increase such as shock lapse, reduced benefit option election, and adverse selection.

Amendment Letter

Submitted Date: 03/10/2015

Comments:

In response to the Bureau's request for an Endorsement which will reflect how an insured has chosen to reduce premium in order to mitigate the premium increase as well as a revised Contingent Nonforfeiture Beneift reflecting the recent revisions to the NAIC Model, we have added Endorsement ALTC-5070 (VA) (0115) and Contingent Nonforefeiture Benefit Rider ALTC-5019 (VA) (0115) to this filing. Please note: Endorsement ALTC-5070 (VA) (0115) attached here completely replaces the original version attached via the amendment on 2/25/15.

In conjunction with the two new forms, we are also submitting a Compliance Statement, Readability Certification and Statement of Variability.

Changed Items:

Amendment Letter

Submitted Date: 02/25/2015

Comments:

As requested in our phone conversation, I have attached a copy of the approved Optional Nonforfeiture Rider for this product. Please note that the requested Compliance Certification for Endorsement ALTC-5070 (VA) (0115), which will be used with this product as well as filings NWLT-128855883 and NWLT-128928316 is only submitted under filing NWLT-128855883.

In answer to your question regarding the use of Endorsement ALTC05070 (VA) (0115), we will use that for any changes that result in a premium reduction on Policy Series 4.0 and 5.0.

Supporting Document Schedule Item Changes	
Satisfied - Item:	L&H Actuarial Memorandum
Comments:	The indicated rate increase on the Rate/Rule Schedule tab was calculated by targeting a 60% lifetime loss ratio and assumed that historical earned premiums could be increased so as not to recoup past losses. The calculation does not take into account policyholder behavior resulting from a rate increase such as shock lapse, reduced benefit option election, and adverse selection.

Supporting Document Schedule Item Changes	
Satisfied - Item:	L&H Actuarial Memorandum
Comments:	The indicated rate increase on the Rate/Rule Schedule tab was calculated by targeting a 60% lifetime loss ratio and assumed that historical earned premiums could be increased so as not to recoup past losses. The calculation does not take into account policyholder behavior resulting from a rate increase such as shock lapse, reduced benefit option election, and adverse selection.
Attachment(s):	REVISED VA_AM_RS_5.0_20140314.pdf

Amendment Letter

Submitted Date: 03/06/2014

Comments:

We have made the requested corrections to the Round 1 rate tables. In addition, our actuary has created several examples related to your questions on the age 75 and above rate increase. Hopefully, those examples will provide the necessary clarity.

Subject:

SOV & Readability

Comments:

In reviewing this for final approval, I noticed minor fixes that need to be made that I overlooked yesterday. Please add to the SOV an explanation for the last checkbox regarding the waiting period/waiver of premium enhancement rider has been deleted. Please add to the readability certification the following required langauge from 14VAC5-110-60:

I also certify to the best of my knowledge and belief that the policy form(s) is in compliance with Section 38.2-3404 of the Code of Virginia and with the Rules and Regulations for Simplified and Readable Accident and Sickness Insurance Policies adopted pursuant thereto.

I apologize for not catching this earlier. I will need to reopen NWLT-128855883 so you can attach revised forms to that filing. When you're ready to do that, send a note to reviewer stating the filing needs to be reopen to attach revised documents. I will then reopen it and once the documents are attached, I'll close it by approving it again but with the same date as yesterday.

Again, thank you for your cooperation and support throughout this process. It has been a pleasure working with you.

Janet

Rate Schedules

Comments:

State: Virginia **Filing Company:** New York Life Insurance Company
TOI/Sub-TOI: LTC03I Individual Long Term Care/LTC03I.001 Qualified
Product Name: Long Term Care
Project Name/Number: 2013 Rate Increase/

Thank you for the resubmission of the rate pages with the form numbers. This is very helpful; however, the following form forms listed in the affected form numbers on the Rate/Rule Schedule are missing in the schedules:

ATLC-5006(VA)(1001)
ALTC-5019(VA)(1001)
ALTC-5030 (1001)
ALTC-5031 (1001)
ALTC-5037 (0306)
ALTC-5038 (0306)
ALTC-5039 (0306)
ALTC-5039 (VA) (0408)
ATLC-5042(0707)
ALTC-5050(0704)
ALTC-5060(0305)
ALTC-5090 (VA) (0707)

Please be sure the form numbers match exactly as approved in Virginia.

The other concern I have is the labeling between attained age and issue age for future purchase options. If I am reading the actuarial memorandum correctly it states that policyholders who reach attained age 75 will not receive a rate increase on any portion of the premium including future purchase option elections. Based on that, I need to understand these headings:

For attained age 75, there are two different headings as follows. What am I not understanding?

Page 1 - Attained Age 75 and Above Only - use age at issue (which I believe is correct)
Page27- Attained Age 75 and Above Only - use issue age for base and offers (which I believe is the saying the same thing as page 1, correct?)

For under attained age 75:

Page 35 - Below Attained age 75 - use age at issue (which I believe is correct)
Page 61 - Below Attained age 75 - use age at issue for base and offers (which I believe is saying the same thing as age 35, correct?

I apologize for my confusion but I want to make sure what we approve is what was intended. The Actuarial Memorandum may need to be revised to clarify this. I look forward to hearing from you.

Thanks.

Product Name: Long Term Care
Project Name/Number: 2013 Rate Increase/

I have spoken to Sheryl Babcock today regarding the rate schedules. We will need to have the existing rates and the proposed rates on the rate schedules. The reason is that rates are increasing based on issue age; however, rate increases will not apply to individuals with an issue age of 75 and older or an attained age of 75 and older. The following is an example of how rates will be applied:

Individual has an issue age of 50. At age 55 his current premiums will be increased based on the new increased rate schedule for issue age 50. If this individual purchases additional coverage (CPI-U), the cost for this will be based on his "attained" age on the new increased rate schedule (not his issue age of 50) UNLESS he is now 75 years old or older. In that case, the cost would be based on his issue age of 50 using the existing rate table.

I think our problem is determining how to label the rate schedules so that it is clear as to when to use which table when determining rates.
To clarify this, I suggest we change the labels on Originally Approved Rates as follows:

RATE TABLE 1 - Phase 1

RATES FOR INDIVIDUALS WITH ATTAINED AGE 75 AND OLDER - USE ISSUE AGE FOR BASE POLICY AND FUTURE OPTIONS

Change on the New Increased Rates to:

RATE TABLE 2 - Phase 1

RATES FOR INDIVIDUALS UNDER ATTAINED AGE 75 - USE ISSUE AGE FOR BASE POLICY AND ATTAINED AGE FOR FUTURE OPTIONS.

Please run this by Ms. Babcock and confirm I have captured this appropriately. This is suggested wording only and the company adjust the wording as needed.

Because of the changes in the filing, the Rate Summary must be updated. I will glad to amend update the form for you after confirming the following changes to be made:

annual premium per member after the increase - $2202

the average requested rate change per member(in VA) - This I need the company to review. I calculated the change to be 25.6% by following the method described in my 1/9/15 note to filler. I backed out the 40% for the ages under 50 and added in 35%.

maximum requested percentage rate change per member - 35%

And as a fyi, the Policy Endorsement form has been reviewed and there are no outstanding issues with the form.

I apologize for the confusion and continuing requests. Your cooperation is much appreciated.

Thank you.

Comments:

This is to confirm our conversation of today. Based on Sheryl Babcock's memo dated 1/20/15, the company is willing to reduce the rate increase 5%. Please update the actuarial memorandum, the rate/rule schedule in SERFF and provide updated rate pages. I will amend the Rate Summary the company previously provided.

If you have any question or concerns, please contact me at 804-371-9390.

Thank you.

Pending concern

Comments:

We are near the completion of our review of this rate filing; however, there still remains a concern with the company's use of the maximum valuation interest rate in the projections that support the proposed rate increase. At the time of pricing the company assumed a pricing interest rate of 6.25% rather than the lower maximum valuation interest rate. The result was lower initial premiums. We question the company's use of a significantly lower pricing assumption now that it is requesting a rate increase since it results in higher premiums than if the pricing interest rate was used. Please reply.

If you have any questions or concerns, please feel free to contact me at 804-371-9390.

Verification of headcount and Virginia rate increase

Comments:

Thank you for the changes made in the Rate Summary. There are two inconsistencies we still need to resolve on the Rate/Rule Summary. According to the filing, the overall percentage rate increase is 22.3% with 3782 policyholders affected. Our actuary believe the overall rate increase is 26.6% with 3381 policyholders affected. He is basing his information on Exhibit XII submitted on 10/31/13. According to that exhibit there are 3381 policyholders. To determine the overall increase, he multiplied the premium for issue age >50+ by 40% and the premium at issue age 50+ by 25.1%. He added those totals to the premium for attained age 75+ and divided that by the total premium of $5,880,875 resulting in a 26.6% increase.

Please review this and update the Rate/Rule Schedule and Rate Summary if appropriate. If the company does not agree, please provide clarification.

I would have called you about this but I felt it was probably easier to understand if written. If you have any questions, please contact me at 804-371-9390.

Thanks for your help.

NAIC Bulletin

Comments:

According to the March 31, 2014 response from Sheryl Babcock, the company indicates it is using the standard NAIC Model Regulation trigger to offer contingent benefit upon lapse on all policies, regardless of whether they are post -rate stability policies or pre-rate stability policies. For clarification, please confirm the standard regulation to which she is referring is NAIC's Executive/Plenary bulletin adopted on December 18, 2013.

The bulletin requires clear disclosure addressing the guaranteed renewable nature of the policy and that the insured should understand that premiums may increase again in the future. The letter addresses the second half of this requirement but does not provide any disclosure regarding guaranteed renewability. The letter should be amended accordingly.

Since this rate increase may be approved in a series of schedule rate increase and the sum of all scheduled rate increase would ultimately trigger the offering of the contingent benefit upon lapse, please confirm the company will include the contingent benefit upon lapse at the time of each scheduled increase.

We appreciate your patience as we request additional information. The state of Virginia is very sensitive to feedback and comments we are receiving from our consumers and the strong national interest focused on rate increases for this product. As a result, our reviews are requiring more time and information to evaluate the filing before recommending approval.

Rate Schedules

Comments:

In reviewing the rate pages a final time, it appears I may have confused the issue. My understanding is that the rate increase applies only to those individuals with an attained age under 75. Future options are based on attained age.

Right now, we have rate pages that reflect the 40% rate increase for ages under 50, 25.1% for 50 to 75, and 0% at age 75. These rates would apply to anyone with an attained age under 75, correct?

What appears to be missing are rates for those individuals with issue ages under 75 and have an attained age 75 and above. Those individuals keep their current rates, correct?

If so, we need to revise the heading on the rate schedules attached on 3/14/14 to state "Below Attained Age 75/Use Age at Issue. Future Options based on attained age."

We then need rate schedules for rates that apply to those individuals that are "Attained Age 75 and Above Only/Use Age at Issue." These would be the current rates.

If this is not correct, please call me at 804-371-9390.

policyholder counts & Actuarial Memorandum

Comments:

Per my phone message of today, please update the number of policyholders affected by this increase on the Rate/Rule Schedule in SERFF under Company Information. It is showing 3381. According to the 3/17/14 response, the count as of 2/28/14 is 3782.

I reviewed the rates again and realized that the first page of the rates start at page 35. I had looked at the end of the attachment which had at the bottom "page 66 of 68" and thought a mistake had been made. I'm glad to say that is not the case!

I do have a concern about Section 17 of the Actuarial Memorandum. It was my understanding the company had agreed to a zero increase for issue ages 75 and above. And that seems to correspond with the rate schedules attached to the filing. The memorandum states the company is requesting a 40% rate increase for policyholders with an issue age under 50, 25.1% rate increase for policyholders with an issue age 50 and over, and a 0% rate increase for policyholders with an "attained" age at 75. Should this not be 40% for under issue age 50, 25.1% for issue age 50 thru 74, and 0% for issue age 75. The attained age only comes into play when future options are purchased.
Please amend this section of the memorandum to accurately reflect the requested rate increase.

Thanks for your help!

Rate Summary Part I

Comments:

The State Corporation Commission has an outstanding order to the BOI to obtain comments from the general public regarding long term care rates and proposed amendments. The BOI takes this very seriously, and based on both written and verbal comments received from our consumers, we have asked our insurers to now complete the Rate Rule Summary which the company did. We realize this is a new exercise for you; however, this one way to provide our consumers a better explanation as to why a rate increase was requested and what were the contributing causes.

In light of this, please expand the narrative in the Rate Summary so that any person reviewing this filing would clearly understand the reason for the rate increase and its driving factors. Remember, the audience may not be someone familiar with insurance terms and explanations may be needed.

NAIC Bulletin

Comments:

This is to confirm our phone conversation of March19, 2014. Attached is a NAIC's Executive/Plenary bulletin adopted on December 18, 2013.We have now added this to our review process and ask that the company advise if this filing is or is not consistent with the recommendations. Please provide details that support your response.

MODEL BULLETIN

DATE: [Insert Date]

TO: All Licensed Insurers Writing Long-Term Care Insurance

FROM: [Insert Name & Title]

RE: Announcement of Alternative Filing Requirements for Long-Term Care Premium Rate Increases

---

Effective *[insert date three (3) months after issuance of this bulletin]*, the following guidelines will be used in the review of pre-rate-stability and post-rate-stability premium rate adjustment filings for long-term care insurance policies. The intent of this bulletin is to address rate increases for long-term care insurance policies currently in force, in particular pre-rate-stability policies.

For purposes of this bulletin, "rate stability" is defined as provisions contained in the 2000 NAIC Long-Term Care Insurance Model Regulation (Model 641) as adopted by [*insert state name]* on *[insert date of adoption of Section 20 et al]*. Policies with effective dates prior to *[insert rate stability adoption date]* are referred to as "pre-rate-stability" policies, and policies with effective dates on or after *[insert rate stability adoption date]* are referred to as "post-rate-stability" policies.

Drafting Note: States may need to consider whether their state rules allow these provisions to be issued as a bulletin, or whether some or all of these provisions may require adoption through other state regulatory procedures.

Actuarial Assumptions for Establishing Rate Increase Requests:

When rate adjustments are filed with the [Department] for both pre-rate-stability and post-rate-stability policy forms, it is the intent of the [Department] to work with the insurer, to the extent appropriate, to review the reasonableness of the set of assumptions by which to determine the rate increase(s) necessary to reach adequate ultimate premiums and that can be used to monitor developing experience. When disclosing assumptions to the [Department], the insurer will provide the resulting rate revision request at the same time so that the [Department] may include this in their review.

In assessing these assumptions as proposed by the insurer, the [Department] may use the services of an independent actuary and, if appropriate under state law, may charge the insurer for the costs of these services. The [Department] may also accept a review done by or for another state or states for the same or substantially the same policy form where any differences in benefits and premiums are not material and such review was completed within eighteen months of the date of the rate adjustment filing and such review substantially complies with the [Department]'s rate review standards.

The assumptions will be consistent with the following:

1. All present and accumulated values used to determine rate increases shall use the maximum valuation interest rate for contract reserves. The actuary shall disclose as part of the actuarial memorandum the use of any averages.

2. All accumulated values used to determine rate increases shall use the actual experience of the product in as close a manner to that used in the original development of rates as possible. This is not intended to preclude the inclusion of multiple policy forms into one rate increase determination if such pooling increases the credibility of the combined accumulated experience.

3. All present values calculated to determine rate increases shall use reasonable estimates of future premium payments and claims payments. Such estimates are to be part of the assumptions as anticipated above and, for post-rate-stability policies this would include a margin for moderately adverse experience, while for pre-rate-stability policies, this would be based on best estimate assumptions for the future lifetime of the policies, including potential margins.

Drafting Note: While not limiting each state's authority with respect to the approval of rate increases, the intention of the development of a set of assumptions is to increase the uniformity and fairness of premium rate schedule changes for all policyholders regardless of the state of issue of each policy or the current state of residence.

Approval of Rate Increases:

In approving rate increase requests for both pre-rate-stability policies and post-rate-stability policies consistent with the assumptions described in the section above, the [Department], with the concurrence of the insurer where such concurrence is appropriate, will determine ways in which the following may be included to benefit policyholders:

1. The [Department] may approve a single increase of the requested amount and the insurer agrees to not implement future rate increases on each subject policy for three years from the date of implementation of the rate increase for each policy form; or

2. In lieu of a single increase, the [Department] may approve a series of scheduled rate increases that are actuarially equivalent to the single amount requested by the insurer over the lifetime of the policy. The entire series would be approved at one time as part of the current rate increase filing. For pre-rate-stability policy forms, the approval includes a three-year monitoring provision similar to that currently applicable to post-rate-stability rate increases to allow modification of later increases that were not appropriate based on the experience following the initial rate increase. When determining the rate comparison for new business, forms subject to a series of increases shall not be included.

Requirement to Administer Contingent Benefit Upon Lapse:

For pre-rate-stability policies, the [Department] will require the implementation of the contingent benefit upon lapse[1] as outlined below, as a condition of approval of a rate increase for a block of business for which the contingent benefit upon lapse is not otherwise required. The contingent benefit upon lapse is already required for post-rate-stability policies.

For both pre-rate-stability and post-rate-stability policies, if the rate increase is approved in a series of scheduled rate increases and the sum of all scheduled rate increases would ultimately trigger the offering of the contingent benefit upon lapse, the insurer will be required[2] to include contingent benefit upon lapse at the time of each scheduled increase.

For policies or certificates which have reached their twentieth duration, the [Department] may require the insurer to provide the contingent benefit upon lapse[3] without reference to the table of trigger percentages. For policies which have not reached their twentieth duration, any percentage value in excess of 100% will be reduced to 100%.

The insurer shall notify policyholders and certificate holders of the contingent benefit upon lapse when required by the [Department] in conjunction with the implementation of a rate increase.

Policyholder Notification of Premium Increase:

The insurer shall file with the [Department] the premium increase notification letter to policyholders at the time of the premium rate increase for informational purposes. The insurer shall clearly disclose to policyholders the following elements:

1. the amount of the premium rate increase requested and implementation schedule (e.g., single premium increase applied or phased in a series of premium increases);
2. available benefit reduction/rate increase mitigation actions;
3. clear disclosure addressing the guaranteed renewable nature of the policy/coverage and that the insured should understand that premium rates may increase again in the future; and
4. offer of contingent benefit upon lapse, if applicable.

Application of New Loss Ratio Standards:

The [Department] will require the insurer to limit the increase based on the use of a dual loss-ratio approach for pre-rate-stability policy forms. The recommended loss-ratio would be:

[1] A company may provide alternative nonforfeiture benefits in lieu of the benefit required by the contingent benefit upon lapse, if approved by the [Commissioner].
[2] Any such additional requirements, with respect to contingent benefit upon lapse, shall not change the determination of whether or not a majority of policies or certificates are eligible for contingent benefit upon lapse.
[3] A company may provide alternative nonforfeiture benefits in lieu of the benefit required by the contingent benefit upon lapse, if approved by the [Commissioner].

- the greater of 60% or the lifetime loss ratio used in the original pricing, applied to the current rate schedule on the effective date of these new requirements; plus
- 80% applied to any premium increase that is filed after that date on an individual policy form; or
- 75% applied to any premium increase that is filed on a group policy form.

For post-rate-stability policy forms, the current loss-ratio standards are unchanged.

Consideration of New Approaches:

At the request of the insurer, the [Department] may also consider
other options which may be made available to insureds which may mitigate the impact of the rate increases on the insured population or alternative actuarial methodologies relating to the rate increase. The insurer shall provide an explanation and demonstration on how such methodology is actuarially justified and/or how such new mitigation option may reasonably benefit insureds. No alternative method/approach may be used until it has been accepted by the [Department].

Rate Schedules

Comments:

Thank you so much for your assistance in revising the rate pages. In reviewing them again, I realized the two sets, under age 50 and over age 50, reflect the same rates and I apologize for that duplication. According to my conversation with Sheryl Babcock, the company is not applying a rate increase to issue ages 75 and over and the rate pages reflect that. Unfortunately, the heading on the rate pages is no longer applicable and may confuse someone reviewing the filing. I think, and if you agree, those headings should be removed and only state that future options are based on attained age. I think it could be in smaller print and probably more appropriate under "New Increased Rates - Phase 1, 2, or 3. And as a result of this change, we would only need one rate page per phase.

Since the company has decided to not apply a rate increase issue ages 75 and above, the Actuarial Memorandum needs to be changed slightly under item 17 to reflect this.

Again, I apologize for all the extra work this has created. If there is anything that you question or suggest be done differently, please feel free to call me at 804-371-9390.

Thanks,

Janet

Rate Schedules

Comments:

It would appear the rate increase is based either on issue age or attained age or a combination of both. For any individual with an issue age under 50 and an attained age below 75, the rate increase is 40%. If the issue age is 50 and older and the attained age is below 75, the rate is is 25.1%, and for anyone regardless of issue age who now has an attained age of 75, the increase is 0%. Is that correct?

In addition, the rate increase applies to any future purchase option election for anyone under the age of 75 at their first policy anniversary on or after the rate increase and 0% for any policyholder over 75. Is that correct?

As I mentioned in our phone call today, please provide a breakdown of how many policyholders would receive the 40% rate increase, the 25.1% rate increase, and the 0% rate increase.

At this point, it appears we will need rate schedules for each of the above situations as noted below:

Issue age under 50 and attained age below 75 - 40% with bolded statement indicating future options based on attained age
Issue age age 50 and above and attained age below 75 - 25.1% with bolded statement indicating future options based on attained age
Attained age 75 and above - 0% including future elections

And each of these will have 3 sets of rates for each phase in period.

Please verify my understanding is correct. Thanks!

Comments:

Janet,

I just talked to our actuary and she is correcting the Phase I rate pages to remove the 1/1/14 effective date.

In regards to the rates for ages 75+, she is creating a numerical example to demonstrate how this works that may help provide the clarification needed. I expect to have the changes later this morning and will submit them as an amendment to the filing.

Jeanette

Attach a brief narrative to summarize the key information used to develop the rates including the main drivers for new or revised rates.

This document is intended to help explain the rate filing and it is only a summary of the company's request. It is not intended to describe or include all factors or information considered in the review process. For more detailed information, please refer to the complete filing.

Explanation of Assumptions and Rate Increase

The maximum requested percentage rate change per member: 35%, which will be phased in over three years, at % of 15%, 10% and 10%, computed on a simple basis.

Long-term care insurance is a relatively new industry with only a few decades long history. Based on limited historical experience, it has been difficult to project future claims and price products appropriately. Over time, this resulted in the industry experiencing higher than expected claims relative to the assumptions made when the products were originally priced. We began offering this product in1988 and since entering this market, we have never raised rates on existing policies. However, we have seen a gap develop between the original pricing assumptions and our actual experience and now find it necessary to adjust premiums to better align with the actual experience of the products.

Long Term Care Insurance Rate Request Summary
Part 2 –To Be Completed By Bureau of Insurance

Company Name and NAIC Number: New York Life Insurance Company

SERFF Tracking Number: NWLT-128855863

Disposition: Approved

Approval Date: March 26, 2015

Revised Rates

Average Annual Premium Per Member:	$2,122
Average Requested Percentage Rate Change Per Member:	**18.0%**
Minimum Requested Percentage Rate Change Per Member:	0%
Maximum Requested Percentage Rate Change Per Member:	35%
Number of Policy Holders Affected:	**3381**

Summary of the Bureau of Insurance's review of the rate request:

New York Life Insurance Company (the Company) requested an increase which varies by issue age according to the following table. The rate increase will be implemented over a 3 year period as follows.

Age Criteria	**Requested Increase**
Issue Age <50	35% (15% in year 1, and 10% in years 2 & 3)
Issue Age 50+	20.1% (10% in year 1, 5.1% year 2, and 5.% in year 3)
Attained Age >74	No rate change

The same increase is being requested nationwide for these individual policies that are still being sold. The overall effect is a rate increase of 18.0% in Virginia, and will affect approximately 3,381 policyholders in Virginia.

This is the first rate increase on this block of business; although the company did increase the rates for newly issued policies in 2012. This rate increase does not impact those policyholders. The requested rate increase is capped by the premium rates which apply to new insureds.

The rate increase was reviewed under the requirements of 14VAC5-200-150 for those policies issued prior to October 1, 2003 and 14VAC5-200-153 for those policies issued on or after October 1, 2003. Under 14VAC5-200-150, the company had to demonstrate that after the proposed rate changes both the future and lifetime loss ratios would be no less than 60%. The Bureau's analysis indicated that the anticipated future loss ratio is projected to be 63.6% and the lifetime loss ratio is projected to be 71%.

14VAC-200-153 requires that the rate increase cannot be so large that the resulting loss ratio is less than a weighted average of 58% and 85%. The weights are the present value of the original premiums and the present value of the incremental premiums. The weighted average depends on both the timing and the amount of all increases. For this block of business, the present value of original premium is $2.351 million and the present value of the incremental premiums is $304 million. The weighted average of the 58% and 85% required loss ratios is 61.1%. The actual projected lifetime loss ratio is 78.7%. Thus the expected lifetime loss ratio exceeds the minimum.

The Company requested the rate increase because policy terminations have been much lower than assumed in the original pricing. When policyholders terminate at a lower rate, there are many more policyholders continuing to the high claim costs in later years. The Company has found that lapses have been only 0.75% as compared to the 2.00% expected in pricing. This is a significant difference as the effect is compounded over many years. Even with the full requested rate increase, the Company expects to pay out more than 65% of the premium in claims which is greater than the original expectation that the Company would pay out 60% of the premium in claims.

This document is intended to explain the decision made by the Bureau of Insurance and it is only a summary of the Bureau's review. It is not intended to describe or include all factors or information considered in the review process. For more detailed information, please refer to the complete filing.

Comments:

Due to the 5% reduction in the rate increase, the data in the Rate/Rule Schedule and Rate Summaries needed to be updated. The company provided the attached spreadsheet supporting the average increase of 18%.

Importance: High

Janet,

I just submitted a revised Actuarial Memorandum along with a brief explanation from Sheryl. She also asked that I send you the attached spreadsheet showing
how she calculated the 18% and the average premium of $2,122.

Please let us know if you have any further questions.

Jeanette

In reference to our conversation today, I need to again verify the information that should be reflected on the Rate Summary. After review, I believe my previous calculation was in error.

For the purposes of the Rate Summary, the average requested percentage rate change per member should be based on Virginia rather than nationwide data. Prior to the rate reduction, we believed that number to be 26.6% compared with nationwide average being 25.3%. In recalculating this, it would appear that number should now be 17.1%. According the Actuarial Memorandum dated 3/2/15 the nationwide average would be 17.7%, the average premium would be $2047 and the policyholder count is 3782.

Attached is an Excel spreadsheet showing how I came up with the 17.1%. Based on the information provide in Exhibit XII, I backed out the 40% and 25.1% rate increases and then added back the 35% and 20.1% revised increases. It is fairly straightforward. The only concern I have is the policyholder count on this exhibit is 3381 which is lower than the current count of 3782 and now the Virginia average increase is lower than nationwide.

Please review and confirm the company is satisfied with this information. If possible, an updated Exhibit XII would be helpful in reviewing this data.

Please understand this information will be public and should be as accurate as possible.

I look forward to hearing from you soon. [attachment "NWLT863.xls" deleted by Jeanette Slabaugh/NYLACOR]

Standalone policies

Comments:

Confirmed with the company's actuary - Jeanette Slabaugh - these LTC forms were issued as standalone policies and were not attached as riders to a life or annuity contract.

She also stated that individuals 75 and over are getting a zero increase, however, if someone who currently has a policy and at age 75 which to purchase a rider, that person would pay the higher premium.

Summary of the Bureau of Insurance's review of the rate request:

The Company is requesting a rate increase because key assumptions used in pricing have not been met. One assumption is the rate at which policyholders terminate. Terminations can arise from deaths and lapse. The Company has experienced low terminations which is unfavorable experience. This is offset by favorable results in the expected claims. Claims have actually been about 25% better than expected.

The terminations are a key element for two reasons. The product is priced with level premiums, even though claims increase with advancing age. If too many policyholders continue their coverage, there will be much higher claims in the outer years.

In the early years the group of policyholders is prefunding the benefits to be paid in later years. In the early years the premium exceeds the expected claims. A reserve is established in order to fund the claims in the later years, which are very much higher than the premiums in the later years.

The pricing anticipates that policyholders will terminate at a given rate. The reserve on policyholders who terminate becomes available to policyholders who continue their coverage. This transfer of reserves from terminating policyholders to policyholders who

This document is intended to help explain the rate filing and it is only a summary of the company's request. It is not intended to describe or include all factors or information considered in the review process. For more detailed information, please refer to the complete filing.

continue allows the Company to develop premium rates which are much lower than they would otherwise be.

In summary, when policyholders terminate at a lower rate

- there are many more policyholders continuing to the high claim costs in later years
- there is not as much reserve being released to the group of continuing policyholders, and
- there is a larger group of continuing policyholders that need this reserve release.

The Company has found that lapses have been much lower than anticipated in the original pricing, especially in the later years where there have been lapses of only 0.75% as compared to the 2.00% expected in pricing. This is a significant difference as the effect is compounded over many years.

Even with the full requested rate increase, the Company expects to pay out more than 65% of the premium in claims. Compare this to the original expectation that the Company would pay out 60% of the premium in claims.

This document is intended to explain the decision made by the Bureau of Insurance and it is only a summary of the Bureau's review. It is not intended to describe or include all factors or information considered in the review process. For more detailed information, please refer to the complete filing.

Re: Actuarial Review for the Virginia Bureau of Insurance
New York Life Insurance Company
Long Term Care Rate Increase Filing
Policy Forms ILTC-5000 and INH-5000 as Generation 5.0
SERFF# NWLT-1288855863

Dear Bob:

We have completed our preliminary review of this filing for a long term care rate increase. New York Life Insurance Company (the Company) is requesting an average 22.3% rate increase.

Recommendation

At this time we are recommending that the Bureau **not approve** the rate filing. We have a number of questions and requests.

Questions

1. What other long term care business – group and individual – does the Company have in force? What is the reason for separating these forms from the other forms?

2. Please provide the attachments to the actuarial memorandum in Excel format, with working formulas. These are Exhibits II through XII. Please expand Exhibit XII to show the annual premium in force prior to the rate increase.

3. Please expand the results of the A/E studies. Provide the analysis in an Excel workbook.
   a. Lapses – Please include the exposure and the count of expected lapses. Please confirm the expected is based on the revised assumptions.
   b. Mortality – Please include the exposures and the count of expected deaths. Please confirm the expected deaths are based on the revised assumptions and they reflect the mortality selection factors. What are the mortality selection factors? In addition to the policy year analysis provide two other analyses – one by gender and one by attained age groups. We are trying to confirm the fit is good across several key parameters.
   c. Morbidity - Please include the exposures and the count of expected claims. Please confirm the expected claims are based on the revised assumptions and they reflect the morbidity selection factors. What are the morbidity selection factors? In addition to the calendar year analysis provide three other analyses – one by gender, one by attained age groups and one by policy duration. We are trying to confirm the fit is good across several key parameters.

4. Please provide a brief description of how the revised morbidity compares to the original morbidity assumption. We are seeking a measure of relative value. Please describe if the changes are driven by incidence or continuance or both. If both, give a ballpark estimate of how much of the change is driven by incidence vs. continuance.

5. Please describe how you arrived at your 3 tiers of rate increases:
   a. 0% for insureds with an attained age >74
   b. 40% for insureds with attained age <75 and issue age <50
   c. 25.1% for insureds with attained age 75 and issue age 50-74
   d. All increases are capped at the rates recently approved and offered to new insureds.

   What was the thinking behind the 40% and 25.1%? How frequently do the caps of the current rates come into play? Are any of the current rates actually less than the prior rates for specific cells?

6. We understand that if an insured is currently less than age 75 and purchases additional coverage through the CPI-U option, he will pay at a higher rate. What happens to the same insured who, several years from now reaches age 75 and wishes to purchase additional coverage? Does he pay at the increased rate or the original premium rate?

7. The actuarial memorandum states the projections recognize benefit buy-downs of 1.5%. Is there any related anti-selection associated with the buy-downs in the projections?

8. The actuarial memorandum states the Company is absorbing the cost of exempting policyholders over attained age 74 from the rate increase. Please quantify this amount. Exhibit II shows the lifetime loss ratio with the rate increase is 57.9%. What would the lifetime loss ratio be if these older policyholders were not exempt?

9. In the original pricing of this form, what was the target loss ratio?

10. 14 VAC5-200-153B2 requires statements that

    a. if the rate increase is granted and the assumptions are realized, then no further rate increases are anticipated; and
    b. the premium rate filing is in compliance with this section

    Please provide a revised actuarial memorandum with these required statements.

11. Please provide the following distribution of the nationwide inforce business:
    a. By gender
    b. By issue year
    c. By inflation option
    d. By attained age
    e. By marital status

    To clarify, we are looking for five separate distributions, not a 5-dimensional distribution.

12. Does the Company have any limited pay policies? If so, please provide a distribution of business by the various payment options. Please confirm the premium payment periods were properly reflected in the projections.

13. Does the Company have any rate guarantees on this block? If so, please provide a distribution of business by the various length of the rate guarantees. Please confirm the rate guarantees were properly reflected in the projections.

14. How are waived premiums handled in the financial exhibits? Are they a reduction to premiums or an addition to claims? Are they handled consistently between the historical period and the projection period?

Sincerely,

Re: Actuarial Review for the Virginia Bureau of Insurance
New York Life Insurance Company
Long Term Care Rate Increase Filing
Policy Forms ILTC-5000 and INH-5000 as Generation 5.0
SERFF# NWLT-128855863

Dear Bob:

New York Life Insurance Company (the Company) is requesting an average 22.3% rate increase. We have reviewed the Company's response and we have some additional questions and requests.

Recommendation

At this time we are recommending that the Bureau **not approve** the rate filing. We have a number of questions and requests.

Questions

1. The experience and projections need to be split between pre and post rate stabilization projections. We understand that only 2 policies were issued in Virginia prior to the rate stabilization date of October 1, 2003. But the same is not true for nationwide. Please resubmit Exhibits II through XII in Excel format with the pre and post rate stabilization split.

2. Demonstrate the experience under pre-rate stabilization meets the 60% loss ratio requirement. Demonstrate the experience under the post rate stabilization meets the 58% / 85% loss ratio requirement. Provide the annual "best estimate" active life reserve balances for the nationwide pre rate stabilization policies only.

3. Provide the same distributions of business previously provided, but split between pre and post rate stabilization policies.

4. The revised lapse assumption varies by issue age, policy duration and marital status. Please provide an Actual to Expected study with the same variables. Show the exposure, actual lapses and expected lapses for each cell. We appreciate there will be volatility in those results. Does the lapse study include the experience of these forms only or does it include other forms? Is it experience from inception or is it limited. How does the revised lapse assumption compare to the lapse assumption used to recently re-price the product?

5. Is the revised mortality assumption the 1994 GAM basic or static table? Please confirm there are no adjustments other than the selection factors and mortality improvements. Your response state the mortality selection factors were in Attachment 1. We saw the morbidity selection factors, but not the mortality selection factors, unless you are using the A/E ratios as selection factors. Please provide the mortality selection factors. Does the Actual to Expected analysis include the experience of these forms only or does it include other forms? Please give a more complete description of the mortality improvement assumption. How does the revised mortality assumption compare to the assumption used to recently re-price the product?

6. The actual to expected morbidity analysis shows experience back to 1991. Confirm our understanding that the actual to expected analysis is based on more experience than just this form. Does it include all Company experience or just certain subsets? Please describe the source for this analysis. Do you expect the morbidity to be uniform across the various blocks of business or has the underwriting changed over time?

7. Your response to the question on unfair discrimination shows 26 states have approved the rate increase. Please provide a revised Exhibit XII which shows the approvals by state. Provide this in an Excel workbook. Include the inforce premium before the increase, by state and by the 3 increase categories of issue age < 50, issue age > 50 and attained age >74.

8. Do the projections include any future purchases under the inflation option?

9. Do the projections include any premium reductions due to shock lapses beyond the 2.4% benefit buy-down?

Sincerely,

Anthony G. Proulx

Re: Actuarial Review for the Virginia Bureau of Insurance
New York Life Insurance Company
Long Term Care Rate Increase Filing
Policy Forms ILTC-5000 and INH-5000 as Generation 5.0
SERFF# NWLT-128855863

Dear Bob:

We have completed our review of this filing for a long term care rate increase. New York Life Insurance Company (the Company) is requesting an increase which varies by issue age according to the following table:

Age Criteria	Requested Increase
Issue Age <50	40%
Issue Age 50+	25.1%
Attained Age >74	0%

The same increase is being requested nationwide. The overall effect is a rate increase of 25.3% nationwide and 26.6% in Virginia.

Recommendation

We recommend that the Bureau approve the requested rate increase. Our review of this filing was performed according to the provisions of 14VAC5-200. Applicable Actuarial Standards of Practice were considered, including Actuarial Standard of Practice No. 18, "Long-Term Care Insurance" and Actuarial Standard of Practice No. 8, "Regulatory Filings for Rates and Financial Projections for Health Plans".

We sent two emails to the Company requesting additional information. The Company's responses clarified issues and provided greater support for the requested increase. The Bureau was involved in all correspondence between us and the Company.

Background

The Company is requesting a rate increase which varies by issue age and attained age. Insureds with an attained age of 75 and older receive no rate increase. Insureds with an issue age under 50 and an attained age under 75 receive a 40% rate increase. Insureds with issue age of 50-74 and an attained age under 75 receive a 25.1% rate increase. All rates are capped by the inforce rates for new insureds.

There have been no prior rate increases in any jurisdiction. There are 3,381 policies inforce in Virginia with an annualized premium of $5.9 million. Of these, 142 policies with an annualized premium of $.5 million are over attained age 74 and thus would receive no increase. These are individual policies which are guaranteed renewable for life. The Company is basing the requested increase on their nationwide experience. This is appropriate as the Virginia experience has little credibility. The Virginia in force lives and premiums are about 4.4% of the nationwide in force. Additionally, there is less than $.5 million of historical claims in Virginia Their claim experience is not meaningful.

This is an open block of business. New premium rates were recently approved for new insureds under these policy forms. The rate increase applies only to insureds who purchased coverage prior to the new rates. This block of business was sold nationwide and in Virginia beginning in 2002. All but 2 policies sold in Virginia are post rate stabilization (effective October 1, 2003 in Virginia) policies. There have been no prior increases on this business.

At our request, the Company resubmitted their experience and projections, with a split between pre and post rate stabilization. In terms of the loss ratio requirements, we reviewed the blocks separately. In terms of revised assumptions, we reviewed the blocks on a combined basis.

Analysis - Methodology

Our approach was to a) review the filing materials, b) check the calculation of the lifetime loss ratio, c) test the sensitivity of the lifetime loss ratio to the interest discount rate, d) review the experience studies which support the revised assumptions, e) review the projections for reasonableness and d) analyze the current increase and cumulative increase in Virginia relative to other states.

Credibility

This is a large block of business with more than $545 million of earned premium thus far. In general, the Company uses their nationwide experience from their entire block of individual long term care products to develop revised assumptions. We think this is appropriate as it uses more data and increases the credibility. Also, there is no reason to expect geographic differences in experience.

Our credibility measure is based on a letter from The American Academy of Actuaries Long-Term Care Reserving Work Group to the Accident and Health Working Group of the NAIC Life and Health Actuarial Task Force which addresses the issue of credibility. In that letter, the working group recommends 1082 claims for full credibility. The 1082 claims ensure that the observed claims are within ± 5% of the true claims with 90% confidence. (The same analysis shows that 2,654 claims will ensure that the observed claims are within ± 5% of the true claims with 99% confidence.)

The Company's lapse study has 14,535 lapses. The mortality study includes 8,771 deaths. The morbidity study includes 5,696 actual claims. All three studies meet the 1,082 threshold. The Company experience is fully credible.

Morbidity

We reviewed the Company's morbidity study. The Company measured their experience against the Milliman USA Long Term Care Guidelines. This is a proprietary source, but it is based on extensive industry experience and it recognizes various underwriting standards. We are comfortable with this source. The Milliman Guidelines were adjusted for Company experience. The Company experience includes 5,696 claims with an incurred amount of almost $353 million. The study includes only the business of the Company's 4.0 and 5.0 series. In their response, the Company

explained the grouping is appropriate as “the product features are very similar and also due to a lack of claim credibility in the 5.0 series”. We agree it is appropriate to use the combined experience of these forms as it lends greater credibility to the results.

On our request, the Company provided Actual to Expected Analyses. The overall A/E ratio is 101.0% by claim count and 99% by incurred amount. This is an excellent fit. The first analysis was by calendar year. For the calendar years with more than 100 claims, the ratio varies from .76 to 1.17. This is a fairly narrow range and shows consistent results across calendar years.

The second analysis was by gender. The overall A/E ratio for males is 109% and for females is 96%. Again this suggests a reasonably good fit. The data allowed additional analyses by issue age and policy duration. The Company used 7 age brackets. The A/E ratios range from 96% to 101%. This is an excellent fit. One bracket, ages 92+, had no claims. The results by policy duration are a little more volatile with values ranging from 72% to 115%.

We are satisfied the new morbidity assumption fits the historical data very well across multiple variables. It should provide reasonable incurred claims in the projections.

Mortality

We reviewed the results of the Company’s Actual to Expected mortality analysis. The Company is using the 1994 GAM with selection factors as their new assumption. The 1994 GAM is a table often used for LTC products. The revised assumption is based on Company wide experience. This is appropriate as it yields greater credibility and there is no reason to expect mortality to vary by block of business. The assumption includes mortality improvements from 2002 to 2011 using scale AA. This scale is often used in conjunction with the 1994 GAM. Inclusion of the improvements is a refinement which gives greater stability to the study. At our request the Company provided analysis by policy duration, attained age and gender. Each of these analyses shows a very good fit of the new assumption to the actual historical experience. The overall Actual to Expected ratio is 100%. By policy duration, the values range from 93% to 104%. By attained age group the values are from 92% to 109%, but for ages under 60 the ratio is 133%. This cell has 550 actual deaths and using our credibility formula, it has 71% credibility. This was the only outlier. By gender, the fit is 99% for females and 101% for males.

We are satisfied the new mortality assumption fits the historical data very well across multiple variables. It is a reasonable assumption to use in the projections. The revised mortality assumptions are on a best estimate basis. The mortality assumption used in the recent re-pricing for new insureds was consistent with these assumptions but with a reasonable margin for adverse deviation.

Lapses

We reviewed the Company's lapse assumption. The Company's revised assumption varies by issue age, duration and marital status. The data in the actuarial memorandum showed historical experience by duration only. We requested an additional analysis which the Company provided.

The Company's revised lapse assumption fits the actual experience very well. By duration, the Actual to Expected ratios vary from .90 to 1.05 (with a single outlier). The overall ratio is 0.98. This is a very good fit. The lowest A/E ratios were in cells with limited exposure and fewer than 150 actual lapses. These are cells with credibility issues, so a less than perfect fit is not unexpected. By issue age groups, the experience also fits well. The ratios range from 0.97 to 1.05.

The Company also uses marital status as a variable in their lapse study. The revised lapse assumption is a table which varies by issue age and policy duration. For single lives a factor of 1.25 is applied. For married lives, a factor of 0.90 is applied. We reviewed their experience by marital status. The results are volatile. In aggregate the experience ratios are 1.40 for single and .81 for married. We focused on policy durations 5 and later. Here the experience factors are 1.22 and .90. The use of 1.25 and .90 are reasonable approximations to use.

There is no recognized lapse table for long term care insurance. However, in our experience in reviewing long term care rate increase filings, the ultimate lapse rate is generally in the range of 0.75% – 1.50%. The Company's ultimate lapse rate is 0.65% for all issue ages beginning in the 13^{th} duration. Again, this is well supported by the Company experience.

The revised lapse assumption is consistent with the lapse assumption used in the recent re-pricing of this block for new insureds.

Financial Projections - General

The projections include benefit buy-downs which average 1.5%. The Company has assumed no related anti-selection with these buy-downs. The financial exhibits exclude the policies which were issued under the new rating structure for new insureds. This is inappropriate because the rate increase needs to be based on the total experience of the form. However, the Company explained that the rate filing has historical experience through the end of 2011, before any of the policies under the new rating structure had been issued.

We reviewed the financial projections. The Company stated the revised assumptions are current best estimate assumptions and do not include any provision for moderately adverse experience. The exception is morbidity, which has a 5% margin for adverse deviation. We believe the projections should be on a best estimate basis, so we calculated loss ratios with and without this margin. The

projections are sensitive to three key assumptions – slope of the annual loss ratios, persistency of the block and the interest discount rate.

The Company has neither morbidity nor mortality improvements in their projections. In our review work, we see that about half of the companies use a morbidity and mortality improvement in their projections. The mortality improvements serve to increase the lifetime loss ratio; the morbidity improvements clearly lower the lifetime loss ratio. They work to offset each other, but the morbidity improvements carry a larger weight. The exclusion of improvements is not unusual.

The projections do not include any shock lapses or related anti-selection. About one-half of our reviews include these effects. When used, both the lapses and anti-selection are usually very small and tend to offset each other. It is not an important part of the projections. We are comfortable that the projections do not include shock lapses and corresponding anti-selection. The projections are slightly conservative in that they do include a small amount of benefit buy-downs without corresponding anti-selection.

Financial Projections and Loss Ratios – Pre rate stabilization block

We reviewed the loss ratios in the projection period. The annual loss ratios should be in the same proportion as the attained age claim costs. Our rule of thumb for a block of business with 35% of the policies having automatic inflation protection is 11-15%. Further we expect a significant slowdown at the highest attained ages. The slope in the Company's projections is 11% and gradually reduces to an ultimate rate which is negative. This is an older block (issued prior to 2003) so all the underwriting selection has worn off and there is no need to adjust for this element. The slope is very much within our expectations; though we are surprised the Company has the loss ratio actually declining at the very tail of the projections.

We also reviewed the loss ratio during the transition from the historical to the projected period. This was very difficult because the historical experience is extremely small. We used multiple baseline periods but found only the longest baselines gave reasonable results. The implied slope during the transitions is 16-19%. This is well above the initial sloe of 11% at the beginning of the projection period. There is less than $8.5 million of historical incurred claims so the data is far from credible. This is a reasonably smooth transition from the historical to the projected period, given the limitations of the claim experience.

We found the pattern of loss ratios in the projection period to be reasonable, but the transition loss ratio is slightly on the high side.

We compared the premiums with and without the rate increase. Once the rate increase is fully effective the overall initial effect is about a 15% increase. This ratio increases throughout the projection period as the younger issue ages, with a 40% rate increase, become a more dominant proportion of the total block. The ultimate ratio is 36% which is reasonable given the 1.5% buy-downs.

We also compared the incurred claims with and without the rate increase. The claims with the rate increase start at .5% lower and grow to almost 3% lower by the end of the projection period. This reflects the 1.5% buy-downs. We found this to be a reasonable pattern.

We analyzed the premium persistency pattern. Based on the revised assumptions for mortality and lapses and using the distribution of in-force business, we built a model to predict persistency. Our model had 72 cells recognizing the variables of issue year, gender, marital status and attained age. Our model closely matched the Company's implied persistency through the first 50 years of the projection period as we were within 0.5% of the projected persistency. The model was not as accurate for the last 20 years. Our model projected more lapses because our youngest group of 18-49 was too broad. Given the limitations of our simple model, we consider this a good fit. The projections appear to accurately reflect the revised lapse and mortality assumptions.

We were able to exactly match the Company's present value calculations. We calculated the loss ratios on a range of assumptions. We calculated loss ratios with and without the active life reserve and at various interest rates. 14VAC-200-150B requires the inclusion of active life reserves (ALR) in the calculation. The Company provided a set of ALR balances as of year ends 2002-2011.

Virginia also requires the use of the pricing interest rate to be used in discounting and accumulating in the present value calculations. The Company's original pricing assumption was 6.25%. These policies were issued in 2002 and 2003. The NAIC valuation rate was 4.50% in both of those years. Our testing included the NAIC rate. The pricing rate is highlighted in green and the valuation rate is in yellow. The result of our testing is:

	Loss Ratio Testing With the Proposed Rate Increase						
		Excluding Active Life Reserves			Including Active Life Reserves		
Morbidity Margin	**Interest Rate**	**Past**	**Future**	**Lifetime**	**Past**	**Future**	**Lifetime**
5%	3.00%	17.4%	151.9%	97.4%	79.5%	114.5%	100.3%
	4.00%	17.2%	139.6%	85.5%	79.0%	98.0%	89.6%
	4.50%	17.1%	134.2%	80.3%	78.8%	90.5%	85.1%
	5.00%	17.0%	129.1%	75.6%	78.5%	83.3%	81.0%
	6.00%	16.8%	120.1%	67.2%	78.0%	69.9%	74.1%
	6.25%	16.7%	118.0%	65.4%	77.9%	66.8%	72.6%
	7.00%	16.6%	112.3%	60.2%	77.5%	57.8%	68.5%
	8.00%	16.4%	105.6%	54.3%	77.0%	46.6%	64.1%
None	3.00%	17.4%	144.7%	93.1%	79.5%	109.0%	97.1%
	4.00%	17.2%	133.0%	81.8%	79.0%	93.4%	87.0%
	4.50%	17.1%	127.8%	76.9%	78.8%	86.2%	82.8%
	5.00%	17.0%	123.0%	72.4%	78.5%	79.3%	78.9%
	6.00%	16.8%	114.3%	64.4%	78.0%	66.6%	72.4%
	6.25%	16.7%	112.4%	62.7%	77.9%	63.6%	71.0%
	7.00%	16.6%	106.9%	57.8%	77.5%	55.0%	67.3%
	8.00%	16.4%	100.5%	52.2%	77.0%	44.3%	63.1%

There are a number of observations:

- The past loss ratio is quite insensitive to the interest discount rate because there are only 9 years of experience and the claims were very flat during that period.
- The inclusion of ALR greatly increases the past loss ratio from 17% to 78%.
- The inclusion of ALR decreases the future loss ratio from 118% to 67%, almost in half.
- The inclusion of ALR increases the lifetime loss ratio by 7.5%
- In all cases, all future and lifetime loss ratios exceed the statutory requirement of 60% (except the future loss ratios at 7.00% and 8.00% which are only included to illustrate the sensitivity to the interest rate).

Financial Projections and Loss Ratios – Post rate stabilization block

We reviewed the loss ratios in the projection period. The annual loss ratios should be in the same proportion as the attained age claim costs. Our rule of thumb for a block of business with 35% of the policies having automatic inflation protection is 11-15%. Further we expect a significant slowdown at the highest attained ages. The slope in the Company's projections is initially very steep at 26% and then reduces quickly to 16% by 2017 and reduces gradually through the remainder of the projection period to an ultimate slope which is negative. We estimated the effect of the morbidity selection on this slope. When selection is removed, the slope starts at 16% and gradually decreases throughout the projection period. This is a more reasonable pattern. The initial slope is still slightly above our estimated range of 11-15%.

We also reviewed the loss ratio during the transition from the historical to the projected period. This was difficult because the historical experience is quite small. We used multiple baseline periods. They consistently suggested a range of 10-13% as the implicit slope. This is much more in line with our 11-15% rule of thumb. This is a smooth transition from the historical to the projected period and indicates the revised assumptions fit the historical experience quite well.

We found the initial pattern of loss ratios to be slightly high at the beginning of the projection period, but the transition and the ultimate pattern appears to be reasonable.

We compared the premiums with and without the rate increase. Once the rate increase is fully effective the overall initial effect is about a 19% increase. This ratio increases throughout the projection period as the younger issue ages, with a 40% rate increase, become a more dominant proportion of the total block. The ultimate ratio is 36% which is reasonable given the 1.5% buy-downs.

We also compared the incurred claims with and without the rate increase. The claims with the rate increase start at .5% lower and grow to almost 3% lower by the end of the projection period. Again this reflects the 1.5% buy-downs. We found this to be a reasonable pattern.

We analyzed the premium persistency pattern. Based on the revised assumptions for mortality and lapses and using the distribution of in-force business, we built a model to predict persistency. Our model had 144 cells recognizing the variables of issue year, gender, marital status and attained age. Our model closely matched the Company's implied persistency through the first 50 years of the projection period as we were within 0.5% of the projected persistency. The model was not as accurate for the last 20 years. We projected more lapses, only because our youngest group of 18-49 was too broad. Given the limitations of our simple model, we consider this a good fit. The projections appear to accurately reflect the revised lapse and mortality assumptions.

We were able to exactly match the Company's present value calculations. We performed sensitivity testing of the interest rate on the 85 / 58% rule. 14VAC-200-153C2 requires the sum of the present value of historical claims and projected future claims is not less than the sum of the present value of 58% of the original premiums and 85% of the incremental premiums resulting from all cumulative rate increases. The test is performed using the maximum valuation rate for contract reserves as specified in 38.2-2132 (the whole Life rate) and the exclusion of active life reserves. Policies in this block were issued from 2003 to 2011 and the valuation rate was either 4.50% or 4.00%. The weighted average, using the inforce distribution, is 4.10%. The following table shows these results. The figures in green are at the required valuation rate and the figures in yellow are at the pricing interest rate.

	Sensitivity Testing of the 58 / 85% Rule					
Morbidity Margin	**Interest Rate**	**58% of original premium**	**85% of incremental premium**	**Total minimum claims**	**Actual past and future claims**	**Test**
5%	3.00%	1,493,305,878	303,016,481	1,796,322,358	2,743,707,235	Pass
	4.00%	1,373,983,934	262,332,520	1,636,316,455	2,140,675,746	Pass
	4.10%	1,363,388,167	258,723,350	1,622,111,516	2,090,246,511	Pass
	5.00%	1,277,277,520	229,374,311	1,506,651,831	1,699,753,587	Pass
	6.00%	1,198,289,344	202,340,862	1,400,630,206	1,372,370,225	Fail
	6.25%	1,180,860,901	196,345,240	1,377,206,141	1,304,162,128	Fail
	7.00%	1,133,366,624	179,912,247	1,313,278,871	1,125,724,400	Fail
	8.00%	1,079,750,021	161,107,692	1,240,857,713	937,330,546	Fail
None	3.00%	1,493,305,878	303,016,481	1,796,322,358	2,614,843,898	Pass
	4.00%	1,373,983,934	262,332,520	1,636,316,455	2,040,564,428	Pass
	4.10%	1,363,388,167	258,723,350	1,622,111,516	1,992,540,256	Pass
	5.00%	1,277,277,520	229,374,311	1,506,651,831	1,620,675,655	Pass
	6.00%	1,198,289,344	202,340,862	1,400,630,206	1,308,919,951	Fail
	6.25%	1,180,860,901	196,345,240	1,377,206,141	1,243,969,491	Fail
	7.00%	1,133,366,624	179,912,247	1,313,278,871	1,074,058,042	Fail
	8.00%	1,079,750,021	161,107,692	1,240,857,713	894,675,130	Fail

The 58 / 85% test is met at the prescribed interest rate (valuation) but not at the pricing interest rate. This statement is true with and without the 5% additional morbidity in the projected claims.

Other Considerations

The revised assumptions are the same as was used to re-price this product for new premium rates on new insureds. This is an important element. We do not know how the Company could justify different assumptions.

We reviewed the approvals in other states. The Company has business in force in 51 jurisdictions, including the District of Columbia. The requested increase is the same in all jurisdictions. To date there have been 29 approvals and one disapproval. The average increase for these 30 is of 19.6%. The average requested increase in these 30 is 25.1%. (This recognizes the actual premium in each of the age bands). Thus the approvals to date have been running at 78.4% of the requested amount. Applying this percentage to the requested increase results in an increase of 31.4% for issue age under 50 and 19.7% for issue ages 50-74. Many of the states have required the 40.0% increase on policies with issue age under 50 be implemented in two steps. If the Virginia Bureau decides to be more in line with the approvals in other states, we recommend 30% for issue ages under 50 and 20% for issue ages 50-74.

The actuarial memorandum has the required language regarding policy design, underwriting and the claims adjudication practices.

The policyholder has the following options:

- Accept the rate increase
- Reduce the daily benefit
- Cancel riders

Conclusions

The rate increase varies by issue age and attained age. The actual distribution of ages in Virginia results in an overall rate increase of 26.6% vs. nationwide of 25.3%. The ratio of projected premiums with and without the rate increase continues to grow during the projection period. This is expected as the population of currently under age 75 insureds becomes a greater proportion of the total block.

The Company provided support for their revised assumptions for morbidity, mortality and lapses. The new assumptions fit the historical experience very well across multiple parameters. We analyzed the projections and found them to be reasonable.

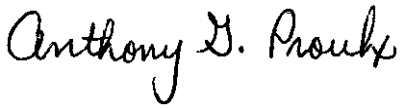
The block was split into pre and post rate stabilization subsets. The pre subset meets the 60% loss ratio requirement (future and lifetime) under all scenarios of interest rates, with and without margin in the projected claims, and excluding and including active life reserves. The post subset does not always satisfy the 58 / 85% rule required by 14VAC-200-153C2b; but it does meet it under the scenario with the prescribed valuation interest rate.

Reliance and Qualification

The purpose of this document is to communicate our review of this filing. The use of this report by parties outside of the Virginia Bureau of Insurance is unauthorized. Outside parties rely on this report at their own risk.

Our conclusions are based on information supplied by the New York Life Insurance Company both in the filing and in their response to our questions. This information was not verified, but we did review it for consistency and reasonableness. If any information was inaccurate, it may require us to revise our conclusions and opinions.

Sincerely,



Anthony G. Proulx, FSA, MAAA

Re: Actuarial Review for the Virginia Bureau of Insurance
New York Life Insurance Company
Long Term Care Rate Increase Filing
Policy Forms ILTC-5000 and INH-5000 as Generation 5.0
SERFF# NWLT-128855863

Dear Bob:

We have completed our review of this filing for a long term care rate increase. New York Life Insurance Company (the Company) is requesting an increase which varies by issue age according to the following table:

Age Criteria	Requested Increase
Issue Age <50	40%
Issue Age 50+	25.1%
Attained Age >74	0%

The same increase is being requested nationwide. The overall effect is a rate increase of 25.3% nationwide and 26.6% in Virginia.

Recommendation

We recommend that the Bureau approve the requested rate increase. Our review of this filing was performed according to the provisions of 14VAC5-200. Applicable Actuarial Standards of Practice were considered, including Actuarial Standard of Practice No. 18, "Long-Term Care Insurance" and Actuarial Standard of Practice No. 8, "Regulatory Filings for Rates and Financial Projections for Health Plans".

We sent two emails to the Company requesting additional information. The Company's responses clarified issues and provided greater support for the requested increase. The Bureau was involved in all correspondence between us and the Company.

Following negotiations with the Virginia Bureau of Insurance, the Company agreed to a phased–in approach of 3 rounds of simple increases. For issue age less than 50 the increases are 15%, 15% and 10% for the same total of 40%. For issue age 50 and older the three increases are 10%, 10% and 5.1% for a total of 25.1%. Our analysis was performed under the assumption of a single round of the full increase. The phased-in approach will lower the projected premiums and increase the lifetime loss ratio. So it does not change our conclusion for the need of the increase. It only justifies a larger increase, which the Company is not requesting.

Background

The Company is requesting a rate increase which varies by issue age and attained age. Insureds with an attained age of 75 and older receive no rate increase. Insureds with an issue age under 50 and an attained age under 75 receive a 40% rate increase. Insureds with issue age of 50-74 and an attained age under 75 receive a 25.1% rate increase. All rates are capped by the inforce rates for new insureds.

There have been no prior rate increases in any jurisdiction. There are 3,381 policies inforce in Virginia with an annualized premium of $5.9 million. Of these, 142 policies with an annualized premium of $.5 million are over attained age 74 and thus would receive no increase. These are individual policies which are guaranteed renewable for life. The Company is basing the requested increase on their nationwide experience. This is appropriate as the Virginia experience has little credibility. The Virginia in force lives and premiums are about 4.4% of the nationwide in force. Additionally, there is less than $.5 million of historical claims in Virginia Their claim experience is not meaningful.

This is an open block of business. New premium rates were recently approved for new insureds under these policy forms. The rate increase applies only to insureds who purchased coverage prior to the new rates. This block of business was sold nationwide and in Virginia beginning in 2002. All but 2 policies sold in Virginia are post rate stabilization (effective October 1, 2003 in Virginia) policies. There have been no prior increases on this business.

At our request, the Company resubmitted their experience and projections, with a split between pre and post rate stabilization. In terms of the loss ratio requirements, we reviewed the blocks separately. In terms of revised assumptions, we reviewed the blocks on a combined basis.

Analysis - Methodology

Our approach was to a) review the filing materials, b) check the calculation of the lifetime loss ratio, c) test the sensitivity of the lifetime loss ratio to the interest discount rate, d) review the experience studies which support the revised assumptions, e) review the projections for reasonableness and d) analyze the current increase and cumulative increase in Virginia relative to other states.

Credibility

This is a large block of business with more than $545 million of earned premium thus far. In general, the Company uses their nationwide experience from their entire block of individual long term care products to develop revised assumptions. We think this is appropriate as it uses more data and increases the credibility. Also, there is no reason to expect geographic differences in experience.

Our credibility measure is based on a letter from The American Academy of Actuaries Long-Term Care Reserving Work Group to the Accident and Health Working Group of the NAIC Life and Health Actuarial Task Force which addresses the issue of credibility. In that letter, the working group recommends 1082 claims for full credibility. The 1082 claims ensure that the observed claims are within ± 5% of the true claims with 90% confidence. (The same analysis shows that 2,654 claims will ensure that the observed claims are within ± 5% of the true claims with 99% confidence.)

The Company's lapse study has 14,535 lapses. The mortality study includes 8,771 deaths. The morbidity study includes 5,696 actual claims. All three studies meet the 1,082 threshold. The Company experience is fully credible.

Morbidity

We reviewed the Company's morbidity study. The Company measured their experience against the Milliman USA Long Term Care Guidelines. This is a proprietary source, but it is based on extensive industry experience and it recognizes various underwriting standards. We are comfortable with this source. The Milliman Guidelines were adjusted for Company experience. The Company experience includes 5,696 claims with an incurred amount of almost $353 million. The study includes only the business of the Company's 4.0 and 5.0 series. In their response, the Company explained the grouping is appropriate as "the product features are very similar and also due to a lack of claim credibility in the 5.0 series". We agree it is appropriate to use the combined experience of these forms as it lends greater credibility to the results.

On our request, the Company provided Actual to Expected Analyses. The overall A/E ratio is 101.0% by claim count and 99% by incurred amount. This is an excellent fit. The first analysis was by calendar year. For the calendar years with more than 100 claims, the ratio varies from .76 to 1.17. This is a fairly narrow range and shows consistent results across calendar years.

The second analysis was by gender. The overall A/E ratio for males is 109% and for females is 96%. Again this suggests a reasonably good fit. The data allowed additional analyses by issue age and policy duration. The Company used 7 age brackets. The A/E ratios range from 96% to 101%. This is an excellent fit. One bracket, ages 92+, had no claims. The results by policy duration are a little more volatile with values ranging from 72% to 115%.

We are satisfied the new morbidity assumption fits the historical data very well across multiple variables. It should provide reasonable incurred claims in the projections.

Mortality

We reviewed the results of the Company's Actual to Expected mortality analysis. The Company is using the 1994 GAM with selection factors as their new assumption. The 1994 GAM is a table often used for LTC products. The revised assumption is based on Company wide experience. This is appropriate as it yields greater credibility and there is no reason to expect mortality to vary by block of business. The assumption includes mortality improvements from 2002 to 2011 using scale AA. This scale is often used in conjunction with the 1994 GAM. Inclusion of the improvements is a refinement which gives greater stability to the study. At our request the Company provided analysis by policy duration, attained age and gender. Each of these analyses shows a very good fit of the new assumption to the actual historical experience. The overall Actual to Expected ratio is 100%. By policy duration, the values range from 93% to 104%. By attained age group the values are from 92% to 109%, but for ages under 60 the ratio is 133%. This cell has 550 actual deaths and using our

credibility formula, it has 71% credibility. This was the only outlier. By gender, the fit is 99% for females and 101% for males.

We are satisfied the new mortality assumption fits the historical data very well across multiple variables. It is a reasonable assumption to use in the projections. The revised mortality assumptions are on a best estimate basis. The mortality assumption used in the recent re-pricing for new insureds was consistent with these assumptions but with a reasonable margin for adverse deviation.

Lapses

We reviewed the Company's lapse assumption. The Company's revised assumption varies by issue age, duration and marital status. The data in the actuarial memorandum showed historical experience by duration only. We requested an additional analysis which the Company provided.

The Company's revised lapse assumption fits the actual experience very well. By duration, the Actual to Expected ratios vary from .90 to 1.05 (with a single outlier). The overall ratio is 0.98. This is a very good fit. The lowest A/E ratios were in cells with limited exposure and fewer than 150 actual lapses. These are cells with credibility issues, so a less than perfect fit is not unexpected. By issue age groups, the experience also fits well. The ratios range from 0.97 to 1.05.

The Company also uses marital status as a variable in their lapse study. The revised lapse assumption is a table which varies by issue age and policy duration. For single lives a factor of 1.25 is applied. For married lives, a factor of 0.90 is applied. We reviewed their experience by marital status. The results are volatile. In aggregate the experience ratios are 1.40 for single and .81 for married. We focused on policy durations 5 and later. Here the experience factors are 1.22 and .90. The use of 1.25 and .90 are reasonable approximations to use.

There is no recognized lapse table for long term care insurance. However, in our experience in reviewing long term care rate increase filings, the ultimate lapse rate is generally in the range of 0.75% – 1.50%. The Company's ultimate lapse rate is 0.65% for all issue ages beginning in the 13th duration. Again, this is well supported by the Company experience.

The revised lapse assumption is consistent with the lapse assumption used in the recent re-pricing of this block for new insureds.

Financial Projections - General

The projections include benefit buy-downs which average 1.5%. The Company has assumed no related anti-selection with these buy-downs. The financial exhibits exclude the policies which were issued under the new rating structure for new insureds. This is inappropriate because the rate

increase needs to be based on the total experience of the form. However, the Company explained that the rate filing has historical experience through the end of 2011, before any of the policies under the new rating structure had been issued.

We reviewed the financial projections. The Company stated the revised assumptions are current best estimate assumptions and do not include any provision for moderately adverse experience. The exception is morbidity, which has a 5% margin for adverse deviation. We believe the projections should be on a best estimate basis, so we calculated loss ratios with and without this margin. The projections are sensitive to three key assumptions – slope of the annual loss ratios, persistency of the block and the interest discount rate.

The Company has neither morbidity nor mortality improvements in their projections. In our review work, we see that about half of the companies use a morbidity and mortality improvement in their projections. The mortality improvements serve to increase the lifetime loss ratio; the morbidity improvements clearly lower the lifetime loss ratio. They work to offset each other, but the morbidity improvements carry a larger weight. The exclusion of improvements is not unusual.

The projections do not include any shock lapses or related anti-selection. About one-half of our reviews include these effects. When used, both the lapses and anti-selection are usually very small and tend to offset each other. It is not an important part of the projections. We are comfortable that the projections do not include shock lapses and corresponding anti-selection. The projections are slightly conservative in that they do include a small amount of benefit buy-downs without corresponding anti-selection.

Financial Projections and Loss Ratios – Pre rate stabilization block

We reviewed the loss ratios in the projection period. The annual loss ratios should be in the same proportion as the attained age claim costs. Our rule of thumb for a block of business with 35% of the policies having automatic inflation protection is 11-15%. Further we expect a significant slowdown at the highest attained ages. The slope in the Company's projections is 11% and gradually reduces to an ultimate rate which is negative. This is an older block (issued prior to 2003) so all the underwriting selection has worn off and there is no need to adjust for this element. The slope is very much within our expectations; though we are surprised the Company has the loss ratio actually declining at the very tail of the projections.

We also reviewed the loss ratio during the transition from the historical to the projected period. This was very difficult because the historical experience is extremely small. We used multiple baseline periods but found only the longest baselines gave reasonable results. The implied slope during the transitions is 16-19%. This is well above the initial sloe of 11% at the beginning of the projection

period. There is less than $8.5 million of historical incurred claims so the data is far from credible. This is a reasonably smooth transition from the historical to the projected period, given the limitations of the claim experience.

We found the pattern of loss ratios in the projection period to be reasonable, but the transition loss ratio is slightly on the high side.

We compared the premiums with and without the rate increase. Once the rate increase is fully effective the overall initial effect is about a 15% increase. This ratio increases throughout the projection period as the younger issue ages, with a 40% rate increase, become a more dominant proportion of the total block. The ultimate ratio is 36% which is reasonable given the 1.5% buy-downs.

We also compared the incurred claims with and without the rate increase. The claims with the rate increase start at .5% lower and grow to almost 3% lower by the end of the projection period. This reflects the 1.5% buy-downs. We found this to be a reasonable pattern.

We analyzed the premium persistency pattern. Based on the revised assumptions for mortality and lapses and using the distribution of in-force business, we built a model to predict persistency. Our model had 72 cells recognizing the variables of issue year, gender, marital status and attained age. Our model closely matched the Company's implied persistency through the first 50 years of the projection period as we were within 0.5% of the projected persistency. The model was not as accurate for the last 20 years. Our model projected more lapses because our youngest group of 18-49 was too broad. Given the limitations of our simple model, we consider this a good fit. The projections appear to accurately reflect the revised lapse and mortality assumptions.

We were able to exactly match the Company's present value calculations. We calculated the loss ratios on a range of assumptions. We calculated loss ratios with and without the active life reserve and at various interest rates. 14VAC-200-150B requires the inclusion of active life reserves (ALR) in the calculation. The Company provided a set of ALR balances as of year ends 2002-2011.

Virginia also requires the use of the pricing interest rate to be used in discounting and accumulating in the present value calculations. The Company's original pricing assumption was 6.25%. These policies were issued in 2002 and 2003. The NAIC valuation rate was 4.50% in both of those years. Our testing included the NAIC rate. The pricing rate is highlighted in green and the valuation rate is in yellow. The result of our testing is:

	Loss Ratio Testing With the Proposed Rate Increase						
		Excluding Active Life Reserves			Including Active Life Reserves		
Morbidity Margin	**Interest Rate**	**Past**	**Future**	**Lifetime**	**Past**	**Future**	**Lifetime**
5%	3.00%	17.4%	151.9%	97.4%	79.5%	114.5%	100.3%
	4.00%	17.2%	139.6%	85.5%	79.0%	98.0%	89.6%
	4.50%	17.1%	134.2%	80.3%	78.8%	90.5%	85.1%
	5.00%	17.0%	129.1%	75.6%	78.5%	83.3%	81.0%
	6.00%	16.8%	120.1%	67.2%	78.0%	69.9%	74.1%
	6.25%	16.7%	118.0%	65.4%	77.9%	66.8%	72.6%
	7.00%	16.6%	112.3%	60.2%	77.5%	57.8%	68.5%
	8.00%	16.4%	105.6%	54.3%	77.0%	46.6%	64.1%
None	3.00%	17.4%	144.7%	93.1%	79.5%	109.0%	97.1%
	4.00%	17.2%	133.0%	81.8%	79.0%	93.4%	87.0%
	4.50%	17.1%	127.8%	76.9%	78.8%	86.2%	82.8%
	5.00%	17.0%	123.0%	72.4%	78.5%	79.3%	78.9%
	6.00%	16.8%	114.3%	64.4%	78.0%	66.6%	72.4%
	6.25%	16.7%	112.4%	62.7%	77.9%	63.6%	71.0%
	7.00%	16.6%	106.9%	57.8%	77.5%	55.0%	67.3%
	8.00%	16.4%	100.5%	52.2%	77.0%	44.3%	63.1%

There are a number of observations:

- The past loss ratio is quite insensitive to the interest discount rate because there are only 9 years of experience and the claims were very flat during that period.
- The inclusion of ALR greatly increases the past loss ratio from 17% to 78%.
- The inclusion of ALR decreases the future loss ratio from 118% to 67%, almost in half.
- The inclusion of ALR increases the lifetime loss ratio by 7.5%
- In all cases, all future and lifetime loss ratios exceed the statutory requirement of 60% (except the future loss ratios at 7.00% and 8.00% which are only included to illustrate the sensitivity to the interest rate).

Financial Projections and Loss Ratios – Post rate stabilization block

We reviewed the loss ratios in the projection period. The annual loss ratios should be in the same proportion as the attained age claim costs. Our rule of thumb for a block of business with 35% of the policies having automatic inflation protection is 11-15%. Further we expect a significant slowdown at the highest attained ages. The slope in the Company's projections is initially very steep at 26% and then reduces quickly to 16% by 2017 and reduces gradually through the remainder of the projection period to an ultimate slope which is negative. We estimated the effect of the morbidity selection on this slope. When selection is removed, the slope starts at 16% and gradually decreases throughout the projection period. This is a more reasonable pattern. The initial slope is still slightly above our estimated range of 11-15%.

We also reviewed the loss ratio during the transition from the historical to the projected period. This was difficult because the historical experience is quite small. We used multiple baseline periods. They consistently suggested a range of 10-13% as the implicit slope. This is much more in line with our 11-15% rule of thumb. This is a smooth transition from the historical to the projected period and indicates the revised assumptions fit the historical experience quite well.

We found the initial pattern of loss ratios to be slightly high at the beginning of the projection period, but the transition and the ultimate pattern appears to be reasonable.

We compared the premiums with and without the rate increase. Once the rate increase is fully effective the overall initial effect is about a 19% increase. This ratio increases throughout the projection period as the younger issue ages, with a 40% rate increase, become a more dominant proportion of the total block. The ultimate ratio is 36% which is reasonable given the 1.5% buy-downs.

We also compared the incurred claims with and without the rate increase. The claims with the rate increase start at .5% lower and grow to almost 3% lower by the end of the projection period. Again this reflects the 1.5% buy-downs. We found this to be a reasonable pattern.

We analyzed the premium persistency pattern. Based on the revised assumptions for mortality and lapses and using the distribution of in-force business, we built a model to predict persistency. Our model had 144 cells recognizing the variables of issue year, gender, marital status and attained age. Our model closely matched the Company's implied persistency through the first 50 years of the projection period as we were within 0.5% of the projected persistency. The model was not as accurate for the last 20 years. We projected more lapses, only because our youngest group of 18-49 was too broad. Given the limitations of our simple model, we consider this a good fit. The projections appear to accurately reflect the revised lapse and mortality assumptions.

We were able to exactly match the Company's present value calculations. We performed sensitivity testing of the interest rate on the 85 / 58% rule. 14VAC-200-153C2 requires the sum of the present value of historical claims and projected future claims is not less than the sum of the present value of 58% of the original premiums and 85% of the incremental premiums resulting from all cumulative rate increases. The test is performed using the maximum valuation rate for contract reserves as specified in 38.2-2132 (the whole Life rate) and the exclusion of active life reserves. Policies in this block were issued from 2003 to 2011 and the valuation rate was either 4.50% or 4.00%. The weighted average, using the inforce distribution, is 4.10%. The following table shows these results. The figures in green are at the required valuation rate and the figures in yellow are at the pricing interest rate.

	Sensitivity Testing of the 58 / 85% Rule					
Morbidity Margin	**Interest Rate**	**58% of original premium**	**85% of incremental premium**	**Total minimum claims**	**Actual past and future claims**	**Test**
5%	3.00%	1,493,305,878	303,016,481	1,796,322,358	2,743,707,235	Pass
	4.00%	1,373,983,934	262,332,520	1,636,316,455	2,140,675,746	Pass
	4.10%	1,363,388,167	258,723,350	1,622,111,516	2,090,246,511	Pass
	5.00%	1,277,277,520	229,374,311	1,506,651,831	1,699,753,587	Pass
	6.00%	1,198,289,344	202,340,862	1,400,630,206	1,372,370,225	Fail
	6.25%	1,180,860,901	196,345,240	1,377,206,141	1,304,162,128	Fail
	7.00%	1,133,366,624	179,912,247	1,313,278,871	1,125,724,400	Fail
	8.00%	1,079,750,021	161,107,692	1,240,857,713	937,330,546	Fail
None	3.00%	1,493,305,878	303,016,481	1,796,322,358	2,614,843,898	Pass
	4.00%	1,373,983,934	262,332,520	1,636,316,455	2,040,564,428	Pass
	4.10%	1,363,388,167	258,723,350	1,622,111,516	1,992,540,256	Pass
	5.00%	1,277,277,520	229,374,311	1,506,651,831	1,620,675,655	Pass
	6.00%	1,198,289,344	202,340,862	1,400,630,206	1,308,919,951	Fail
	6.25%	1,180,860,901	196,345,240	1,377,206,141	1,243,969,491	Fail
	7.00%	1,133,366,624	179,912,247	1,313,278,871	1,074,058,042	Fail
	8.00%	1,079,750,021	161,107,692	1,240,857,713	894,675,130	Fail

The 58 / 85% test is met at the prescribed interest rate (valuation) but not at the pricing interest rate. This statement is true with and without the 5% additional morbidity in the projected claims.

Other Considerations

The revised assumptions are the same as was used to re-price this product for new premium rates on new insureds. This is an important element. We do not know how the Company could justify different assumptions.

We reviewed the approvals in other states. The Company has business in force in 51 jurisdictions, including the District of Columbia. The requested increase is the same in all jurisdictions. To date there have been 29 approvals and one disapproval. The average increase for these 30 is of 19.6%. The average requested increase in these 30 is 25.1%. (This recognizes the actual premium in each of the age bands). Thus the approvals to date have been running at 78.4% of the requested amount. Applying this percentage to the requested increase results in an increase of 31.4% for issue age under 50 and 19.7% for issue ages 50-74. Many of the states have required the 40.0% increase on policies with issue age under 50 be implemented in two steps. If the Virginia Bureau decides to be more in line with the approvals in other states, we recommend 30% for issue ages under 50 and 20% for issue ages 50-74.

The actuarial memorandum has the required language regarding policy design, underwriting and the claims adjudication practices.

The policyholder has the following options:

- Accept the rate increase
- Reduce the daily benefit
- Cancel riders

Conclusions

The rate increase varies by issue age and attained age. The actual distribution of ages in Virginia results in an overall rate increase of 26.6% vs. nationwide of 25.3%. The ratio of projected premiums with and without the rate increase continues to grow during the projection period. This is expected as the population of currently under age 75 insureds becomes a greater proportion of the total block.

The Company provided support for their revised assumptions for morbidity, mortality and lapses. The new assumptions fit the historical experience very well across multiple parameters. We analyzed the projections and found them to be reasonable.

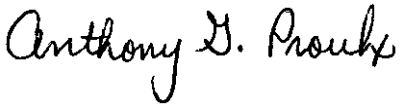
The block was split into pre and post rate stabilization subsets. The pre subset meets the 60% loss ratio requirement (future and lifetime) under all scenarios of interest rates, with and without margin in the projected claims, and excluding and including active life reserves. The post subset does not always satisfy the 58 / 85% rule required by 14VAC-200-153C2b; but it does meet it under the scenario with the prescribed valuation interest rate.

Reliance and Qualification

The purpose of this document is to communicate our review of this filing. The use of this report by parties outside of the Virginia Bureau of Insurance is unauthorized. Outside parties rely on this report at their own risk.

Our conclusions are based on information supplied by the New York Life Insurance Company both in the filing and in their response to our questions. This information was not verified, but we did review it for consistency and reasonableness. If any information was inaccurate, it may require us to revise our conclusions and opinions.

Sincerely,



Anthony G. Proulx, FSA, MAAA

Long Term Care Rate Increase Filing
Policy Forms ILTC-5000 and INH-5000 as Generation 5.0
SERFF# NWLT-128855863

Dear Bob:

We have completed our review of this filing for a long term care rate increase. New York Life Insurance Company (the Company) is requesting an increase which varies by issue age according to the following table:

Age Criteria	Requested Increase
Issue Age <50	40%
Issue Age 50+	25.1%
Attained Age >74	0%

The same increase is being requested nationwide. The overall effect is a rate increase of 25.3% nationwide and 26.6% in Virginia.

Recommendation

We recommend that the Bureau approve the requested rate increase. Our review of this filing was performed according to the provisions of 14VAC5-200. Applicable Actuarial Standards of Practice were considered, including Actuarial Standard of Practice No. 18, "Long-Term Care Insurance" and Actuarial Standard of Practice No. 8, "Regulatory Filings for Rates and Financial Projections for Health Plans".

We sent two emails to the Company requesting additional information. The Company's responses clarified issues and provided greater support for the requested increase. The Bureau was involved in all correspondence between us and the Company.

Following negotiations with the Virginia Bureau of Insurance, the Company agreed to a phased–in approach of 3 rounds of simple increases. For issue age less than 50 the increases are 15%, 15% and 10% for the same total of 40%. For issue age 50 and older the three increases are 10%, 10% and 5.1% for a total of 25.1%. Our analysis was performed under the assumption of a single round of the full increase. The phased-in approach will lower the projected premiums and increase the lifetime loss ratio. So it does not change our conclusion for the need of the increase. It only justifies a larger increase, which the Company is not requesting.

Background

The Company is requesting a rate increase which varies by issue age and attained age. Insureds with an attained age of 75 and older receive no rate increase. Insureds with an issue age under 50 and an attained age under 75 receive a 40% rate increase. Insureds with issue age of 50-74 and an attained age under 75 receive a 25.1% rate increase. All rates are capped by the inforce rates for new insureds.

There have been no prior rate increases in any jurisdiction. There are 3,381 policies inforce in Virginia with an annualized premium of $5.9 million. Of these, 142 policies with an annualized premium of $.5 million are over attained age 74 and thus would receive no increase. These are individual policies which are guaranteed renewable for life. The Company is basing the requested increase on their nationwide experience. This is appropriate as the Virginia experience has little credibility. The Virginia in force lives and premiums are

about 4.4% of the nationwide in force. Additionally, there is less than $.5 million of historical claims in Virginia Their claim experience is not meaningful.

This is an open block of business. New premium rates were recently approved for new insureds under these policy forms. The rate increase applies only to insureds who purchased coverage prior to the new rates. This block of business was sold nationwide and in Virginia beginning in 2002. All but 2 policies sold in Virginia are post rate stabilization (effective October 1, 2003 in Virginia) policies. There have been no prior increases on this business.

At our request, the Company resubmitted their experience and projections, with a split between pre and post rate stabilization. In terms of the loss ratio requirements, we reviewed the blocks separately. In terms of revised assumptions, we reviewed the blocks on a combined basis.

Analysis - Methodology

Our approach was to a) review the filing materials, b) check the calculation of the lifetime loss ratio, c) test the sensitivity of the lifetime loss ratio to the interest discount rate, d) review the experience studies which support the revised assumptions, e) review the projections for reasonableness and d) analyze the current increase and cumulative increase in Virginia relative to other states.

Credibility

This is a large block of business with more than $545 million of earned premium thus far. In general, the Company uses their nationwide experience from their entire block of individual long term care products to develop revised assumptions. We think this is appropriate as it uses more data and increases the credibility. Also, there is no reason to expect geographic differences in experience.

Our credibility measure is based on a letter from The American Academy of Actuaries Long-Term Care Reserving Work Group to the Accident and Health Working Group of the NAIC Life and Health Actuarial Task Force which addresses the issue of credibility. In that letter, the working group recommends 1082 claims for full credibility. The 1082 claims ensure that the observed claims are within ± 5% of the true claims with 90% confidence. (The same analysis shows that 2,654 claims will ensure that the observed claims are within ± 5% of the true claims with 99% confidence.)

The Company's lapse study has 14,535 lapses. The mortality study includes 8,771 deaths. The morbidity study includes 5,696 actual claims. All three studies meet the 1,082 threshold. The Company experience is fully credible.

Morbidity

We reviewed the Company's morbidity study. The Company measured their experience against the Milliman USA Long Term Care Guidelines. This is a proprietary source, but it is based on extensive industry experience and it recognizes various underwriting standards. We are comfortable with this source. The Milliman Guidelines were adjusted for Company experience. The Company experience includes 5,696 claims with an incurred amount of almost $353 million. The study includes only the business of the Company's 4.0 and 5.0 series. In their response, the Company explained the grouping is appropriate as "the product features are very similar and also due to a lack of claim credibility in the 5.0 series". We agree it is appropriate to use the combined experience of these forms as it lends greater credibility to the results.

On our request, the Company provided Actual to Expected Analyses. The overall A/E ratio is 101.0% by claim count and 99% by incurred amount. This is an excellent fit. The first analysis was by calendar year. For the calendar years with more than 100 claims, the ratio varies from .76 to 1.17. This is a fairly narrow range and shows consistent results across calendar years.

The second analysis was by gender. The overall A/E ratio for males is 109% and for females is 96%. Again this suggests a reasonably good fit. The data allowed additional analyses by issue age and policy duration. The Company used 7 age brackets. The A/E ratios range from 96% to 101%. This is an excellent fit. One bracket, ages 92+, had no claims. The results by policy duration are a little more volatile with values ranging from 72% to 115%.

We are satisfied the new morbidity assumption fits the historical data very well across multiple variables. It should provide reasonable incurred claims in the projections.

Mortality

We reviewed the results of the Company's Actual to Expected mortality analysis. The Company is using the 1994 GAM with selection factors as their new assumption. The 1994 GAM is a table often used for LTC products. The revised assumption is based on Company wide experience. This is appropriate as it yields greater credibility and there is no reason to expect mortality to vary by block of business. The assumption includes mortality improvements from 2002 to 2011 using scale AA. This scale is often used in conjunction with

the 1994 GAM. Inclusion of the improvements is a refinement which gives greater stability to the study. At our request the Company provided analysis by policy duration, attained age and gender. Each of these analyses shows a very good fit of the new assumption to the actual historical experience. The overall Actual to Expected ratio is 100%. By policy duration, the values range from 93% to 104%. By attained age group the values are from 92% to 109%, but for ages under 60 the ratio is 133%. This cell has 550 actual deaths and using our credibility formula, it has 71% credibility. This was the only outlier. By gender, the fit is 99% for females and 101% for males.

We are satisfied the new mortality assumption fits the historical data very well across multiple variables. It is a reasonable assumption to use in the projections. The revised mortality assumptions are on a best estimate basis. The mortality assumption used in the recent re-pricing for new insureds was consistent with these assumptions but with a reasonable margin for adverse deviation.

Lapses

We reviewed the Company's lapse assumption. The Company's revised assumption varies by issue age, duration and marital status. The data in the actuarial memorandum showed historical experience by duration only. We requested an additional analysis which the Company provided.

The Company's revised lapse assumption fits the actual experience very well. By duration, the Actual to Expected ratios vary from .90 to 1.05 (with a single outlier). The overall ratio is 0.98. This is a very good fit. The lowest A/E ratios were in cells with limited exposure and fewer than 150 actual lapses. These are cells with credibility issues, so a less than perfect fit is not unexpected. By issue age groups, the experience also fits well. The ratios range from 0.97 to 1.05.

The Company also uses marital status as a variable in their lapse study. The revised lapse assumption is a table which varies by issue age and policy duration. For single lives a factor of 1.25 is applied. For married lives, a factor of 0.90 is applied. We reviewed their experience by marital status. The results are volatile. In aggregate the experience ratios are 1.40 for single and .81 for married. We focused on policy durations 5 and later. Here the experience factors are 1.22 and .90. The use of 1.25 and .90 are reasonable approximations to use.

There is no recognized lapse table for long term care insurance. However, in our experience in reviewing long term care rate increase filings, the ultimate lapse rate is generally in the range

of 0.75% – 1.50%. The Company's ultimate lapse rate is 0.65% for all issue ages beginning in the 13th duration. Again, this is well supported by the Company experience.

The revised lapse assumption is consistent with the lapse assumption used in the recent re-pricing of this block for new insureds.

Financial Projections - General

The projections include benefit buy-downs which average 1.5%. The Company has assumed no related anti-selection with these buy-downs. The financial exhibits exclude the policies which were issued under the new rating structure for new insureds. This is inappropriate because the rate increase needs to be based on the total experience of the form. However, the Company explained that the rate filing has historical experience through the end of 2011, before any of the policies under the new rating structure had been issued.

We reviewed the financial projections. The Company stated the revised assumptions are current best estimate assumptions and do not include any provision for moderately adverse experience. The exception is morbidity, which has a 5% margin for adverse deviation. We believe the projections should be on a best estimate basis, so we calculated loss ratios with and without this margin. The projections are sensitive to three key assumptions – slope of the annual loss ratios, persistency of the block and the interest discount rate.

The Company has neither morbidity nor mortality improvements in their projections. In our review work, we see that about half of the companies use a morbidity and mortality improvement in their projections. The mortality improvements serve to increase the lifetime loss ratio; the morbidity improvements clearly lower the lifetime loss ratio. They work to offset each other, but the morbidity improvements carry a larger weight. The exclusion of improvements is not unusual.

The projections do not include any shock lapses or related anti-selection. About one-half of our reviews include these effects. When used, both the lapses and anti-selection are usually very small and tend to offset each other. It is not an important part of the projections. We are comfortable that the projections do not include shock lapses and corresponding anti-selection. The projections are slightly conservative in that they do include a small amount of benefit buy-downs without corresponding anti-selection.

Financial Projections and Loss Ratios – Pre rate stabilization block

We reviewed the loss ratios in the projection period. The annual loss ratios should be in the same proportion as the attained age claim costs. Our rule of thumb for a block of business

with 35% of the policies having automatic inflation protection is 11-15%. Further we expect a significant slowdown at the highest attained ages. The slope in the Company's projections is 11% and gradually reduces to an ultimate rate which is negative. This is an older block (issued prior to 2003) so all the underwriting selection has worn off and there is no need to adjust for this element. The slope is very much within our expectations; though we are surprised the Company has the loss ratio actually declining at the very tail of the projections.

We also reviewed the loss ratio during the transition from the historical to the projected period. This was very difficult because the historical experience is extremely small. We used multiple baseline periods but found only the longest baselines gave reasonable results. The implied slope during the transitions is 16-19%. This is well above the initial sloe of 11% at the beginning of the projection period. There is less than $8.5 million of historical incurred claims so the data is far from credible. This is a reasonably smooth transition from the historical to the projected period, given the limitations of the claim experience.

We found the pattern of loss ratios in the projection period to be reasonable, but the transition loss ratio is slightly on the high side.

We compared the premiums with and without the rate increase. Once the rate increase is fully effective the overall initial effect is about a 15% increase. This ratio increases throughout the projection period as the younger issue ages, with a 40% rate increase, become a more dominant proportion of the total block. The ultimate ratio is 36% which is reasonable given the 1.5% buy-downs.

We also compared the incurred claims with and without the rate increase. The claims with the rate increase start at .5% lower and grow to almost 3% lower by the end of the projection period. This reflects the 1.5% buy-downs. We found this to be a reasonable pattern.

We analyzed the premium persistency pattern. Based on the revised assumptions for mortality and lapses and using the distribution of in-force business, we built a model to predict persistency. Our model had 72 cells recognizing the variables of issue year, gender, marital status and attained age. Our model closely matched the Company's implied persistency through the first 50 years of the projection period as we were within 0.5% of the projected persistency. The model was not as accurate for the last 20 years. Our model projected more lapses because our youngest group of 18-49 was too broad. Given the limitations of our simple model, we consider this a good fit. The projections appear to accurately reflect the revised lapse and mortality assumptions.

We were able to exactly match the Company's present value calculations. We calculated the loss ratios on a range of assumptions. We calculated loss ratios with and without the active life reserve and at various interest rates. 14VAC-200-150B requires the inclusion of active life reserves (ALR) in the calculation. The Company provided a set of ALR balances as of year ends 2002-2011.

Virginia also requires the use of the pricing interest rate to be used in discounting and accumulating in the present value calculations. The Company's original pricing assumption was 6.25%. These policies were issued in 2002 and 2003. The NAIC valuation rate was 4.50% in both of those years. Our testing included the NAIC rate. The pricing rate is highlighted in green and the valuation rate is in yellow. The result of our testing is:

	Loss Ratio Testing With the Proposed Rate Increase						
		Excluding Active Life Reserves			**Including Active Life Reserves**		
Morbidity Margin	**Interest Rate**	**Past**	**Future**	**Lifetime**	**Past**	**Future**	**Lifetime**
5%	3.00%	17.4%	151.9%	97.4%	79.5%	114.5%	100.3%
	4.00%	17.2%	139.6%	85.5%	79.0%	98.0%	89.6%
	4.50%	17.1%	134.2%	80.3%	78.8%	90.5%	85.1%
	5.00%	17.0%	129.1%	75.6%	78.5%	83.3%	81.0%
	6.00%	16.8%	120.1%	67.2%	78.0%	69.9%	74.1%
	6.25%	16.7%	118.0%	65.4%	77.9%	66.8%	72.6%
	7.00%	16.6%	112.3%	60.2%	77.5%	57.8%	68.5%
	8.00%	16.4%	105.6%	54.3%	77.0%	46.6%	64.1%
None	3.00%	17.4%	144.7%	93.1%	79.5%	109.0%	97.1%
	4.00%	17.2%	133.0%	81.8%	79.0%	93.4%	87.0%
	4.50%	17.1%	127.8%	76.9%	78.8%	86.2%	82.8%
	5.00%	17.0%	123.0%	72.4%	78.5%	79.3%	78.9%
	6.00%	16.8%	114.3%	64.4%	78.0%	66.6%	72.4%
	6.25%	16.7%	112.4%	62.7%	77.9%	63.6%	71.0%
	7.00%	16.6%	106.9%	57.8%	77.5%	55.0%	67.3%
	8.00%	16.4%	100.5%	52.2%	77.0%	44.3%	63.1%

There are a number of observations:

- The past loss ratio is quite insensitive to the interest discount rate because there are only 9 years of experience and the claims were very flat during that period.
- The inclusion of ALR greatly increases the past loss ratio from 17% to 78%.
- The inclusion of ALR decreases the future loss ratio from 118% to 67%, almost in half.
- The inclusion of ALR increases the lifetime loss ratio by 7.5%
- In all cases, all future and lifetime loss ratios exceed the statutory requirement of 60% (except the future loss ratios at 7.00% and 8.00% which are only included to illustrate the sensitivity to the interest rate).

Financial Projections and Loss Ratios – Post rate stabilization block

We reviewed the loss ratios in the projection period. The annual loss ratios should be in the same proportion as the attained age claim costs. Our rule of thumb for a block of business with 35% of the policies having automatic inflation protection is 11-15%. Further we expect a significant slowdown at the highest attained ages. The slope in the Company's projections is initially very steep at 26% and then reduces quickly to 16% by 2017 and reduces gradually through the remainder of the projection period to an ultimate slope which is negative. We estimated the effect of the morbidity selection on this slope. When selection is removed, the slope starts at 16% and gradually decreases throughout the projection period. This is a more reasonable pattern. The initial slope is still slightly above our estimated range of 11-15%.

We also reviewed the loss ratio during the transition from the historical to the projected period. This was difficult because the historical experience is quite small. We used multiple baseline periods. They consistently suggested a range of 10-13% as the implicit slope. This is much more in line with our 11-15% rule of thumb. This is a smooth transition from the historical to the projected period and indicates the revised assumptions fit the historical experience quite well.

We found the initial pattern of loss ratios to be slightly high at the beginning of the projection period, but the transition and the ultimate pattern appears to be reasonable.

We compared the premiums with and without the rate increase. Once the rate increase is fully effective the overall initial effect is about a 19% increase. This ratio increases throughout the projection period as the younger issue ages, with a 40% rate increase, become a more

dominant proportion of the total block. The ultimate ratio is 36% which is reasonable given the 1.5% buy-downs.

We also compared the incurred claims with and without the rate increase. The claims with the rate increase start at .5% lower and grow to almost 3% lower by the end of the projection period. Again this reflects the 1.5% buy-downs. We found this to be a reasonable pattern.

We analyzed the premium persistency pattern. Based on the revised assumptions for mortality and lapses and using the distribution of in-force business, we built a model to predict persistency. Our model had 144 cells recognizing the variables of issue year, gender, marital status and attained age. Our model closely matched the Company's implied persistency through the first 50 years of the projection period as we were within 0.5% of the projected persistency. The model was not as accurate for the last 20 years. We projected more lapses, only because our youngest group of 18-49 was too broad. Given the limitations of our simple model, we consider this a good fit. The projections appear to accurately reflect the revised lapse and mortality assumptions.

We were able to exactly match the Company's present value calculations. We performed sensitivity testing of the interest rate on the 85 / 58% rule. 14VAC-200-153C2 requires the sum of the present value of historical claims and projected future claims is not less than the sum of the present value of 58% of the original premiums and 85% of the incremental premiums resulting from all cumulative rate increases. The test is performed using the maximum valuation rate for contract reserves as specified in 38.2-2132 (the whole Life rate) and the exclusion of active life reserves. Policies in this block were issued from 2003 to 2011 and the valuation rate was either 4.50% or 4.00%. The weighted average, using the inforce distribution, is 4.10%. The following table shows these results. The figures in green are at the required valuation rate and the figures in yellow are at the pricing interest rate.

	Sensitivity Testing of the 58 / 85% Rule					
Morbidity Margin	**Interest Rate**	**58% of original premium**	**85% of incremental premium**	**Total minimum claims**	**Actual past and future claims**	**Test**
5%	3.00%	1,493,305,878	303,016,481	1,796,322,358	2,743,707,235	Pass
	4.00%	1,373,983,934	262,332,520	1,636,316,455	2,140,675,746	Pass
	4.10%	1,363,388,167	258,723,350	1,622,111,516	2,090,246,511	Pass
	5.00%	1,277,277,520	229,374,311	1,506,651,831	1,699,753,587	Pass
	6.00%	1,198,289,344	202,340,862	1,400,630,206	1,372,370,225	Fail

	6.25%	1,180,860,901	196,345,240	1,377,206,141	1,304,162,128	Fail
	7.00%	1,133,366,624	179,912,247	1,313,278,871	1,125,724,400	Fail
	8.00%	1,079,750,021	161,107,692	1,240,857,713	937,330,546	Fail
None	3.00%	1,493,305,878	303,016,481	1,796,322,358	2,614,843,898	Pass
	4.00%	1,373,983,934	262,332,520	1,636,316,455	2,040,564,428	Pass
	4.10%	1,363,388,167	258,723,350	1,622,111,516	1,992,540,256	Pass
	5.00%	1,277,277,520	229,374,311	1,506,651,831	1,620,675,655	Pass
	6.00%	1,198,289,344	202,340,862	1,400,630,206	1,308,919,951	Fail
	6.25%	1,180,860,901	196,345,240	1,377,206,141	1,243,969,491	Fail
	7.00%	1,133,366,624	179,912,247	1,313,278,871	1,074,058,042	Fail
	8.00%	1,079,750,021	161,107,692	1,240,857,713	894,675,130	Fail

The 58 / 85% test is met at the prescribed interest rate (valuation) but not at the pricing interest rate. This statement is true with and without the 5% additional morbidity in the projected claims.

Other Considerations

The revised assumptions are the same as was used to re-price this product for new premium rates on new insureds. This is an important element. We do not know how the Company could justify different assumptions.

We reviewed the approvals in other states. The Company has business in force in 51 jurisdictions, including the District of Columbia. The requested increase is the same in all jurisdictions. To date there have been 29 approvals and one disapproval. The average increase for these 30 is of 19.6%. The average requested increase in these 30 is 25.1%. (This recognizes the actual premium in each of the age bands). Thus the approvals to date have been running at 78.4% of the requested amount. Applying this percentage to the requested increase results in an increase of 31.4% for issue age under 50 and 19.7% for issue ages 50-74. Many of the states have required the 40.0% increase on policies with issue age under 50 be implemented in two steps. If the Virginia Bureau decides to be more in line with the approvals in other states, we recommend 30% for issue ages under 50 and 20% for issue ages 50-74.

The actuarial memorandum has the required language regarding policy design, underwriting and the claims adjudication practices.

The policyholder has the following options:

- Accept the rate increase
- Reduce the daily benefit
- Cancel riders

NAIC Model Bulletin

The filing was also reviewed in light of the NAIC Model Bulletin regarding LTC rate increase approved in December 2013.

- We agree with the Company's statements the accumulated values use actual experience and that the present values use reasonable estimates of future premiums and claims that are based on best estimates.
- The Company provided financials for the post rate stabilization block only. These financials used the maximum valuation interest rate. The maximum valuation interest rate varies by year of issue. In their projections, the rate changes every year as the mix of business changes. We cannot mimic this change of mix, so we used the weighted rate as of the beginning of the projection period. The following table compares our approximate results to the Company's more exact calculation. The differences are immaterial.

Post Rate Stabilization Block						
Discounting Using the Maximum Valuation Interest Rate						
	Company			**L&E**		
	Premiums	Inc Claims	Loss Ratio	Premiums	Inc Claims	Loss Ratio
Past	558,054,862	38,595,470	6.9%	555,713,727	38,415,158	6.9%
Future	2,104,494,486	2,059,057,901	97.8%	2,099,335,937	2,051,831,353	97.7%
Total	2,662,549,349	2,097,653,370	78.8%	2,655,049,664	2,090,246,511	78.7%

- The Company did not provide their calculations for the pre rate stabilization block. However, the annual projections did not change, only the present value calculations.

We were able to run our own set of present value calculations and thus perform the NAIC Model Bulletin revised loss ratio test on this subset. The following shows the results at various interest rates and with and without active life reserves:

Pre Rate Stabilization Block							
NAIC Model Bulletin – New Loss Ratio Test							
	Interest Rate	Original Premiums	Incremental Premiums	Loss Ratio	Allowed Claims	Actual Claims	Test
Without Active Life Reserves	3.00%	121,673,853	10,411,854	60% Orig 80% Incr	81,333,795	122,971,165	Pass
	4.00%	117,700,257	9,099,493		77,899,748	103,726,588	Pass
	4.50%	116,158,808	8,534,431		76,522,830	95,853,802	Pass
	5.00%	114,877,428	8,020,657		75,342,982	88,928,801	Pass
	6.00%	113,005,562	7,124,232		73,502,723	77,417,070	Pass
	6.25%	112,667,609	6,923,918		73,139,700	74,950,206	Pass

The loss ratio test is met at the maximum valuation rate for both with and without active life reserves. The filing complies with the requirements of the NAIC Model Bulletin.

Conclusions

The rate increase varies by issue age and attained age. The actual distribution of ages in Virginia results in an overall rate increase of 26.6% vs. nationwide of 25.3%. The ratio of projected premiums with and without the rate increase continues to grow during the projection period. This is expected as the population of currently under age 75 insureds becomes a greater proportion of the total block.

The Company provided support for their revised assumptions for morbidity, mortality and lapses. The new assumptions fit the historical experience very well across multiple parameters. We analyzed the projections and found them to be reasonable.

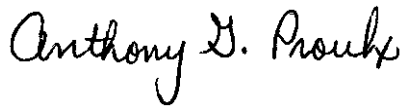
The block was split into pre and post rate stabilization subsets. The pre subset meets the 60% loss ratio requirement (future and lifetime) under all scenarios of interest rates, with and without margin in the projected claims, and excluding and including active life reserves. The post subset does not always satisfy the 58 / 85% rule required by 14VAC-200-153C2b; but it does meet it under the scenario with the prescribed valuation interest rate.

Reliance and Qualification

The purpose of this document is to communicate our review of this filing. The use of this report by parties outside of the Virginia Bureau of Insurance is unauthorized. Outside parties rely on this report at their own risk.

Our conclusions are based on information supplied by the New York Life Insurance Company both in the filing and in their response to our questions. This information was not verified, but we did review it for consistency and reasonableness. If any information was inaccurate, it may require us to revise our conclusions and opinions.

Sincerely,



Anthony G. Proulx, FSA, MAAA

LONG-TERM CARE INSURANCE

CONTINGENT NONFORFEITURE BENEFIT RIDER

Insured's Information

Insured:	[ ]	**Policy Effective Date:**	[ ]
Issue Age:	[ ]	**Rider Effective Date:**	[ ]
Policy Number:	[ ]		

This Rider attaches to and becomes part of the Policy indicated by the Policy Number above. **Please read this Rider carefully**. This Contingent Nonforfeiture Benefit is provided only if the Optional Nonforfeiture Benefit is not selected at issue or if the Optional Nonforfeiture Benefit is deleted after the policy Effective Date. If this Rider is being issued with the Policy, it is attached to the Policy. If this Rider is being added after the Policy Effective Date, then this Rider should be attached to the Policy. There is no additional premium for this Rider.

Contingent Nonforfeiture Benefit

This Rider provides a Contingent Nonforfeiture Benefit in the event that an increase in premium rate levels results in a Substantial Cumulative Premium Increase for Your Policy and Your Policy lapses within 120 days of the due date of the increased premium.

A Substantial Cumulative Premium Increase in the annual premium is one equal to or exceeding the percentage of Your initial annual premium set forth below based on Your issue age. Additionally:

- The purchase of additional coverage shall not be considered a premium rate increase. However, for purposes of the calculations of the ratio shown below of Percentage Increase Over Initial Premium, the portion of the premium attributable to the additional coverage shall be added to and considered part of the initial annual premium.
- If You decrease Your Benefits, the initial annual premium will be reduced by the amount of the decrease in Your premium.

If Your Policy has been in effect for 20 years, You do not need to meet the issue age or percentage increase amount shown in the table below to be eligible for the Contingent Nonforfeiture Benefit.

Substantial Cumulative Premium Increase Percentages

Issue Age	Percent Increase Over Initial Premium	Issue Age	Percent Increase Over Initial Premium
29 and under	100%	72	36%
30-34	100%	73	34%
35-39	100%	74	32%
40-44	100%	75	30%
45-49	100%	76	28%
50-54	100%	77	26%
55-59	90%	78	24%
60	70%	79	22%
61	66%	80	20%
62	62%	81	19%
63	58%	82	18%
64	54%	83	17%

Issue Age	Percent Increase Over Initial Premium	Issue Age	Percent Increase Over Initial Premium
65	50%	84	16%
66	48%	85	15%
67	46%	86	14%
68	44%	87	13%
69	42%	88	12%
70	40%	89	11%
71	38%	90 and over	10%

You will be notified at least 75 days prior to the due date of the premium reflecting the rate increase.

On or before the effective date of a Substantial Cumulative Premium Increase that triggers the Contingent Nonforfeiture Benefit, We will:

1. Offer to reduce Policy Benefits provided by the current coverage without the requirement of additional underwriting so that required premium payments are not increased;
2. Offer to convert the coverage to a paid-up status with a shortened Benefit Period based on the Nonforfeiture Benefit Amount. This option may be elected at any time during the 120-day period; and
3. Notify You that a default or lapse at any time during the 120-day period shall be deemed to be the election of the offer to convert to a paid-up coverage.

Benefits Payable

If the Contingent Nonforfeiture Benefit becomes effective, Benefits will be payable under the Policy any time you qualify for Benefits during the remainder of your life, subject to all of the provisions and conditions of the Policy. Benefits will be based on all of the Benefit limits in effect at the time of lapse, and may not be increased thereafter.

Limits On the Benefits Payable

The Benefits payable under this rider will not exceed the Nonforfeiture Benefit Amount, which is limited to the greater of:

- 100 percent of the total of all premiums paid, including the premiums paid prior to any changes in benefits, or
- Thirty (30) times the *Nursing Home Daily Maximum Benefit* amount at the time of lapse.

The Nonforfeiture Benefit Amount will not exceed the remaining Policy Lifetime Maximum Benefit at the time the Policy lapses and the Contingent Nonforfeiture Benefit becomes effective.

NEW YORK LIFE INSURANCE COMPANY

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Attained age 75* and above only

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.

NEW YORK LIFE INSURANCE COMPANY

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Below Attained Age 75*

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Attained age 75* and above only

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.

NEW YORK LIFE INSURANCE COMPANY

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Below Attained Age 75*

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.

NEW YORK LIFE INSURANCE COMPANY

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Attained age 75* and above only

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.

Comments:	The indicated rate increase on the Rate/Rule Schedule tab was calculated by targeting a 60% lifetime loss ratio and assumed that historical earned premiums could be increased so as not to recoup past losses. The calculation does not take into account policyholder behavior resulting from a rate increase such as shock lapse, reduced benefit option election, and adverse selection.

New York Life Insurance Company
Address: 6200 Bridge Point Parkway, Suite 400, Austin, TX 78730

Actuarial Memorandum
March 24, 2015

Product	Number
Comprehensive	ILTC-5000, et al.
Nursing Home Only	INH-5000, et al.

These policy forms were issued in Virginia by New York Life Insurance Company (New York Life) beginning in December 2002 and are still being marketed in Virginia with revised new business rates that were recently filed, approved, and implemented.

1. Purpose of Filing

This actuarial memorandum has been prepared for the purpose of demonstrating that the anticipated lifetime loss ratio, with the requested rate increase on the original rates filed for the above-listed forms, meets the minimum requirements of this jurisdiction and demonstrating compliance with its rate stability regulation. It may not be suitable for other purposes. Only two in-force policies were issued in Virginia prior to October 1, 2003, the effective date of rate stability in Virginia. Although policies were issued prior to October 1, 2003 nationwide, experience for all issue dates has been combined in this filing.

2. Description of Benefits

These are federally tax-qualified, individually underwritten policy forms providing benefits for confinement in a nursing home or an assisted living facility up to a daily maximum benefit amount. A daily maximum benefit, benefit period, and elimination period were selected at issue.

Under form series ILTC-5000 benefits were also available for home and community based care expenses up to a percentage of the nursing home daily benefit. Benefits for informal care were available if the insured is following a plan of care developed by a care advisor selected by the company. Under form series INH-5000 no home health care benefits could be selected.

At issue the insured may have had the option to choose between multiple inflation options: a simple inflation option, a compound inflation option, or CPI-U offers. The simple inflation option provides for daily maximums and policy lifetime maximums that increase on each policy anniversary date by a fixed percentage (ranging from 1% to 6%) of the original amounts annually for the life of the policy. The compound inflation option provides for daily maximums and policy lifetime maximums that increase on each policy anniversary date by a percentage of the current amount annually for the life of the policy. The percentage increase may be a fixed percentage (3%, 4%, or 5%) or a percentage relative to the change in the consumer price index. The CPI-U offers provide for the option to purchase annual increases in daily and policy maximums on each policy anniversary date by a percentage relative to the change in the consumer price index. CPI-U offers are based on the original issue age rates.

Ancillary benefits for bed hold, informal caregiver training, respite care, hospice care, waiver of premium, and alternate plan of care are also provided.

At issue, the insured may have had the option of selecting a nonforfeiture benefit rider, shared care rider, couples rider, and a return of premium upon death benefit rider. The shared care rider provides for an additional pool of money which can be accessed by either spouse if both keep identical coverage in effect and benefits are exhausted under the base policy. The couples rider provides for a common elimination period, dual waiver of premium, and a spouse paid up benefit when two spouses keep identical benefits in force until the time of benefit eligibility under the rider, or in the case of the spouse paid up benefit, until one spouse dies (but for at least ten years). The spouse paid up benefit is only in effect if there are no claims under either policy for the first ten contract years.

If no claims are paid and the policy remains in force, the contract becomes paid up at the later of the first policy anniversary after age 95 or the 20th policy anniversary. All premiums paid for the coverage are returned upon the death of the insured if the contract remains in force until the later of the first policy anniversary after age 100 or the 25th policy anniversary and no claims were payable during the period. The return of premium upon death benefit rider provides a return of premium less claims paid in the event of the insured's death.

3. Renewability

The above-listed policy forms are guaranteed renewable for life.

4. Applicability

This filing is applicable to original rates on in-force policies only. The above-listed policy forms are currently being sold in Virginia with revised new business premium rates. The revised new business rates implemented in 2012 are not impacted by this filing. The premium change will apply to the base forms and all riders associated with the base forms for policyholders with an attained age under 75. Policyholders who reach attained age 75 before their first policy anniversary on or after the rate increase implementation date will not receive a rate increase on any portion of premium (including CPI-U offers). The premium rate increase shall also apply to CPI-U offers for policyholders with an attained age under 75 at their first policy anniversary on or after the rate increase implementation date.

5. Actuarial Assumptions

a. Morbidity. Expected claim costs were developed from the *Milliman Long Term Care Cost Guidelines (LTCCGs)*, adjusted for New York Life's current experience relative to the *LTCCGs*. All values were adjusted to reflect the effects of elimination periods, policy maximums, salvage, and benefit eligibility standards.

b. Voluntary Termination Rates Vary by duration as developed from historical experience and are shown in the following table:

Voluntary Lapse Rates by Duration and Issue Age					
Policy Duration	**Issue Age**				
	< 35	**35-39**	**40-44**	**45-49**	**50 +**
1	24.75%	12.75%	12.50%	7.75%	6.75%
2	17.50	10.25	9.50	6.25	5.25
3	12.00	8.00	7.00	5.00	4.25
4	8.00	6.25	5.00	4.00	3.25
5	5.50	4.75	3.50	3.00	2.50
6	4.25	3.50	2.50	2.50	1.75
7	3.25	2.75	2.00	1.75	1.25
8	2.75	2.00	1.50	1.50	1.00
9	2.00	1.75	1.25	1.25	1.00
10	1.50	1.50	1.00	1.00	0.75
11	1.00	1.25	0.75	0.75	0.75
12	0.75	1.00	0.75	0.75	0.75
13+	0.65%	0.65%	0.65%	0.65%	0.65%

The lapse rates in the table above are multiplied by 1.25 or 0.90 for single and married policyholders, respectively.

In the year of rate increase notification to policyholders, a reduction in premiums and benefits is assumed due to reduced benefit option election. The impact of reduced benefit option election varies depending on the increase amount and averages 1.5%.

c. Mortality. 1994 Group Annuitant Mortality (94GAM) with selection factors. Improvement is assumed through the valuation date.

d. Expenses. Expenses have not been explicitly projected. It is assumed that the originally filed expense assumptions remain appropriate. Normal New York Life renewal commission rates will be applied on any increase in premium.

The above assumptions are based on the experience of New York Life, industry experience, and judgment. The assumptions used in pricing other forms currently available for sale use similar assumptions to those in this filing and were also based on the experience of New York Life, industry experience, and judgment. The experience period is inception through December 31, 2011. These assumptions are based on the

nationwide experience of the particular policy forms in this filing and similar nationwide forms and are deemed reasonable for the particular policy forms in this filing. The assumptions described above reflect an estimate of the most likely outcome and do not include a margin for moderately adverse conditions.

In establishing the assumptions described in this section, the policy design, underwriting, and claims adjudication practices for the above-referenced policies were taken into consideration.

Exhibit I provides justification for the voluntary lapse, mortality, and morbidity assumptions used in this filing.

6. Marketing Method

The above-listed policy forms were marketed by New York Life career agents and independent brokers.

7. Underwriting Description

These policies were individually underwritten with selective use of underwriting tools, which may have included face-to-face assessments and reviews of medical records. Four underwriting classes were utilized depending on the applicant's medical history.

8. Premiums

Premiums are unisex and payable for life, except if the policy becomes paid up as described in Section 2 above. The premiums may vary according to one or more of the following policy and policyholder attributes: issue age, underwriting classification, benefit level, inflation option, premium mode, marital status, elimination period, benefit period, and optional coverages chosen.

A multi-life discount is also applied where policies were marketed on other than a one to one basis.

9. Issue Age Range

The issue ages are from 18 to 85.

10. Area Factors

Area factors were not used in pricing for the above-listed policy forms.

11. Premium Modalization

The following modal factors are applied to the annual premium (AP):

Premium Mode	Modal Factors
Annual	1.00 * AP
Semi-Annual	0.51 * AP
Quarterly	0.26 * AP
Monthly	0.09 * AP

12. Reserves

Active life reserves have not been used in this rate increase analysis, except in the loss ratio calculations in Exhibits VIII, IX, and X. Claim reserves as of December 31, 2011 have been discounted to the date of incurral for each respective claim and included in the historical incurred claims. Incurred but not reported reserve balances as of December 31, 2011 have been allocated to a calendar year of incurral and included in historic incurred claims.

13. Trend Assumptions

An explicit medical cost trend is not included in the projections.

14. Past and Future Experience

Nationwide experience across the above-listed forms and the corresponding nationwide forms is shown in Exhibit II and includes earned premiums, paid claims, incurred claims, and loss ratios. Incurred claims are shown by incurral year, whereas paid claims are shown by the year in which the payments were made. The incurred loss ratio is equal to the incurred claims divided by earned premium.

Virginia-specific experience for these policy forms is shown in Exhibit III. Virginia-specific experience for the above-referenced forms is not considered credible, but is being provided as required by the rate revisions checklist.

As the experience period is through December 31, 2011, experience for policies issued under the recently filed, approved, and implemented new business rates is not included in Exhibits II and III.

Actuarial Memorandum
March 24, 2015

Historical experience is shown by claim incurral year with the loss ratio for each loss year calculated by the following formula:

$$LR_j = \frac{\sum_k \sum_t {}_j Pmt_t^k * v^{t-k} + \sum_k ({}_j CR_{ValDate}^k + {}_j IBNR_{ValDate}^k) * v^{ValDate-k}}{EP_j}$$

LR_j = Incurred loss ratio for year *j*

${}_jPmt_t^k$ = claim payments at time *t* on claims incurred at time *k* in year *j*

${}_jCR_{ValDate}^k$ = open claim reserve held on December 31, 2011 for claims incurred at time *k* in year *j*

${}_jIBNR_{ValDate}^k$ = incurred but not reported reserve as of December 31, 2011 attributable to claims assumed incurred at time *k* in year *j*

EP_j = earned premium in year *j*

ValDate = December 31, 2011

j = year of claim incurral

k = date of claim incurral

t = actual date of claim payment

v = 1 / 1.0625 = 0.941176

Exhibits II and III also show future anticipated experience for the remaining lifetime of the business, based on in-force experience as of December 31, 2011, using the assumptions in this filing.

Exhibits II and III provide historical and projected values for premium, claims and policy count. Accumulated past, discounted future, and lifetime values both without and with the proposed rate increase are shown. Historical and future values are accumulated and discounted at 6.25%, an interest rate consistent with that assumed at pricing in the determination of premiums, as required by Virginia regulation.

Exhibits IV and V provide a comparison of actual to expected nationwide and Virginia-specific historical and projected values for earned premiums, incurred claims, and loss ratios on a calendar year basis. Virginia-specific experience for the above-referenced forms is not considered credible, but is being provided as required by the rate revisions checklist. The actual and projected experience in Exhibits IV and V reflect actual historical experience through 2011 and projected experience using the current assumptions described in section 5 of this memorandum. The expected pricing experience in Exhibits IV and V reflect the actual mix of business sold and pricing assumptions from inception.

Exhibits VI and VII provide nationwide and Virginia-specific experience, respectively, with past experience restated to the proposed premium rate basis. Virginia-specific experience for the above-referenced forms is not considered credible, but is being provided as required by the rate revisions checklist.

The interest rate used for discounting and accumulating actual/projected and expected pricing values in Exhibits IV through VII is an interest rate consistent with that assumed at pricing in the determination of premiums.

Exhibit VIII shows nationwide past experience including earned premiums, incurred claims, increase in active life reserves, and incurred loss ratios by calendar year. Exhibit IX provides similar information on a Virginia-specific basis. Virginia-specific experience for the above-referenced forms is not considered credible, but is being provided as required by the rate revisions checklist. The incurred loss ratio is defined as the sum of incurred claims and increase in active life reserves divided by earned premium. The values in these exhibits are shown without interest accumulation.

15. History of Previous Rate Revisions

There have been no previous rate revisions on the originally approved rates for these policy forms. On March 22, 2012 under SERFF tracking number NWLT-127404692 New York Life obtained approval of revised new business rates on these policy forms. The revised new business rates implemented in 2012 are not impacted by this rate increase request.

16. Analysis Performed to Consider a Rate Increase

The initial originally approved premium schedule was based on pricing assumptions believed to be appropriate, given industry experience available when the initial originally approved rate schedule was developed. The original pricing assumptions for claim costs, voluntary termination rates, and mortality were as follows:

a. Original Pricing Claim Costs. For nursing home and assisted living facilities, morbidity was based on data from the 1985 national nursing home survey, with adjustments to reflect anticipated insured morbidity in light of emerging company experience. Home and community based care claim costs were estimated at varying percentages of the nursing home assumed claim costs, ranging from 135% at attained age 50 grading down to 60% at attained ages 75 and over. Selection factors were applied to the ultimate claim costs.

   The lifetime benefit period option incorporated an additional load of approximately 22% and the 20-day elimination option had an additional load of 20% to account for additional anti-selection expected from purchasers of these plans.

b. Original Pricing Expected Voluntary Termination Rates. Vary by duration as shown in the following table.

Duration	Voluntary Lapse Rate
1	6.0%
2	4.0%
3	3.0%
4+	2.0%

c. Original Pricing Expected Mortality. Blended 1983 Individual Annuity Mortality Table with selection factors.

At the time the original rate schedule was priced, the management of New York Life determined that a rate schedule increase would be considered if the projected lifetime loss ratio exceeded a threshold equal to the pricing target lifetime loss ratio multiplied by 1.05. This equates to a threshold of 64.8% (= 61.7% reproduced pricing lifetime loss ratio * 1.05).

As part of the in-force management of the business, New York Life monitors the performance of the business by completing periodic analysis of morbidity and persistency. An analysis of the projected lifetime loss ratio based on current assumptions compared to that assumed at the time of original pricing revealed that experience has deteriorated significantly.

The assumptions used in this filing (described in Section 5) are based on actual in-force experience of New York Life, industry experience, and judgment. Actual persistency has been higher than that assumed in original pricing.

17. Requested Rate Increase and Demonstration of Satisfaction of Rating Requirements

New York Life is requesting the approval of an average premium rate increase of 18% on the original rates filed with the above-listed policy forms. The increase is needed due to higher than expected policy persistency, including both lower than expected mortality and lower than expected voluntary lapses. The company is requesting a 35% rate increase for policyholders with an issue age under 50, a 20.1% rate increase for policyholders with an issue age 50 and over, and a 0% rate increase for policyholders with an issue age of 75 or above. Policyholders who reach attained age 75 before their first policy anniversary on or after the rate increase implementation date will not receive an increase on any portion of premium (including CPI-U offers). The premium rate increase will not apply to CPI-U offers for policyholders with an attained age under 75 at their first policy anniversary on or after the rate increase implementation date, once they have reached attained age 75. The requested increase will be reduced, as needed, so that the premium rate schedule will not exceed the premium rate schedule for a policy at the same issue age providing similar benefits that is currently marketed in Virginia by New York Life.

The rate increase will be phased in over three years. For policyholders with an issue age under 50 the first rate increase will be15%, the second rate increase will be 10% and the third rate increase will be 10%, all on a simple basis. For policyholders with an issue age 50 and over, the first rate increase will be10%, the second rate increase will be 5.1% and the third rate increase will be 5.0%, all on a simple basis.

Although our analysis indicates that a rate increase is necessary at all ages, we have decided to forgo the increase for any of our insureds who have attained age 75 and above at the time of the increase. The company will be absorbing the cost of exempting those policyholders who have reached attained age 75 and the increases on those below age 75 have not been increased to subsidize policyholders with attained ages 75 and higher. We believe that this approach makes for good public policy and is consistent with our corporate values.

We recognize that this approach, which is in the best interests of our policyholders, deviates from Actuarial Standards of Practice #12, section 3.2.1.

Projected experience assuming the requested rate increase is implemented is shown in Exhibits II and III.

Exhibit X provides the Nationwide and Virginia-specific anticipated loss ratios where the numerator is equal to anticipated incurred claims less policy reserves and the denominator is equal to anticipated earned premium. The interest rate used for discounting values in Exhibit X is an interest rate consistent with that assumed at pricing in the determination of premiums.

Exhibit XI provides a demonstration that the requested rate increase meets the 58%/85% test required by rate stability regulation. This exhibit shows that the sum of the accumulated value of incurred claims without the inclusion of active life reserves, and the present value of future projected incurred claims, without the inclusion of active life reserves, will not be less than the sum of the following:

1. Accumulated value of the initial earned premium times 58%,
2. 85% of the accumulated value of prior premium rate schedule increases,
3. Present value of future projected initial earned premium times 58%, and
4. 85% of the present value of future projected premium in excess of the projected initial earned premium.

The historical and future projected incurred claims were increased by 5% from the best-estimate projections in Exhibit II to reflect assumptions that include moderately adverse conditions (equates to a 5% deterioration in the lifetime loss ratio as described earlier in this memorandum). Present and accumulated values in Exhibit XI are determined at the maximum valuation interest rate for contract reserves over the issue period, which varies by issue year from 4.0% to 4.5%. An interest rate of 4.0% was used to discount claim payments and reserves in calculation of the historical incurred claims. The values shown in Exhibit XI do not tie to those in Exhibit II because of differences in the interest rates used and because the incurred claims in Exhibit XI are increased by 5% to reflect moderately adverse experience.

Exhibit XII provides the status of the current nationwide rate increase on the above-referenced policy forms by jurisdiction.

Corresponding rate tables, for policyholders with attained ages under age 75, reflecting the rate increase and new business caps are enclosed with this memorandum in Exhibit XIII. The originally filed rate tables that will continue to apply for policyholders with attained age 75 and over are enclosed with this memorandum in Exhibit XIV.

Please note that the actual rates implemented may vary from those in Exhibits XIII and XIV slightly due to implementation rounding algorithms.

18. Virginia Average Annual Premium
(Annualized Premium Based on 2011 In-force)

Before Increase $1,739
After Increase* $2,122
**After increase average annual premium assumes rate increase implementation on policy anniversary date on or after 1/1/14 for determining attained age and includes estimated new business rate caps*

19. Proposed Effective Date

The rate increase will apply to policies on their policy anniversary date on or after at least a 60-day policyholder notification period following approval.

20. Number of Insureds and Annualized Premium

The number of insureds and annualized premium in force as of December 31, 2011 in this jurisdiction and nationwide are:

	Attained Age* <75		Attained Age* 75+		Total	
Jurisdiction	**Insured Count**	**Annualized Premium**	**Insured Count**	**Annualized Premium**	**Insured Count**	**Annualized Premium**
Virginia	3,239	$5,343,066	142	$537,809	3,381	$5,880,875
Subject to Loss Ratio Regulation	1	$1,358	1	$1,561	2	$2,919
Subject to Rate Stability Regulation	3,238	$5,341,708	141	$536,248	3,379	$5,877,956
Nationwide	72,008	$119,859,810	4,600	$15,406,169	76,608	$135,265,978

**Assumes rate increase implementation on policy anniversary date on or after 1/1/14 for determining attained age*

Actuarial Memorandum
March 24, 2015

21. Actuarial Certification

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries, and I meet the Academy's qualification standards for preparing health rate filings and to render the actuarial opinion contained herein.

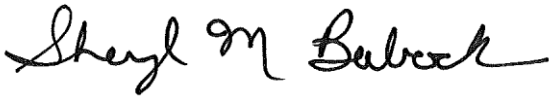
This memorandum has been prepared in conformity with all applicable Actuarial Standards of Practice, including ASOP #8, with the exception that this filing deviates from ASOP #12, section 3.2.1 as noted above.

I have relied on projection information provided by Amy Pahl, FSA, MAAA of Milliman Inc., who used data and assumptions from New York Life in developing those projections.

I hereby certify that, to the best of my knowledge and judgment, this rate submission is in compliance with the applicable laws and regulations of Virginia and the rules of the Bureau. In my opinion, the rates are not unfairly discriminatory and the gross premiums are not excessive and bear reasonable relationship to the benefits, based on the lifetime loss ratio exceeding the minimum loss ratio requirement.

I also hereby certify that:

1) to the best of my knowledge and judgment, this rate submission is in compliance with the provisions in 14 VAC5-200-153B2 and
2) if the rate increase is granted and the assumptions, which reflect moderately adverse conditions, are realized, then no further premium rate schedule increases are anticipated.
3) renewal premium rate schedules are not greater than new business premium rate schedules except for differences attributable to benefits.



Sheryl Babcock FSA, MAAA
Actuary, New York Life Insurance Company

Review Requirements Checklist
RATE REVISIONS

REVIEW REQUIREMENTS	REFERENCE	COMMENTS
General Filing Requirements		
	14 VAC 5-100-40	**For Paper Filings:** A letter of transmittal must be submitted in duplicate with each filing.
	14 VAC 5-100-40 6	**For Paper Filings:** At least one copy of each rate must be included in the filing. A duplicate copy of rates must be submitted if the company wants a "stamped" copy of forms for its records. A stamped self-addressed return envelope is required. The letter of transmittal must be addressed to, State Corporation Commission, Bureau of Insurance, P. O. Box 1157, Richmond, VA 23218.
	14 VAC 5-100-70	When an insurer submits a change of Individual accident and sickness premium rates previously filed with the Bureau of Insurance, the following information must be provided. 1. That the filing is an increase, decrease, or revision of former rate filings and the percentage mounts of such changes. 2. That the claim/earned premium loss ratio and other bases for such increase, decrease, or revision of premium rates. An actuarial memorandum and other relevant material should be attached to the letter of transmittal.
	Administrative Letter 1983-7	The transmittal letter must include the name and NAIC number of the company for which the filing is made.
All Accident and Sickness Forms	14 VAC 5-130-70 A	New Rate Sheet
	14 VAC 5-130-70 B	Actuarial Memorandum
	14 VAC 5-130-70 B 1	A description of the type of policy, including benefits, renewability, and issue age limits.
	14 VAC 5-130-70 B 2	The scope and reason for the rate revision.
	14 VAC 5-130-70 B 3	A comparison of the revised premiums with the current premium scale.
	14 VAC 5-130-70 B 4	A statement of whether the revision applies only to new business, only to in-force business, or to both.
	14 VAC 5-130-70 B 5	The estimated average annual premium per policy, before and after the proposed rate increase.
	14 VAC 5-130-70 B 6	Provide Earned Premiums, paid claims, incurred claims and loss from inception through most recent quarter.* Virginia and national experience should be shown separately. Missing experience should be estimated with all estimation assumptions and methodologies provided in detail.
	14 VAC 5-130-70 B 7	Details and dates of all past rate increases on this form.
	14 VAC 5-130-70 B 8	A description of how revised rates were determined, including the general description and source of each assumption used. For expenses, include percent of premium, dollars per policy, and/or dollars per unit of benefit.
	14 VAC 5-130-70 B 9	If the rate revision applies to new business, the anticipated loss ratio and a description of how it was calculated.

*The filing reflects data through the most recent, available calendar year.

REVIEW REQUIREMENTS	REFERENCE	COMMENTS
	14 VAC 5-130-70 B 10	If the rate revision applies to in-force business provide (a) the anticipated future loss ratio and a description of how it was calculated and (b) the estimated cumulative loss ratio, past and future and a description of how it was calculated.
	14 VAC 5-130-70 B 11	Minimum loss ratio presumed reasonable in 14 VAC 5-130-60 C.
	14 VAC 5-130-70 B 12	If 9, 10a, or 10b is less than 11, supporting documentation for the use of such premiums.
	14 VAC 5-130-70 B 13	The current number of Virginia policyholders and either premiums in force, premiums earned, or premiums collected for such policyholders in the year immediately prior to the filing of the rate increase.
	14 VAC 5-130-70 B 14	Certification by a qualified actuary that, to the best of the actuary's knowledge and judgment, the rate filing is in compliance with applicable laws and regulations of this Commonwealth and the premiums are reasonable in relation to the benefits provided.
	14 VAC 5-130-70 C	Revised rate filings for previously approved forms must demonstrate reasonableness of benefits in relation to premiums.
	14 VAC 5-130-70 C 1	The anticipated loss ratio over the entire period for which the revised rates are computed to provide coverage, and the ratio of the sum of the accumulated benefits from the original effective date of the form to the effective date of the revision and the present value of future benefits to the sum of the accumulated premiums from the original effective date of the form to the effective date of the revision and the present value of future premiums must be at least as great as the standards in 14 VAC 5-130-60 C.
	14 VAC 5-130-70 C 2	Revised premiums for policies issued on or after the effective date of the revision must meet the standards in 14 VAC 5-130-70 C, except the average annual premium shall be determined on actual rather than anticipated distribution of business.
Medicare Supplement Requirements		Applicable requirements for accident and sickness forms in addition to the following.
Standard Medicare Supplement Forms	14 VAC 5-170-120 A 2	All filings of rates and rating schedules shall demonstrate that expected claims in relation to premiums comply with the requirements of this section when combined with actual experience to date. Filings of rate revisions shall also demonstrate that the anticipated loss ratio over the entire future period for which the revised rates are computed to provide coverage can be expected to meet the appropriate loss ratio standards.

REVIEW REQUIREMENTS	REFERENCE	COMMENTS
Pre-Standardized Medicare Supplement Forms	14 VAC 5-170-120 A 3	For policies issued prior to July 30, 1992, expected claims in relation to premiums shall meet: a. The originally filed anticipated loss ratio when combined with the actual experience since inception; b. The appropriate loss ratio requirement from subdivisions 1 a and 1 b of this subsection when combined with actual experience beginning with July 1, 1991, to date; and c. The appropriate loss ratio requirement from subdivisions 1 a and 1 b of this subsection over the entire future period for which the rates are computed to provide coverage.
Annual Rate and Experience Filing	14 VAC 5-170-120 C	An issuer of Medicare supplement policies and certificates issued before or after July 30, 1992, in this Commonwealth shall file annually its rates, rating schedule, and supporting documentation including ratios of incurred losses to earned premiums by policy duration for approval by the State Corporation Commission in accordance with the filing requirements and procedures prescribed by the State Corporation Commission. The supporting documentation shall also demonstrate in accordance with actuarial standards of practice using reasonable assumptions that the appropriate loss ratio standards can be expected to be met over the entire period for which rates are computed. The demonstration shall exclude active life reserves. An expected third-year loss ratio which is greater than or equal to the applicable percentage shall be demonstrated for policies or certificates in force less than three years.
Actuarial Certification for Medicare Supplement Rate Filings	14 VAC 5-170-120 C	For annual rate and experience filings, an actuarial certificate by a qualified actuary that to the best of the actuary's knowledge and judgment, the following items are true with respect to the filing as follows: 1. The assumptions present the actuary's best judgment as to the reasonable value for each assumption and are consistent with the issuer's business plan at the time of the filing; 2. The anticipated lifetime loss ratio, future loss ratios, and except for policies issued prior to July 30, 1992, third-year loss ratios all exceed the applicable ratio; 3. Except for policies issued prior to July 30, 1992, the filed rates maintain the proper relationship between policies which had different rating methodologies; 4. The filing was prepared based on the current standards of practices as promulgated by the Actuarial Standards Board, including the data quality standard of practice, as described at www.actuary.org; 5. The filing is in compliance with the applicable laws and regulations in this Commonwealth; and 6. The premiums are reasonable in relation to the benefits provided.

Honorable Jacqueline Cunningham
Commissioner of Insurance
Virginia Bureau of Insurance (Bureau)
1300 East Main Street
Richmond, VA 23219

RE: New York Life Insurance Company (New York Life)
Company NAIC # 66915
SERFF Tracking # NWLT-128855863
Policy Forms: Comprehensive ILTC-5000, et al.
Nursing Home Only INH-5000, et al.

Dear Commissioner Cunningham:

These forms are existing individual policy forms providing comprehensive and nursing home only long-term care coverage. These policy forms were issued in Virginia beginning in December 2002 and are still being marketed in this jurisdiction with revised new business rates. Only two in-force policies were issued in Virginia prior to October 1, 2003, the effective date of rate stability in Virginia.

New York Life is requesting the approval of an average premium rate increase of 22.3% on the original rates filed with the above-listed policy forms. On March 22, 2012 under SERFF tracking number NWLT-127404692 New York Life obtained approval of revised new business rates on these policy forms. The revised new business rates implemented in 2012 are not impacted by this rate increase request. The increase on the originally filed rates is needed due to higher than expected policy persistency, including both lower than expected mortality and lower than expected voluntary lapses.

The company calculated the actuarially justified amount but limited the rate increase to 40%, as we are sensitive to the impact a rate increase will have on our policyholders. In addition, the company is exempting all policyholders with an attained age of 75 or above from this increase. This results in a requested increase of 0% for all policyholders with an attained age 75 or above, a 40% increase for all other policyholders with an issue age under 50, and a 25.1% rate increase for all other policyholders with an issue age 50 and over. The increased premium will be further limited to the premium rate schedule currently marketed in Virginia by New York Life.

Policyholders who reach attained age 75 before their first policy anniversary on or after the rate increase implementation date will not receive an increase on any portion of premium (including CPI-U offers). The premium rate increase will apply to CPI-U offers for policyholders with an attained age under 75 at their first policy anniversary on or after the rate increase implementation date

New York Life will offer insureds affected by the premium increase the option of reducing their policy benefits to provide flexibility of choice for those insureds who wish to maintain a premium level reasonably similar to what they were paying prior to the rate increase.

As New York Life is a mutual company and our LTC product is a participating policy, improvement in the performance of the product could lead to dividends being paid in the future.

A Contingent Nonforfeiture Benefit has previously been filed and is included with all ILTC-5000 and INH-5000 policies issued in the state.

The following electronic items are included with this submission:

- this cover letter;
- the Rate Revisions Checklist;
- an actuarial memorandum;
- rate schedules; and
- a sample policyholder rate increase notification letter*.

*In the future, slight variations in letter language may occur that do not materially change the information being provided to the policyholder. As the letter does not require Bureau approval, we understand that it will not be necessary to file each of these minor variations with the state of Virginia.

No filing fee is required for this submission.

Thank you for your assistance in reviewing this filing.

Respectfully,

Sheryl M Babcock

<CLIENT NAME STANDARD LETTER IP>
<ADDRESS 1>
<ADDRESS 2>
<ADDRESS 3>
<ADDRESS 4>

Dear valued policyholder:

Thank you for selecting New York Life Insurance Company (New York Life) to be the provider of your long-term care insurance coverage. On your next policy anniversary, <anniversary date>, your long-term care insurance premium is scheduled to increase to $<premium per mode> <mode>. Please note this amount is as of the date of this letter and may vary if you make changes to your coverage, including accepting inflation offers, if applicable. In advance of this increase, I want to share with you more about this change and our overall commitment to serving your long-term care insurance needs.

We began offering this valuable coverage in 1988 and since entering this market, we had never raised rates on existing policies. Based on experience, we are anticipating higher claims than originally expected. To meet the higher than expected costs of these claims, we applied for and were granted a rate change by the department of insurance in <State>, the issuing state for your policy. Please note that no insured is being singled out for this rate increase based on their advancing age or current health condition.

Your New York Life Long-term care insurance continues to provide important financial protection for you and your loved ones from the potential risks associated with long-term care costs. The following is a summary of your current benefit levels and the new premium for those benefits. In light of the premium increase, we are offering you two options.

1. **Maintain your current benefit levels at the increased premium rate:**
   - Annual Premium on your next anniversary — $<annual premium> annually
   - Current Policy Lifetime Maximum — $<policy max>
   - Current Nursing Home Daily Maximum Benefit — $<CNHDMB>
   - Current Benefit Period — <# of years or unlimited>

2. **Reduce coverage to keep your premium close to its current level. For example, you can do this by:**
   - Reducing your daily maximum benefit,
   - Reducing the benefit period, or
   - Cancelling any riders you may have purchased.

If you have an automatic payment method in place, through a checking account or payroll deduction, for example, you may need to make changes to ensure the correct premium amount is funded. Information on how to adjust payment amounts and other information you may find helpful is included with this letter. If you have additional questions before your new premium is implemented, call [your Agent, <agent name> at <agent phone>, or] our Policy Owner Services team at 1-800-224-4582 [Option 1, Option 1] Monday to Friday, 8am – 5pm CST.

Variable Paragraph: EXISTING CNF IP
[Your policy has a Contingent Nonforfeiture benefit. Your insurance rates are not guaranteed and could be increased again if rates are determined to be inadequate to support future claims obligations. If your premiums are substantially increased in the future and you choose to lapse your policy, you are eligible for reimbursement of qualified long-term care costs up to the premium you have paid for this policy. The specific criteria to trigger the Contingent Nonforfeiture benefit are described in your policy.]

Variable Paragraph: Changing CNF IP
[Your policy has a Contingent Nonforfeiture benefit. Your insurance rates are not guaranteed and could be increased again if rates are determined to be inadequate to support future claims obligations. If your premiums are substantially increased in the future and you choose to lapse your policy, you are eligible for reimbursement of qualified long-term care costs up to the premium you have paid for this policy. The specific criteria to trigger the Contingent Nonforfeiture benefit are described in the rider included within this packet. Please note that with this notice, we have updated this benefit. Please add the enclosed updated Contingent Nonforfeiture benefit rider to your files.]

Variable Paragraph: Existing Optional NF IP
[Your insurance rates are not guaranteed and could be increased again if rates are determined to be inadequate to support future claims obligations. Your policy has an Optional Nonforfeiture benefit rider. If you choose to lapse your policy, you are eligible for reimbursement of qualified long-term care costs up to the premium you have paid for this policy. The specifics of your Optional Nonforfeiture benefit rider are described in your policy.]

Variable Paragraph: Adding CNF IP
[Also note that we are adding a Contingent Nonforfeiture benefit to your policy at no additional cost. Your insurance rates are not guaranteed and could be increased again if rates are determined to be inadequate to support future claims obligations. With this benefit, if your premiums are substantially increased in the future and you choose to lapse your policy, you are eligible for reimbursement of qualified long-term care costs up to the premium you have paid for this policy. The specific criteria to trigger the Contingent Nonforfeiture benefit are described in the rider included within this packet. Please add the enclosed Contingent Nonforfeiture benefit rider to your files.]

Variable Paragraph: Adding Dividend
[Lastly, we are adding a Participating Policy Dividend Endorsement to your policy at no additional cost. As a mutual company, we are able to pass the benefit of positive results on to our policyholders. Adding this Dividend Endorsement feature to your New York Life policy means that, if we pay a dividend on our long-term care insurance policies in the future (dividends are not guaranteed), you would be eligible to receive a dividend in the form of a premium discount. Please add the enclosed Dividend Endorsement document to your files.]

Your decision to entrust New York Life with your long-term care insurance coverage is not one we take lightly. We appreciate the opportunity to serve your long-term care insurance needs and remain committed to helping you achieve long-term financial security for many years to come.

On behalf of New York Life,

Troy E. Glover
Senior Vice President

NAIC Model 880 Section 4 (G)(2)

Making or permitting any unfair discrimination between individuals of the same class and of essentially the same hazard in the amount of premium, policy fees or rates charged for any accident or health insurance policy or in the benefits payable thereunder, or in any of the terms or conditions of such policy, or in any other manner.

38.2 508 2 Virginia

2. Unfairly discriminate or permit any unfair discrimination between individuals of the same class and of essentially the same hazard (i) in the amount of premium, policy fees, or rates charged for any policy or contract of accident or health insurance, (ii) in the benefits payable under such policy or contract, (iii) in any of the terms or conditions of such policy or contract, or (iv) in any other manner;

20-448 (C) Arizona

As to kinds of insurance other than life and disability, a person shall not make or permit any unfair discrimination in favor of particular persons or between insureds or subjects of insurance having substantially like insuring, risk and exposure factors, or expense elements, in the terms or conditions of any insurance contract, or in the rate or amount of premium charged.

2304 (13)(b) Delaware

No person shall make or permit any unfair discrimination between individuals of the same class and of essentially the same hazard in the amount of premium, policy fees or rates charged for any policy of contract of accident or health insurance or in the benefits payable thereunder, or in any of the terms or conditions of such contract, or in any other manner whatever.

33-6-4 (8)(A)(ii) Georgia

Making or permitting any unfair discrimination between individuals of the same class and of essentially the same hazard in the amount of premium, policy fees, or rates charged for any policy or contract of accident or sickness insurance, in the benefits payable thereunder, in any of the terms or conditions of the contract, or in any other manner whatever.

26.1-04-03 (7)(b) North Dakota

Making or permitting any unfair discrimination, including consideration of an individual’s history or status as a subject of domestic abuse, between individuals of the same class and of essentially the same hazard in the amount of premium, policy fees, or rates charged for any policy or contract of accident or health insurance or in the benefits payable thereunder, or in any of the terms or conditions of such contract, or in any other manner whatsoever.

24-A 2159 (2) Maine

No person may make or permit any unfair discrimination between individuals of the same class and of essentially the same hazard in the amount of premium, policy fees, or rates charged for any policy or contract of health insurance or in the benefits payable thereunder, or in any of the terms or conditions of such contract, or in any other manner whatever. Nothing in this provision prohibits an insurer from providing incentives for insureds to use the services of a particular provider.

500.2020 Michigan

The following are defined as unfair methods of competition and unfair and deceptive acts or practices in the business of insurance:

Making or permitting any unfair discrimination between individuals of the same class and of essentially the same hazard in the amount of premium, membership, or policy fees, or rates charged for any policy or contract of accident or health insurance applicable to individual or family expense coverage or in the benefits payable thereunder, or in any of the terms or conditions of such contract, or in any other manner whatever.

1204 (7)(b) Oklahoma

Making or permitting any **unfair** discrimination between individuals of the same class and of essentially the same hazard in the amount of premium, policy fees, or rates charged for any policy or contract of accident or **health** insurance or in the benefits payable thereunder, or in any of the terms or conditions of such contract, or in any other manner whatever.

58-33-13 South Dakota

No person may make or permit any **unfair discrimination** between individuals of the same class and of essentially the same hazard in the amount of premium, policy fees, or rates charged for any policy of contract of health insurance or in the benefits payable thereunder, or in any of the terms or conditions of such contract, or in any other manner whatever. Violation of this section is a Class 2 misdemeanor. Nothing in this section prohibits different rates charged, or benefits payable, or different underwriting procedures used for individuals insured under a franchise plan or provided discounts based upon administrative savings or incentives for additional family members to purchase insurance.

27-12-11 (b) Alabama

No person shall make or permit any unfair discrimination between amount of premium, policy fees or rates charged for any policy or contract of disability insurance, or in the

benefits payable thereunder, or in any of the terms or conditions of such contract or in any other manner whatever.

56-8-104 (7)(C) Tennessee

Making or permitting any unfair discrimination between individuals of the same class and of essentially the same hazard in the amount of premium, policy fees or rates charged for any accident or health insurance policy or in the benefits payable under any accident or health insurance policy, or in any of the terms or conditions of the policy, or in any other manner.

Re: New York Life – Response to Objections of our Long-Term Care filing

The purpose of this letter is to respond to your objections on our recent LTC filing.

1. What other long term care business – group and individual – does the Company have in force? What is the reason for separating these forms from the other forms?

We have three older series of policy forms, which represent a very small part of our overall long-term care business in force. We chose not to request a rate increase on the three older policy forms series. The three blocks are very small, and many of the policyholders of these forms are elderly.

2. Please provide the attachments to the actuarial memorandum in Excel format, with working formulas. These are Exhibits II through XIV. Please expand Exhibit XIV to show the annual premium in force prior to the rate increase.

Attached are Exhibits II through XIV in Excel, for your review. The annual premium in force prior to the rate increase in shown in Exhibit II.

3. Please expand the results of the A/E studies. Provide the analysis in an Excel workbook.

> ***a. Lapses – Please include the exposure and the count of expected lapses. Please confirm the expected is based on the revised assumptions.***
> ***b. Mortality – Please include the exposures and the count of expected deaths. Please confirm the expected deaths are based on the revised assumptions and they reflect the mortality selection factors. What are the mortality selection factors? In addition to the policy year analysis provide two other analyses – one by gender and one by attained age groups. We are trying to confirm the fit is good across several key parameters.***
> ***c. Morbidity - Please include the exposures and the count of expected claims. Please confirm the expected claims are based on the revised assumptions and they reflect the morbidity selection factors. What are the morbidity selection factors? In addition to the calendar year analysis provide three other analyses – one by gender, one by attained age groups and one by policy duration. We are trying to confirm the fit is good across several key parameters.***

Attachment 1 provides the expanded results of the A/E studies in an excel workbook.
a. I can confirm that the expected is based on the revised assumptions.
b. I can confirm that the expected is based on the revised assumptions and that the expected reflect the mortality selection factors. The selection factors are included in Attachment 1. The A/E analysis by gender and attained age groups are also included in Attachment 1.
c. I can confirm that the expected is based on the revised assumptions and that the expected reflect the morbidity selection factors. The selection factors are included in Attachment 1. The A/E analysis by gender, issue age groups, and policy duration are also included in Attachment 1. This is one of several ways in which we analyze our actual to expected results to confirm the fit is good across key parameters.

4. Please provide a brief description of how the revised morbidity compares to the original morbidity assumption. We are seeking a measure of relative value. Please describe if the changes are driven by incidence or continuance or both. If both, give a ballpark estimate of how much of the change is driven by incidence vs. continuance.

The slope of the original morbidity curve was more gradual than the revised morbidity assumption. Attachment 2 shows sample pricing and best estimate claim costs at two key issue ages and benefit options. The change to the new morbidity assumption results in a slight decrease in the future projected lifetime loss ratio. Note that the requested rate increase is due to higher persistency, which includes lower mortality and lower ultimate lapses.

5. Please describe how you arrived at your 3 tiers of rate increases:

a. 0% for insureds with an attained age >74
b. 40% for insureds with attained age <75 and issue age <50
c. 25.1% for insureds with attained age 75 and issue age 50-74
d. All increases are capped at the rates recently approved and offered to new insureds.

What was the thinking behind the 40% and 25.1%? How frequently do the caps of the current rates come into play? Are any of the current rates actually less than the prior rates for specific cells?

We chose to limit the increase to 40% for issue ages under 50. Issue ages under 50 were more underpriced than issue ages 50+. The rate increase that can be justified for issue ages 50+ is 25.1%. The new business caps come into play somewhat frequently, most noticeably around issue age 62. Due to system constraints, there are seven cells for the Home Health Care premium rate schedules where the current rate is slightly less than the original rate: at issue age 77 and 83, unlimited benefit period option, and issue ages 84 and 85, 10 year benefit period and unlimited benefit period options. There are no policies issued in Virginia that are in force in these seven cells.

6. We understand that if an insured is currently less than age 75 and purchases additional coverage through the CPI-U option, he will pay at a higher rate. What happens to the same insured who, several years from now reaches age 75 and wishes to purchase additional coverage? Does he pay at the increased rate or the original premium rate?

The policyholder would pay the increased rate.

7. The actuarial memorandum states the projections recognize benefit buy-downs of 1.5%. Is there any related anti-selection associated with the buy-downs in the projections?

There was no anti-selection assumed in the projections.

8. The actuarial memorandum states the Company is absorbing the cost of exempting policyholders over attained age 74 from the rate increase. Please quantify this amount. Exhibit II shows the lifetime loss ratio with the rate increase is 57.9%. What would the lifetime loss ratio be if these older policyholders were not exempt?

The lifetime loss ratio would be 56.2%.

9. In the original pricing of this form, what was the target loss ratio?

The pricing target loss ratio was 60%, based on a discount rate of 4.5%.

10. 14 VAC5-200-153B2 requires statements that

a. if the rate increase is granted and the assumptions are realized, then no further rate increases are anticipated; and
b. the premium rate filing is in compliance with this section

Please provide a revised actuarial memorandum with these required statements.

The revised Actuarial Memorandum is attached.

11. Please provide the following distribution of the nationwide inforce business:

a. By gender
b. By issue year
c. By inflation option
d. By attained age
e. By marital status

To clarify, we are looking for five separate distributions, not a 5-dimensional distribution.

Attachment 3 shows the distribution of nationwide inforce business in the five separate distribution categories you requested.

12. Does the Company have any limited pay policies? If so, please provide a distribution of business by the various payment options. Please confirm the premium payment periods were properly reflected in the projections.

We do not have any limited pay policies in force.

13. Does the Company have any rate guarantees on this block? If so, please provide a distribution of business by the various length of the rate guarantees. Please confirm the rate guarantees were properly reflected in the projections.

These policies have a three year rate guarantee. The rate guarantees on the policies impact were properly reflected in the projections.

14. How are waived premiums handled in the financial exhibits? Are they a reduction to premiums or an addition to claims? Are they handled consistently between the historical period and the projection period?

Waived premiums are handled as an addition to claims and are included in premium. They are handled consistently between the historical period and the projection period.

15. Please submit the historical and projected experience of the policies added under the new premium rates. They too are part of the form and must be included. We are asking for the national experience on these policies with and without the rate increase. We are asking for the experience of these policies separately, so we can more easily evaluate their contribution to the form experience.

I believe you are referencing the new business rate change that was implemented on these forms effective January 1, 2012. The rate increase does not apply to any of the business issued on these forms after January 1, 2012 Data included in this filing was experience through December 31, 2011.

16. The filings states that policyholders who reach attained age 75 before their first policy anniversary on or after the rate increase implementation date will not receive an increase on any portion of premium (including CPI-U offers). Please provide a legal analysis that addresses why the company's proposal is not in violation of unfair discrimination laws as set forth in § 38.2-508 2 of the Code of Virginia.

New York Life has chosen not to seek a rate increase out of sensitivity to our most elderly customers. It is important to note that other policyholders will not be subsidizing this carve out. The rates for a 74 year old would be the same if we raised rates on those over attained age 75. In other words, the rate increase on the 74 year old is unaffected by the attained age carve out. The rate increase would be the same either way. Our decision is based on the fact that most of these people have retired and have been living on a fixed income for some period of time. It is these insureds we expect to have the most difficult time affording a rate increase at a time when they most likely will need the protection.

To date, we are aware of at least 10 states (AL, AZ, DE, GA, ME, MI, ND, OK, SD and TN) whose unfair discrimination laws are substantially similar to Virginia's statute have approved the same carve out for age 75 and above. These states were able to overcome their unfair discrimination laws in approving the filing (presumably for the same policy reasons in which we submitted it). I have attached those states' laws as attachment 4 for your reference.

We currently have 26 states that have approved our rate increase: 25 out of 26 of these states have approved the rate increase with the attained age carve out.

Also note that we have refined our rate calculation on five riders to ensure they are consistent with our new business rate caps for these rates. The riders are the 3% compound, 4% compound, the level funded Auto-CPI-U, the level funded auto-CPI-U +1%, and the level funded Auto-CPU-U+2%. In all cases the rates are the same or lower than what was previously submitted. These revised rates are included in the Excel workbooks being provided as part of Exhibit XIII and Exhibit XIV.

Re: New York Life – Response to Objections of our Long-Term Care filing

The purpose of this letter is to respond to your objections on our recent LTC filing.

1. The experience and projections need to be split between pre and post rate stabilization projections. We understand that only 2 policies were issued in Virginia prior to the rate stabilization date of October 1, 2003. But the same is not true for nationwide. Please resubmit Exhibits II through XII in Excel format with the pre and post rate stabilization split.

Attached are revised Exhibits II through XI with the pre and post rate stabilization split out separately, on a nationwide basis. Also attached is an updated Exhibit XII.

2. Demonstrate the experience under pre-rate stabilization meets the 60% loss ratio requirement. Demonstrate the experience under the post rate stabilization meets the 58% / 85% loss ratio requirement. Provide the annual "best estimate" active life reserve balances for the nationwide pre rate stabilization policies only.

The 5.0 LR Exhibit II demonstrates that the pre rate stabilization block meets the 60% loss ratio requirement and the 5.0 RS Exhibit IX demonstrates that the post rate stabilization block meets the 58%/85% loss ratio test. The best estimate active life reserve balances are included in the 5.0 LR Exhibit VIII.

3. Provide the same distributions of business previously provided, but split between pre and post rate stabilization policies.

Attached are the exhibits that provide the distribution of business split between pre and post rate stabilization policies.

4. The revised lapse assumption varies by issue age, policy duration and marital status. Please provide an Actual to Expected study with the same variables. Show the exposure, actual lapses and expected lapses for each cell. We appreciate there will be volatility in those results. Does the lapse study include the experience of these forms only or does it include other forms? Is it experience from inception or is it limited. How does the revised lapse assumption compare to the lapse assumption used to recently re-price the product?

I am attaching an updated lapse study with the information requested. The lapse study includes the experience of all of our long-term care policy forms, but only includes all data from calendar years 2008 and later. The lapse assumption used to re-price the product was the same as the best estimate assumption shown in this rate filing at the ultimate durations.

5. Is the revised mortality assumption the 1994 GAM basic or static table? Please confirm there are no adjustments other than the selection factors and mortality improvements. Your response state the mortality selection factors were in Attachment 1. We saw the morbidity selection factors, but not the mortality selection factors, unless you are using the A/E ratios as selection factors. Please provide the mortality selection factors. Does the Actual to Expected analysis include the experience of these forms only or does it include other forms? Please give a more complete description of the mortality improvement assumption. How does the revised mortality assumption compare to the assumption used to recently re-price the product?

The mortality study included all historical long term care policies issued through March 31, 2011 with experience developed through September 30, 2011. Deaths for both active and disabled insureds were included in the study. The expected mortality table underlying the study was the sex distinct 1994 Group Annuitant Mortality (1994 GAM) table with selection factors.

I apologize for not including the selection factors in my previous response. I am including a revised attachment 1 with the mortality selection factors listed. The mortality improvement uses scale AA from 2002 to 2011. There are no other adjustment other than the selection factors and mortality improvements.

The mortality assumption used to re-price the product was slightly more conservative than our best estimate assumption shown in this rate filing.

6. The actual to expected morbidity analysis shows experience back to 1991. Confirm our understanding that the actual to expected analysis is based on more experience than just this form. Does it include all Company experience or just certain subsets? Please describe the source for this analysis. Do you expect the morbidity to be uniform across the various blocks of business or has the underwriting changed over time?

For the purposes of the actual to expected morbidity analysis, the 4.0 and 5.0 policy series experience was combined. The 4.0 and 5.0 series were analyzed together because the products features are very similar and also due to a lack of claim credibility in the 5.0 series.

7. Your response to the question on unfair discrimination shows 26 states have approved the rate increase. Please provide a revised Exhibit XII which shows the approvals by state. Provide this in an Excel workbook. Include the inforce premium before the increase, by state and by the 3 increase categories of issue age < 50, issue age > 50 and attained age >74.

Attached is a revised Exhibit XII in an Excel format which includes the information requested.

8. Do the projections include any future purchases under the inflation option?

The projections do not assume any additional future purchases under any of the optional future purchase election riders.

9. Do the projections include any premium reductions due to shock lapses beyond the 2.4% benefit buy-down?

No.

10. The filing states that the company intends to absorb the lost premiums on those policyholders that will not receive the proposed rate increase. In the prior objection letter, the company was requested to address how it intends to do this; and will not potentially seek to have the other policyholders subsidize the lost premiums. The company's response does not appear to address this concern. It would appear that future projections should account for the premium increases not implemented for those over the age of 75 in some manner.

As we discussed, if we were to ever request an additional rate increase, we would develop future projections as if the premium increases were implemented on all policyholders.

Anticipated Loss Ratios
Experience as of December 31, 2011
Generation 5.0 Policy Forms

Nationwide Experience Projections On Policies Issued On Or After October 1, 2003
With No Increase

1	Present Value of Future Claims:	1,281,049,691
2	Active Life Reserves at 12/31/2011:	290,091,888
3	Present Value of Future Premium:	1,447,464,763
	Anticipated Loss Ratio = (1 - 2) / 3:	**68.5%**

Virginia-Specific Experience Projections On Policies Issued On Or After October 1, 2003
With No Increase

1	Present Value of Future Claims:	59,009,583
2	Active Life Reserves at 12/31/2011:	14,312,046
3	Present Value of Future Premium:	66,002,741
	Anticipated Loss Ratio = (1 - 2) / 3:	**67.7%**

Exhibit XI
New York Life Insurance Company
Nationwide 58/85 Test On Policies Issued On Or After October 1, 2003, With Increase
Generation 5.0 Policy Forms

1	Accumulated value of initial earned premium	558,054,862	x 58% =		323,671,820
2a	Accumulated value of earned premium	558,054,862			
2b	Accumulated value of prior premium rate schedule increases (2a - 1)	0	x 85% =		0
3	Present value of future projected initial earned premium	1,773,761,835	x 58% =		1,028,781,864
4a	Present value of future projected premium	2,104,494,486			
4b	Present value of future projected premium in excess of the projected initial earned premiums (4a - 3)	330,732,651	x 85% =		281,122,753
5	**Lifetime Earned Premium Times Prescribed Factor: Sum of 1, 2b, 3, and 4b**				**1,633,576,438**
6a	Accumulated value of incurred claims without the inclusion of active life reserves				41,840,618
6b	Present value of future projected incurred claims without the inclusion of active life reserves				2,162,010,796
7	**Lifetime Incurred Claims with Rate Increase: Sum 6a and 6b**				**2,203,851,414**
8	Test: 7 is not less than 5				TRUE

All values are accumulated or discounted at the maximum valuation interest rate for contract reserves.
The incurred claims (items 6a and 6b) were increased by 5% to reflect moderately adverse experience.

1	Present Value of Future Claims:	40,887
2	Active Life Reserves at 12/31/2011:	17,965
3	Present Value of Future Premium:	31,301
	Anticipated Loss Ratio = (1 - 2) / 3:	**73.2%**

Exhibit XI
New York Life Insurance Company
Nationwide 58/85 Test On Policies Issued Prior To October 1, 2003, With Increase
Generation 5.0 Policy Forms

1	Accumulated value of initial earned premium	57,339,996	x 58%	=	33,257,198
2a	Accumulated value of earned premium	57,339,996			
2b	Accumulated value of prior premium rate schedule increases (2a - 1)	0	x 85%	=	0
3	Present value of future projected initial earned premium	58,109,277	x 58%	=	33,703,381
4a	Present value of future projected premium	67,353,244			
4b	Present value of future projected premium in excess of the projected initial earned premiums (4a - 3)	9,243,966	x 85%	=	7,857,372
5	**Lifetime Earned Premium Times Prescribed Factor: Sum of 1, 2b, 3, and 4b**				**74,817,950**
6a	Accumulated value of incurred claims without the inclusion of active life reserves				10,880,133
6b	Present value of future projected incurred claims without the inclusion of active life reserves				94,876,745
7	**Lifetime Incurred Claims with Rate Increase: Sum 6a and 6b**				**105,756,878**
8	Test: 7 is not less than 5				TRUE

All values are accumulated or discounted at the maximum valuation interest rate for contract reserves.
The incurred claims (items 6a and 6b) were increased by 5% to reflect moderately adverse experience.

Expanded Narrative – VA

Long-term care insurance is a relatively new industry with only a few decades long history. Based on limited historical experience, it has been difficult to project future claims and price products appropriately. Over time, this resulted in the industry experiencing higher than expected claims relative to the assumptions made when the products were originally priced. We began offering this product in 1988 and since entering this market, we have never raised rates on existing policies. However, we have seen a gap develop between the original pricing assumptions and our actual experience and now find it necessary to adjust premiums to better align with the actual experience of the products.

Re: New York Life – Response to Objections of our Long-Term Care filing

The purpose of this letter is to respond to your objections on our recent LTC filing.

You provided a state grid of your filing approvals. That grid showed the premiums for each of the rate increase categories of issue age < 50, issue age 50+ and attained age 75+. When we calculate a weighted average, we arrive at an average 26.6% increase for Virginia policyholders. But the filing states the average increase is 22.3%. Is the entire difference attributable to the capping of premium rates by the currently marketed premium rates in Virginia? Or is there another explanation?

You are correct. The entire difference can by attributable to the capping of the premium rates by the currently marketed premium rates.

The submission indicates the revised new business rates implemented in 2012 are not impacted by this rate request. Please include in the actuarial certification a statement pursuant to 14 VAC5-200-153 B4 that the renewal premium rates schedules are not greater than new business premium rate schedules except for differences attributable to benefits, unless sufficient justification is provided to the commission.

The revised actuarial certification is included in the revised Actuarial Memorandum.

The Actuarial Certification in the Actuarial Memorandum appears to only apply to those policies issued after post stabilization. Because this filing also applies to pre-stabilization plans, please provide the appropriate actuarial certification applicable to such plans.

The revised actuarial certification is included in the revised Actuarial Memorandum.

Affected Form Numbers under the Rate/Rule Schedule includes the term "et al". Please amend the Affected Form Numbers to list each policy form and rider form numbers for which the rate increase applies and separate each with commas. The affected form numbers should match exactly the form numbers as approved in Virginia. Please clearly indicate these rates do not apply to new business as noted above.

The Affected Form Numbers under the Rate/Rule Schedule have been updated to list each policy form and rider form numbers for which the rate increase applies and separate each with commas.

Please complete the attached Rate Summary. This form is now required for Long Term Care rate filings. Our expectation is that the form would put into consumer friendly language a clear explanation of the justification for the rate increase. This should be fairly high level and not drill down deep into the details but at least explain to the consumer the assumptions and changes that are driving the need for an increase.

The Rate Summary is attached.

In reviewing the policyholder letter, we request the following changes be made:

Please expand on the reason for the rate increase as to why the company is anticipating higher claims than originally expected in terms the consumer can understand. The next sentence should be amended to state "The Virginia Bureau of Insurance reviewed the filing for compliance with applicable Virginia laws and regulations governing Long Term Care Insurance; and because it was found to be compliant with these laws and regulations, it was approved."

The first paragraph on the second page indicates information on how to adjust the payment amount and other helpful information is included with the letter. Please provide us with a copy of all additional documents that may be included with the letter. Please provide us with the form numbers, SERFF tracking numbers, and approval dates for the Contingent Nonforfeiture benefit rider and Dividend Endorsement form referenced in the letter. If these forms are not already approved, this can either be done as a separate filing or the company can amend this filing to include it. Any submitted form will need to comply with the filing requirements of Chapter 100 of the Virginia Administrative Code.

Since there is variable information contained in the letter, please provide a statement of variability explaining when such variable paragraphs will or will not appear in the letter.

The revised policyholder letter is attached. Also included are all additional documents that may be included with the letter, and the statement of variability explain when such variable paragraphs will or will not appear in the letter.

The form numbers, SERFF tracking numbers, and approval dates for the Contingent Nonforfeiture benefit rider and Dividend Endorsement form referenced in the letter are as follows:

Form Name	Form#	Approval Date	SERFF Filing #
Cont. Nonf. Rider	ALTC-4019 (VA) (0113)	6/14/13	NWLT128846373
PAR Div. Endorsement	ALTC-4050 (0113)	6/14/13	NWLT-128846373

It is my understanding the company is not adverse to implementing the rate increase over a three year period. As a result, the following would be needed in addition to the above:

1) A revised Actuarial Memorandum stating such
2) Rate schedules for each policy and rider forms for each period attached to the Rate/Rule Schedule
3) The policyholder letter would need to clearly indicate the ultimate rate increase and that it was being implemented over a three year period. The premium amount and effective date for each period must be included in the letter.

A revised Actuarial Memorandum and revised rate schedules for each policy and rider forms for each period attached are the Rate/Rule Schedule Tab. The policyholder letter indicates the implementation of the rate increase over a three year period.

Insured:
<Name>
Policy: <policy number>

If you have questions, call us at <1-800-890-7798>.

Dear valued policyholder:

Thank you for selecting New York Life Insurance Company (New York Life) to be the provider of your long-term care insurance coverage. New York Life is in the process of making changes to its premium rates, which will apply to your policy. Over the next three years, your long-term care insurance premium is scheduled to increase by <TOTAL PERCENTAGE INCREASE> to a total annual premium of <TOTAL annual premium>. The specifics of how this increase will be implemented are outlined in this letter. Please note the premium amounts are as of the date of this letter and may vary if you make changes to your coverage, or have inflation adjustments, if applicable. In advance of this increase, I want to share with you more about this change and our overall commitment to serving your long-term care insurance needs.

We began offering this valuable coverage in 1988 and since entering this market, we had never raised rates on existing policies. We are anticipating higher claims than originally expected due to longer life expectancies and an increased need for long-term care benefits. To meet the higher than expected costs of these claims, we applied for a rate change in Virginia, the issuing state for your policy. New York Life cannot change the terms of your policy without your consent, unless required by federal or state law, but we may change premium rates. The Virginia Bureau of Insurance reviewed the filing for compliance with applicable Virginia laws and regulations governing Long-Term Care Insurance, and it was found to be compliant. Please note that no insured is being singled out for this rate increase based on their advancing age or current health condition.

Your New York Life long-term care insurance continues to provide important financial protection for you and your loved ones from the potential risks associated with long-term care costs. You have the right, subject to the terms of this policy, to continue this policy as long as you pay the premiums on time. On your next policy anniversary, <anniversary date>, your long-term care insurance premium is scheduled to increase by <FIRST PHASE PERCENTAGE INCREASE> to $<premium per mode> <mode>. Next year, on <second anniversary date>, it will increase by <SECOND PHASE PERCENTAGE INCREASE>, to $<premium per mode> <mode>, and on <third anniversary date>, it will increase by <THIRD PHASE PERCENTAGE INCREASE>, bringing your total premium to $<premium per mode> <mode>.] The following is a summary of your current benefit levels and the premium due on your next anniversary for those benefits. In light of the premium increase, we are offering you two options.

1. **Maintain your current benefit levels at the increased premium rate:**
    - Annual Premium on your next anniversary $<annual premium>
    - Current Policy Lifetime Maximum $<policy max>
    - Current Nursing Home Daily Maximum Benefit $<CNHDMB>
    - Current Benefit Period <# of years or unlimited>

2. **Reduce coverage to keep your premium close to its current level. For example, you can do this by:**
    - Reducing your daily maximum benefit,
    - Reducing the benefit period, or
    - Cancelling any riders you may have purchased.

If you have an automatic payment method in place, through a checking account or payroll deduction, for example, you may need to make changes to ensure the correct premium amount is funded. Information on how to adjust payment amounts and other information you may find helpful is included with this letter. If you have additional questions before your new premium is implemented, call [your Agent, <agent name> at <agent phone>, or] our Policy Owner Services team at <1-800-890-7798> Monday to Friday, 8am – 5pm CST.

Variable Paragraph: EXISTING CNF
[Your policy has a Contingent Nonforfeiture benefit. While we do not anticipate it, your insurance rates could be increased again if rates are determined to be inadequate to support future claims obligations. If your premiums are substantially increased in the future and you choose to lapse your policy, you are eligible for reimbursement of qualified long-term care costs up to the premium you have paid for this policy. The specific criteria to trigger the Contingent Nonforfeiture benefit are described in your policy.]

Variable Paragraph: Existing Optional NF
[While we do not anticipate it, your insurance rates could be increased again if rates are determined to be inadequate to support future claims obligations. Your policy has an Optional Nonforfeiture benefit rider. If you choose to lapse your policy, you are eligible for reimbursement of qualified long-term care costs up to the premium you have paid for this policy. The specifics of your Optional Nonforfeiture benefit rider are described in your policy.]

Variable Paragraph: Adding CNF
[Also note that we are adding a Contingent Nonforfeiture benefit to your policy at no additional cost. While we do not anticipate it, your insurance rates could be increased again if rates are determined to be inadequate to support future claims obligations. With this benefit, if your premiums are substantially increased in the future and you choose to lapse your policy, you are eligible for reimbursement of qualified long-term care costs up to the premium you have paid for this policy. The specific criteria to trigger the Contingent Nonforfeiture benefit are described in the rider included within this packet. Please add the enclosed Contingent Nonforfeiture benefit rider to your files.]

Variable Paragraph: Adding Dividend
[Lastly, we are adding a Participating Policy Dividend Endorsement to your policy at no additional cost. As a mutual company, we are able to pass the benefit of positive results on to our policyholders. Adding this Dividend Endorsement feature to your New York Life policy means that, if we pay a dividend on our long-term care insurance policies in the future (dividends are not guaranteed), you would be eligible to receive a dividend in the form of a premium discount. Please add the enclosed Dividend Endorsement document to your files.]

Your decision to entrust New York Life with your long-term care insurance coverage is not one we take lightly. We appreciate the opportunity to serve your long-term care insurance needs and remain committed to helping you achieve long-term financial security for many years to come.

On behalf of New York Life,

Shawna Meyer

First 4 Letters of Insured's Last Name: ☐☐☐☐

Life Insurance Policy Number: ☐☐☐☐☐☐☐☐

Insured Name: ☐☐☐☐☐☐☐☐☐☐ ☐ ☐☐☐☐☐☐☐☐☐☐

IMPORTANT: The Internal Revenue Service (IRS) requires that you complete the following section. See important tax information on page 3 before you make your withholding election. If your taxpayer identification number is not furnished, we are required by Federal law to withhold 10% of the taxable gain. Withholding election is not required for withdrawal from Dividend Deposits.

Income Tax Withholding Election

Policyowner's Taxpayer Identification Number is ☐☐☐☐☐☐☐☐☐

(For individuals, this is usually your Social Security number and for other entities, it is the employer identification number (EIN))

Are you a citizen of the United States? ☐ Yes ☐ No

I elect to have the following withholding option applied to this payment and any future payments under this policy (please check only one box):

☐ NO Federal or State income taxes will be withheld

☐ ONLY Federal income taxes withheld
(This option may not be available for residents of certain states. See the State Income Tax Withholding section of the form.)

☐ BOTH Federal and State income taxes will be withheld

☐ ONLY State income taxes withheld

If you elected any of the options above in which taxes will be withheld, you can specify the tax withholding percentage **(%) of each withdrawal you would like to have applied to Federal and/or State income tax withholding. If a specific tax withholding amount is not indicated below, we will withhold 10% for federal tax purposes and the state's minimum withholding (if applicable). Please fill in items (1) and (2).**

(1) I would like to apply ☐☐% of the taxable portion to State Withholding.

(2) I would like to apply ☐☐% of the taxable portion to Federal Withholding.

*If you elect to have Federal income tax withheld, we are required to withhold at least 10% of the taxable portion of the distribution. If your state requires withholding, we will withhold the state's minimum amount if you select an amount that is less than the minimum. Please see the State Income Tax Withholding section on page 3 for more information.

Signature and Other Requirements

The signatures on page 4 are required:

a) Where the owner is a corporation, the form must be signed on behalf of the corporation by two corporate officers, one of whom may be either the treasurer or secretary.

b) Where the owner is a partnership, the form must be signed by two partners other than the Insured. In the case of a limited partnership, only the signature of a general partner is required.

c) Where the policy is assigned, the assignee's signature is required in addition to the policyowner's signature.

d) Where the policyowner is a person acting as guardian, conservator or in a similar capacity, evidence of appointment must accompany the form.

Important Tax Information

You should consider very carefully which box you check on page 2. You should consult with your personal tax advisor, plan administrator, State income tax authority, or your local IRS office if you have any questions about income tax withholding. IRS publication 505 (Tax Withholding and Estimated Tax) and IRS forms W-9 and W-4P.

Federal Income Tax Withholding

A dividend withdrawal from your policy may result in a taxable gain reportable to the IRS on Form 1099. Federal income taxes must be withheld at a flat 10% rate from the taxable portion of your payment (as determined from our records), unless you elect not to have withholding apply by checking the appropriate box in the Income Tax Withholding Election section on this form. Non-persons such as corporations, companies, trusts, etc. or U.S. citizens living outside the United States cannot elect out of withholding. (Your election as to whether taxes are or are not to be withheld will apply to any other payments from the same policy. You may change your withholding election at any time.) In addition, a 10% IRS penalty may be imposed if you receive the payment prior to age 59½, unless you are disabled or some other exception applies.

Even if you elect not to have Federal income tax withheld, you are liable for payment of such tax on the taxable portion of your payment. There are penalties under the estimated tax payment rules if enough tax has not been paid through either estimated tax payments or withholding. If the taxable portion of a payment when added to the taxable portion of all other payments during the year is less than $200, Federal income tax is not required to be withheld.

State Income Tax Withholding

In addition to the Federal income tax withholding requirements, some states require withholding on policy gains when federal income tax is withheld. As of January 1, 2012, the following states require state income tax withholding when federal income tax withholding is in effect: District of Columbia, Iowa, Kansas, Maryland, Massachusetts, Nebraska, Oklahoma, and Virginia. If you live in Arkansas, California, Delaware, Georgia, Maine, North Carolina, Oregon, or Vermont we are required to withhold state income tax if federal income tax withholding is in effect, unless you elect not to have state income tax withheld. If you live in the District of Columbia, District of Columbia withholding is required for lump sum distributions from qualified contracts. If you live in Michigan, we are required to withhold state income tax from the taxable portion of your payments, unless you provide us with a properly completed Form MI W-4P and you claim an exemption from withholding. Certain exceptions and special rules apply in some states. For more information regarding the withholding requirements applicable in your state, please consult your tax advisor or state tax authority.

If you reside in any of the following states and request state tax withholding, you must also specify the percentage of state tax withholding that you choose to apply to the taxable portion of the withdrawal: Alabama, Arizona, Colorado, Connecticut, Idaho, Illinois, Indiana, Kentucky, Louisiana, Michigan, Minnesota, Missouri, Montana, New Jersey, New Mexico, New York, North Dakota, Ohio, South Carolina, Utah, West Virginia, and Wisconsin. **In these states, if a percentage is not specified, state tax will not be withheld.**

Required Signature(s)

The following additional signatures are required:

a) Where the owner is a corporation, the form must be signed on behalf of the corporation by two corporate officers, one of whom may be either the treasurer or secretary.

b) Where the owner is a partnership, the form must be signed by two partners other than the Insured. In the case of a limited partnership, only the signature of a general partner is required.

c) Where the policy is assigned, the assignee's signature is required in addition to the policyowner's signature. If the assignee is a bank or corporation, two officers must sign.

d) Where the policyowner is a person acting as guardian, conservator or in a similar capacity, evidence of appointment must accompany the form.

Instructions

This form must be received in good order by the 20th of the month prior to the beginning month to ensure the proper start date. *Example: If the form is received on May 20th, the start month may be June. If the form is received on May 27th, the start month may not be until July.*

- Initial minimum account value: $10,000.
- The MainStay Fund account must be established at least 10 days prior to the first systematic withdrawal or six months for Variable Products.
- Monthly checks are paid from reinvested dividends and capital gains, then, to the extent necessary, from principal.
- Continued withdrawals in excess of current income will eventually deplete the principal.
- Please note that if this occurs, you will be responsible for paying your scheduled premium payments to keep your policy in force.
- Dividends and capital gains must be reinvested under the Systematic Withdrawal Plan.

Payment code key: P = Premium Payment
O = OPP/Additional Payment
C = Combination of Above

IRA Withholding Information:

Federal Withholding

The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) requires us to withhold federal income tax at the rate of 10% from your IRA distribution unless you elect not to have withholding apply. Check the applicable box if you do not want any federal income taxes withheld from your IRA distributions. If you choose to have taxes withheld from your IRA distributions, please increase the amount of your withdrawal so that after the withholding is taken, the net amount covers your premium. You can change this election at any time by completing a new MainStay Systematic Withdrawal Plan to Pay New York Life Insurance Premiums form. Even if you elect not to have any federal income taxes withheld, you are liable for payment of taxes on the taxable portion of your distributions. You also may be subject to penalties under the estimated tax payment rules if your payments of estimated tax withholding are not adequate.

State Withholding

In addition to the federal income tax withholding requirements, some states require withholding of state income taxes. Although state laws differ, those states requiring withholding generally allow you to elect out of withholding. The states requiring withholding as of January 1, 2013, are AR, CA, DE, DC, GA, IA, KS, MA, MD, ME, MI, MS, NC, NE, OK, OR, VA and VT. The state withholding election on this form relates only to these states. If you are unsure as to whether your state requires withholding, consult your tax advisor.

Instructions

This form must be received in good order by the 20th of the month prior to the beginning month to ensure the proper start date. *Example: If the form is received on May 20th, the start month may be June. If the form is received on May 27th, the start month may not be until July.*

- Initial minimum account value: $10,000.
- The MainStay Fund account must be established at least 10 days prior to the first systematic withdrawal or six months for Variable Products.
- Monthly checks are paid from reinvested dividends and capital gains, then, to the extent necessary, from principal.
- Continued withdrawals in excess of current income will eventually deplete the principal.
- Please note that if this occurs, you will be responsible for paying your scheduled premium payments to keep your policy in force.
- Dividends and capital gains must be reinvested under the Systematic Withdrawal Plan.

Payment code key: P = Premium Payment
O = OPP/Additional Payment
C = Combination of Above

IRA Withholding Information:

Federal Withholding

The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) requires us to withhold federal income tax at the rate of 10% from your IRA distribution unless you elect not to have withholding apply. Check the applicable box if you do not want any federal income taxes withheld from your IRA distributions. If you choose to have taxes withheld from your IRA distributions, please increase the amount of your withdrawal so that after the withholding is taken, the net amount covers your premium. You can change this election at any time by completing a new MainStay Systematic Withdrawal Plan to Pay New York Life Insurance Premiums form. Even if you elect not to have any federal income taxes withheld, you are liable for payment of taxes on the taxable portion of your distributions. You also may be subject to penalties under the estimated tax payment rules if your payments of estimated tax withholding are not adequate.

State Withholding

In addition to the federal income tax withholding requirements, some states require withholding of state income taxes. Although state laws differ, those states requiring withholding generally allow you to elect out of withholding. The states requiring withholding as of January 1, 2013, are AR, CA, DE, DC, GA, IA, KS, MA, MD, ME, MI, MS, NC, NE, OK, OR, VA and VT. The state withholding election on this form relates only to these states. If you are unsure as to whether your state requires withholding, consult your tax advisor.

Policyholder Information
Changes to Our Long-Term Care Insurance Rates

If you have additional questions after reviewing this information, please contact your New York Life Agent or our Policy Owner Services team at 1-800-890-7798, Monday to Friday, 8am – 5pm CT.

1. **Why do companies seek increases on inforce long-term care insurance policies?**

   Long-term care insurance (LTCi) is a relatively new industry with only a few decades-long history. With limited historical experience, it has been difficult to project future claims. As the industry has gained experience, insurers are now anticipating higher claims than expected when products were originally priced. As a result, many companies have requested rate increases on exisiting policies.

2. **Is there a provision in my policy that allows you to raise my premiums?**

   Yes. There is a provision on the first page of your policy regarding premium rate changes. It states that after any rate guarantee expires (if applicable), we have the right to change or increase premiums, as long as it applies to a class of policies (i.e. policyholders who purchased the same product). We are required to submit premium increases to the Department of Insurance or Department of Financial Services in each state with an actuarial explanation for the increase.

3. **Will I get another increase in the future?**

   This is the first time New York Life has sought a rate increase on existing policies. When the product was originally priced, we made every effort to price it accurately and conservatively. However, we find it necessary to adjust rates at this time. Your insurance rates are not guaranteed and could be increased again in the future if rates are determined to be inadequate to support future claims obligations.

4. **I live in one state but my increase is based on another state. Why?**

   The increase is based on the state in which your policy was issued.

5. **I would like to keep my policy, but do not feel I can afford to pay the new premium amount. What can I do?**

   We encourage you to contact your Agent or our Policy Owner Services team and they can work with you to adjust your policy so that it best meets your current financial needs.

6. **What happens if I pay the old premium amount, not the new premium amount?**

   If the full premium due is not received within 20 days after the payment due date, you will receive a reminder letter requesting full payment. If full payment is not received within the time frame stated in your contract, your policy will eventually be terminated for non-payment. The process follows the normal procedures in any situation when full premium is not received. If you do not feel you can afford the new premium amount, please see question 5 above.

7. **I would like to keep my policy and pay the new premium amount. What do I need to do?**

   Depending on how you pay your premium, you may need to take action to adjust the premium amount funded. A list of the various payment methods follows, along with a brief explanation of what you may need to do to adjust the amount being processed.

   You will receive an invoice approximately 3 weeks before your new premium payment is due. Also note, if you have made recent changes to your policy (e.g. within 30 days prior to the date of the enclosed letter) or make changes between now and your anniversary date, those changes may not be reflected in the new premium amount communicated in the enclosed notification letter. If you made a recent change and want to confirm your new premium amount, you can contact our Policy Owner Services team at 1-800-890-7798, Monday to Friday, 8am – 5pm CT.

NEW YORK LIFE

DIRECT BILL (Check)

If you pay your premium by check, please adjust the amount of your payment to reflect your new premium and ensure your account balance is sufficient to cover the amount.

BANK DRAFT

If you pay your premium via an automatic monthly electronic funds transfer, your new premium will be automatically deducted from your account. No action is required on your part.

ONLINE BANKING OR A THIRD PARTY

If your payment is made through online banking or a third party, please contact the bank or third party to adjust the payment amount before your payment at the new premium amount is due.

PAYROLL DEDUCT

If your employer deducts your premium from your paycheck, you may need to change your deduction amount with the payroll office. If applicable, please take a moment to stop by your payroll office and complete the necessary paperwork. If you are a New York Life employee, your new premium will be automatically deducted from your paycheck. No action is required on your part.

LEDGER DEDUCT (for New York Life Agents only)

If your premium is paid through ledger deductions, your new premium amount will be automatically deducted. No action is required on your part.

MUTUAL FUND*

If you pay your premium via a Mainstay Fund, please complete and return the enclosed form to New York Life in the envelope provided.

ANNUITY*

- If you pay your premium through a New York Life annuity (excluding Guaranteed Lifetime Income Annuity and 1035 Exchange), via an existing periodic partial withdrawal arrangement, please complete the enclosed form and return it to New York Life in the envelope provided. You can also fax it to 512-703-5575.
- If your long-term care insurance premium is funded through a Guaranteed Lifetime Income Annuity, please call 1-800-695-1314 to discuss your GLIA disbursement options. You do no need to complete the form.
- If you pay your premium through a partial 1035 serial exchange and wish to accept the increase, no action is required. If you want to make a plan change on a serial request, we will request the adjusted premium amount upon completion of the plan change. If it is a one-time request, you are required to complete new 1035 paperwork, which can be obtained through your Agent or our Policy Owner Services team. Any change made to a 1035 is subject to Suitability Review from the Annuity Department and subject to IRS Guidelines.

LIFE DIVIDEND*

If you pay your premium through dividends earned on other New York Life policies, please complete the enclosed form and return it to New York Life in the envelope provided.

*Note that a specific form is only included if our records indicate this is your method of premium payment.

If you have additional questions, please contact your New York Life Agent (their phone number is on the top of the notification letter you received) or our Policy Owner Services team at 1-800-890-7798, Monday to Friday, 8am – 5pm CT.

Premium Adjustment Authorization for Annuity Funding

Complete this form to adjust the amount funded through an existing Periodic Partial Withdrawal.[1]

Long-Term Care Insurance account number: < >

Name of Insured: < >

- *If you are considering making any changes to this long-term care insurance policy, including accepting an inflation offer, please do not complete this form until you have confirmation of your new premium amount.*
- *This form is not for use with a Partial 1035 Exchange. Please see the Annuity section in the enclosed 'Policyholder Information' for more about 1035 Exchange.*
- *If your long-term care insurance premium is funded through a **Guaranteed Lifetime Income Annuity (GLIA)**, please call 1-800-695-1314 to discuss your GLIA disbursement options. You do not need to complete this form.*

I give NYLIC/NYLIAC authorization to adjust the periodic partial withdrawal that is being disbursed from my annuity contract to pay my long-term care insurance < > premium to $< >.

I further authorize a one-time payment of $_____from my annuity in order for my account to be current.

Long Term Care Insurance
P.O. BOX 149009
Austin, TX 78714-9955
Fax 512-703-5575

If you have a payment situation that is not addressed by this form, please call 800-890-7798.

[1] A periodic partial withdrawal arrangement or partial withdrawal may result in a surrender charge being deducted from your policy's value, if the amount of the withdrawal, when added to the amount of all prior surrender charge free withdrawals occurring during the current policy year, exceeds the greatest of (a) 10% of the current Accumulation Value of your policy, (b) 10% of the Accumulation Value as of the prior Policy Anniversary (10% of the Premium Payment if the withdrawal is made in the first policy year) or (c) the Accumulation Value less the accumulated premium payments. Withdrawals from your policy may also reduce the amount of any benefit you would be eligible to receive associated with any riders. Please refer to a current product prospectus for complete details.

Re: New York Life – Response to Objections of our Long-Term Care filing

The purpose of this letter is to respond to your objections on our recent LTC filing.

1***) Thank you for the revised Actuarial Memorandum as requested. Please revise the actuarial certification slightly to state under item 2) if the rate increase is granted and assumptions, "which reflect moderately adverse conditions", are realized, no further premium rate increases are anticipated.***

The revised Actuarial Memorandum is attached.

2. On the Rate/Rule Schedule, please remove the "originally approved rates" from the rate schedules since these rates do not need approval and avoid any confusion with the New Increased Rates Schedules (These may be moved to supporting documentation). Please remove the effective date on each of the new schedules since it would no longer be applicable. Please review the age 75 and over rates. It is our understanding those rates should not change, similar to what occurred under SERFF filings: NWLT-128855883 and NWLT-128928316.

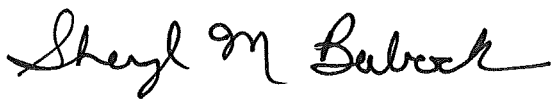
We have removed the originally approved rates form the rate schedules. As we discussed, there are situations where a policyholder can purchase additional coverage (increase their daily maximum benefit, as an example) and the additional benefit will be purchased at their attained age. The original benefit will still be calculated based on their original issue age. For those policyholders who are under attained age 75, if they choose to purchase additional coverage, the additional coverage will be at the higher (rate increased) rate at their attained age.

3. Please amend the Rate Summary to also indicate rates are being implemented over a three year period and the percentage increases.

The Rate Summary has been revised to indicate the overall rate increase will be implemented over a three year period and at what percentage increases each year.

4. We previously requested the policyholder letter would need to clearly indicate the ultimate rate increase and that it was being implemented over a three year period. The letters were amended to include the premium and effective date for each yearly increase. It does not appear, however, the letter actually states the overall percentage increase or what the percentage increase is each year. Since the percentage increase is not the same for all three periods, please amend the letters accordingly.

The revised policyholder notification letter is attached.



Sheryl M. Babcock, FSA, MAAA
March 4, 2014

New York Life Insurance Company
5.0 Series - Virginia Rate Filing

Due to the attained age 75 carve out, a person who is attained age 75 or later on their policy anniversary following the implementation of the rate increase will not receive a rate increase. Their premium will continue at the originally filed rates.

For a person who has not reached attained age 75 by their anniversary following the implementation of the rate increase, their premium rate will be increased, based on the phased in schedule approved by Virginia

In this second instance, a person who has not reached attained age 75 by their anniversary could decide later to purchase additional coverage in the form of additional daily benefit. In this instance the additional coverage would be calculated at the insured's attained age, at the rate increase premium amount. They would still get a rate increased premium on the additonal coverage even if they have attained age 75 in this instance.

Example 1:

Issue age 70, 3 year benefit, $100 a day, 100% HHC, no inflation, 90 day elimination period
Attained age 75 at time of rate increase

Annual premium = $ 1,138.70
Annual premium after first rate increase = $ 1,138.70 0.0% increase

Purchases additional coverage at age 76 of $100 a day, 100% HHC, no inflation, 90 day elimination period

additional premium = $ 2,074.00 (original premium rates)

Example 2:

Issue age 70, 3 year benefit, $100 a day, 100% HHC, no inflation, 90 day elimination period
Is not attained age 75 at time of rate increase

Annual premium = $ 1,138.70
Annual premium after first rate increase = $ 1,252.60 10.0% increase

Purchases additional coverage at age 76 of $100 a day, 100% HHC, no inflation, 90 day elimination period

additional premium = $ 2,281.40 (rate increased premium rates)

To: Janet Houser, Virginia Department of Insurance

From: Sheryl Babcock

Date: March 10, 2014

Re: New York Life – Response to Objections of our Long-Term Care filing

The purpose of this letter is to respond to your recent questions our LTC filing.

It would appear the rate increase is based either on issue age or attained age or a combination of both. For any individual with an issue age under 50 and an attained age below 75, the rate increase is 40%. If the issue age is 50 and older and the attained age is below 75, the rate is 25.1%, and for anyone regardless of issue age who now has an attained age of 75, the increase is 0%. Is that correct?

That is correct.

In addition, the rate increase applies to any future purchase option election for anyone under the age of 75 at their first policy anniversary on or after the rate increase and 0% for any policyholder over 75. Is that correct?

That is correct

As I mentioned in our phone call today, please provide a breakdown of how many policyholders would receive the 40% rate increase, the 25.1% rate increase, and the 0% rate increase.

These counts are based on inforce policies as of February 29, 2014.

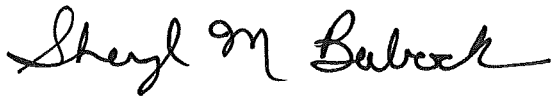
At this point, it appears we will need rate schedules for each of the above situations as noted below:

Issue age under 50 and attained age below 75 - 40% with bolded statement indicating future options based on attained age
Issue age age 50 and above and attained age below 75 - 25.1% with bolded statement indicating future options based on attained age
Attained age 75 and above - 0% including future elections

And each of these will have 3 sets of rates for each phase in period.

I have attached the three sets of rate schedules indicated above, for each of the three phase in periods.

Thank you for your patience. I hope that this will allow you to approve our rate filing.



Sheryl M. Babcock, FSA, MAAA
March 10, 2014

Re: New York Life – Response to Objections of our Long-Term Care filing

The purpose of this letter is to respond to your recent questions our LTC filing.

This is to confirm our phone conversation of March19, 2014. Attached is a NAIC's Executive/Plenary bulletin adopted on December 18, 2013.We have now added this to our review process and ask that the company advise if this filing is or is not consistent with the recommendations. Please provide details that support your response.

We are consistent with the contents of the bulletin in the following ways:

Actuarial Assumptions for Establishing Rate increase Requests:

1. The present and accumulated values have been calculated at the maximum valuation interest rates for each of the calendar years. The revised projections are attached as part of this response.

2. The accumulated values use actual experience of the product in as close a manner to that used in the original development of the rates as possible.

3. The present values use reasonable estimates of future premium payments and claims payments that are based on best estimates

Approval of Rate Increases:

The Virginia Bureau of Insurance has requested we phase in our rate increase over three years.

Requirement of Administer Contingent Benefit Upon Lapse:

New York Life is using the standard NAIC Model Regulation trigger to offer contingent benefit upon lapse on all policies, regardless of whether they are post-rate stability policies, or pre-rate stability policies.

Policyholder Notification of Premium Increase

We have supplied the Virginia Bureau of Insurance a copy of our policyholder notification letter.

Application of New Loss Ratio Standards:

This section does not apply to post-rate-stability policies.

The State Corporation Commission has an outstanding order to the BOI to obtain comments from the general public regarding long term care rates and proposed amendments. The BOI takes this very seriously, and based on both written and verbal comments received from our consumers, we have asked our insurers to now complete the Rate Rule Summary which the company did. We realize this is a new exercise for you; however, this one way to provide our consumers a better explanation as to why a rate increase was requested and what were the contributing causes.

In light of this, please expand the narrative in the Rate Summary so that any person reviewing this filing would clearly understand the reason for the rate increase and its driving factors. Remember, the audience may not be someone familiar with insurance terms and explanations may be needed.

We have revised the narrative in the Rate Summary to better explain the reason for the rate increase and the driving factors.

Thank you for your patience. I hope this allow you to approve our rate filing.

Re: New York Life – Response to Objections of our Long-Term Care filing

The purpose of this letter is to respond to your recent questions our LTC filing.

According to the March 31, 2014 response from Sheryl Babcock, the company indicates it is using the standard NAIC Model Regulation trigger to offer contingent benefit upon lapse on all policies, regardless of whether they are post -rate stability policies or pre-rate stability policies. For clarification, please confirm the standard regulation to which she is referring is NAIC's Executive/Plenary bulletin adopted on December 18, 2013.

That is true. Note however that we use the standard NAIC Model Regulation schedule that shows the cumulative percent increase over initial premium that triggers a substantial premium increase.

The bulletin requires clear disclosure addressing the guaranteed renewable nature of the policy and that the insured should understand that premiums may increase again in the future. The letter addresses the second half of this requirement but does not provide any disclosure regarding guaranteed renewability. The letter should be amended accordingly.

The letter has been updated to include clear disclosure with regard to the guaranteed renewable nature of the policy.

Since this rate increase may be approved in a series of schedule rate increase and the sum of all scheduled rate increase would ultimately trigger the offering of the contingent benefit upon lapse, please confirm the company will include the contingent benefit upon lapse at the time of each scheduled increase.

The schedule to trigger the contingent benefit upon lapse grades from 200% at issue ages under 29, to 40% for issue age 70. Because we are excluding all policyholders who have attained age 75, and all of our policies are at least in their fifth duration, we will not trigger the contingent benefit upon lapse with this series of rate increases. We also will not have any policy who has reached their twentieth duration.

Thus, the company will not need to include the contingent benefit upon at the time of each schedule increase.

Re: New York Life – Response to Objections of our Long-Term Care filing

The purpose of this letter is to respond to your objections on our recent LTC filing.

We are near the completion of our review of this rate filing; however, there still remains a concern with the company's use of the maximum valuation interest rate in the projections that support the proposed rate increase. At the time of pricing the company assumed a pricing interest rate of 6.25% rather than the lower maximum valuation interest rate. The result was lower initial premiums. We question the company's use of a significantly lower pricing assumption now that it is requesting a rate increase since it results in higher premiums than if the pricing interest rate was used. Please reply.

I understand your concerns. However, I believe the correct comparison when looking at projected loss ratios is to compare the actual projected loss ratios with the expected projected loss ratios at the time of original product filing. At the time the product was originally filed, the projected loss ratios were discounted using a 4.5% interest rate. To make a comparison of projected loss ratios at the pricing interest rate of 6.25% is not making a true "apples to apples" comparison.

As shown in Exhibit IV filed with the rate increase Actuarial Memorandum, using the 6.25% pricing interest rate for the projection of original pricing loss ratios equates to a lifetime loss ratio of 48.6%. The actual projected loss ratio with the rate increase at 6.25% is 57.9%, or 119% of original pricing. Similarly, if you calculate the projected pricing loss ratio at a 4.5% rate, the original lifetime loss ratio is 61.7%. The actual projected loss ratio with the rate increase is 74.49%, or 120% of original pricing. (See charts below.)

Nationwide Experience with no increase at 6.25%

	Actual	Expected	A/E
Past	7.8%	10.4%	74.8%
Future	90.1%	67.0%	134.4%
Lifetime	65.2%	48.6%	134.2%

Nationwide Experience with increase at 6.25%

	Actual	Expected	A/E
Past	7.8%	10.4%	74.8%
Future	76.7%	67.0%	114.5%
Lifetime	57.9%	48.6%	119.3%

Nationwide Experience with no increase at 4.5%

	Actual	Expected	A/E
Past	7.8%	10.4%	75.2%
Future	111.5%	81.9%	136.1%
Lifetime	84.8%	61.7%	137.5%

Nationwide Experience with increase at 4.5%

	Actual	Expected	A/E
Past	7.8%	10.4%	75.2%
Future	94.2%	81.9%	115.0%
Lifetime	74.4%	61.7%	120.6%

In reviewing your concerns, I also looked at Exhibit X in the rate increase Actuarial Memorandum. For Virginia specific experience, to get to a anticipated projected loss ratio of 60% (using the pricing interest rate of 6.25%), we would need to decrease our rate increase request by approximately 5%

I would accept a lower rate increase than originally requested, to alleviate your concerns that our requested rate increase is too high, based on the 4% interest rate used in the projections.

APPROVED

The Company You Keep®

NEW YORK LIFE INSURANCE COMPANY
New York Life, Long-Term Care, 7501 N. Capital of Texas Hwy., Suite C-100, Austin, Texas 78731-1774

Nonforfeiture Benefit Rider – Insured Information

Insured:	[John Q. Doe]		
Issue Age:	[55]	**Rider Premium:**	[$23.00]
Policy Number:	[1234567]	**Rider Premium Mode:**	[Annual]
Policy Effective Date:	[December 1, 2001]	**Rider Effective Date:**	[December 1, 2001]

This Rider attaches to and becomes part of the Policy indicated by the Policy Number above. **Please read this Rider carefully**. If this Rider is being issued with the Policy, it is attached to the Policy. If this Rider is being added after the Policy Effective Date, then this Rider should be attached to the Policy. This Rider is issued per Your written request, a copy of which is attached, and payment of the initial premium in full. Future premiums for the Policy include the premium for this Rider, and are payable under the terms of the Policy.

Description: The Nonforfeiture Benefit is a shortened benefit period providing paid-up long-term care insurance coverage if Your Policy lapses after it and this Rider have been in effect for three (3) years. If Your Policy is converted to paid-up status by operation of this Rider, benefits will be payable under Your Policy any time You qualify for benefits during the remainder of Your life under all of the terms and conditions of Your Policy. Benefits will be based on all of the daily and other benefit limits in effect at the time of lapse but not increased thereafter, but the benefits payable under this Rider will not exceed the Nonforfeiture Benefit Amount described below. Should there be changes in claims, persistency and interest as reflected in changes in rates for premium paying contracts approved by the commission for the same contract form, We will not adjust the nonforfeiture benefit subsequent to being initially granted.

Nonforfeiture Benefit Amount: The *Nonforfeiture Benefit Amount* equals the greater of:

- 100 percent of the sum of all premiums paid while Your Policy and this Rider were in force, including the premiums paid prior to any changes in benefits, or
- Thirty (30) times the *Nursing Home Maximum Daily Benefit* at the time of lapse.

But, the Nonforfeiture Benefit Amount will not exceed the remaining Policy Lifetime Maximum Benefit at the time Your Policy lapses and the provisions of this Rider become effective.

Nonforfeiture Benefit Commencement: If Your Policy or this Rider should lapse or terminate when they have been in effect for less than 3 years, no Nonforfeiture Benefits will be payable.

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Attained age 75* and above only

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.

NEW YORK LIFE INSURANCE COMPANY

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Below Attained Age 75*

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.

NEW YORK LIFE INSURANCE COMPANY

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Attained age 75* and above only

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.

NEW YORK LIFE INSURANCE COMPANY

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Below Attained Age 75*

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.

NEW YORK LIFE INSURANCE COMPANY

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Attained age 75* and above only

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.

NEW YORK LIFE INSURANCE COMPANY

GROSS ANNUAL PREMIUM RATES FOR POLICY SERIES

ILTC-5000 and INH-5000 and Riders

Virginia

Below Attained Age 75*

Rates for Shared Care Rider, Couples Additonal Benefits Rider, and Nonforfeiture Rider; and Marital/Sibling and Multi-Life Discounts

Shared Care Rider ALTC-5031(1001)

The Premium for the Shared Care Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Inflation Protection Rider (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders), and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Couples Additional Benefits Rider ALTC-5030(1001)

The Premium for the Couples Additional Benefits Rider is an additional 25% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Nonforfeiture Rider ALTC-5006(VA)(1001)

The Premium for the Nonforfeiture Rider is an additional 15% of the Total Premium for the Base Policy including Home Health Care, and all attached Shared Care, Couples Additional Benefits, and Inflation Protection Riders (including the CPI-U, CPI-U + 1%, and CPI-U + 2% Offer Riders) and all coverage increases due to the Acceptance of an Offer from any of the CPI-U Offer Riders.

Marital/Sibling Discount

If the applicant and one or more Siblings are covered and cohabitating, or if the applicant is Married, then a 15% Marital/Sibling Discount will be applied to the Total Premium.

Multi-Life Discount Program

Multi-Life cases that are issued at Standard Underwriting Class rates are eligible for a 10% Multi-Life Discount on their Total Premium.
